<i>Contributors</i>	ix
<i>Introduction to Advances in Insect Physiology: Insect Epigenetics</i>	xiii
1. Epigenetics in Insects: Mechanisms, Phenotypes and Ecological and Evolutionary Implications	1
Warren W. Burggren	
1. Introduction	2
2. Molecular Epigenetic Mechanisms in Insects	4
3. Epigenetic Dynamics	9
4. Epigenetic Phenotypic Modification	10
5. Ecological and Evolutionary Implications	18
6. Conclusions and Future Directions	21
Acknowledgement	21
References	22
2. Nutrition and Epigenetic Change in Insects: Evidence and Implications	31
Andrew Cridge, Tom Harrop, Mackenzie Lovegrove, Emily Remnant, and Peter Dearden	
1. Introduction	32
2. Epigenetic Effects of Nutrition in Insects	34
3. Insect Phenotypic Plasticity	38
4. Summary and Conclusions	48
References	48
3. The Role of MicroRNAs in <i>Drosophila</i> Regulation of Insulin-Like Peptides and Ecdysteroid Signalling: Where Are We Now?	55
Jian Q. Cao, Wai S. Tong, Hiu Y. Yu, Stephen S. Tobe, William G. Bendena, and Jerome H.L. Hui	
1. Introduction	56
2. ILPs and Ecdysteroids	57

3. miRNA Biogenesis Pathway and Action	58
4. miRNA Regulation of ILPs and Ecdysteroids	70
5. Summary	76
Acknowledgements	77
References	77
4. Epigenetic Regulation of Longevity in Insects	87
Iryna A. Kozeretka, Svitlana V. Serga, Alexander K. Koliada, and Alexander M. Vaiserman	
1. Introduction	88
2. Mechanisms of Epigenetic Regulation Across Insect Species	89
3. Developmental Epigenetic Programming of Caste-Specific Differences in Longevity in Social Insects	91
4. Modification of Aging and Longevity in <i>Drosophila</i> by Modulating Epigenetic Pathways	98
5. Transgenerational Epigenetic Inheritance of Life Span and Longevity-Associated Traits in <i>Drosophila</i>	104
6. Conclusions	107
References	108
5. Epigenetic Influences on Diapause	115
Julie A. Reynolds	
1. Overview of Diapause	116
2. DNA Methylation and Diapause Induction	118
3. Histone Modifications That May Regulate Insect Diapause	119
4. Small RNA Regulation of Insect Diapause	126
5. Evidence for Epigenetic Regulation of a Maternal Effect in <i>S. bullata</i>	130
6. Epigenetic Influences on Dormancy in Other Animals	133
7. Conclusions and Future Directions	136
Acknowledgements	137
References	137
6. The Impact of Parasites on Host Insect Epigenetics	145
Andreas Vilcinskas	
1. Introduction	146
2. Insect Immunity	147

3. Histone Acetylation and Deacetylation	148
4. Impact of Parasites on Histone Acetylation and Deacetylation in the Host	151
5. DNA Methylation	154
6. miRNAs	157
7. Concluding Remarks	159
Acknowledgements	160
References	160

7. From Molecules to Management: Mechanisms and Consequences of Locust Phase Polyphenism 167

Darron A. Cullen, Arianne J. Cease, Alexandre V. Latchininsky, Amir Ayali, Kevin Berry, Jerome Buhl, Rien De Keyser, Bert Foquet, Joleen C. Hadrich, Tom Matheson, Swidbert R. Ott, Mario A. Poot-Pech, Brian E. Robinson, Jonathan M. Smith, Hojun Song, Gregory A. Sword, Jozef Vanden Broeck, Rik Verdonck, Heleen Verlinden, and Stephen M. Rogers

1. Introduction	169
2. Evolution and Diversity of Swarming Grasshoppers	178
3. Measuring Phase-Related Behaviour	185
4. Proximal Stimuli Inducing Phase Change	195
5. Biogenic Amine Signalling	198
6. Genomics, Transcriptomics and Epigenetics	211
7. Neurophysiological Consequences of Phase Change	220
8. Collective Behaviour	230
9. Environmental Stimuli Affecting Phase Change	238
10. Ecology and Landscape-Level Processes	242
11. Human-Locust Interactions	252
12. Concluding Remarks	258
Acknowledgements	261
References	261

8. The Future of Environmental Epigenetics: Insights Using the Clonal Water Flea Model 287

Marcin W. Wojewodzic and Margaret J. Beaton

1. Introduction	288
2. <i>Daphnia</i> as a Model Organism	290
3. Epigenetic Machinery in <i>Daphnia</i> : Evidence and Predictions	295
4. Insights From Epigenetic Studies	299

5. Technology-Driven Research: Methods and Bioinformatics	303
6. <i>Quo Vadis?</i>	305
Acknowledgements	308
References	308

9. Epigenetics: A Hidden Target of Insecticides 313

Ann-Marie Oppold and Ruth Müller

1. Insecticides	314
2. Insecticide Resistance	315
3. Epigenetics Involved in Insecticide Response	317
4. Epigenetics Can Enhance Early on Adaptation	320
5. Epigenetic System as Promising Target for New Insecticides	321
References	322
