1. Sodium Chloride Does Not Ensure Microbiological Safety of Foods: Cases and Solutions	1
Nam Hee Kim, Tae Jin Cho and Min Suk Rhee	
1. Introduction	2
2. The Presence of Harmful Microorganisms in Salt-Cured Foods	3
3. Behaviors of Pathogenic Microorganisms in Salt-Cured Foods	15
4. How Does Sodium Chloride Affect the Efficacy of Other Antimicrobial Treatments?	28
5. Conclusions	33
References	34
2. Toward Genome-Based Metabolic Engineering in Bacteria	49
Sabine Oesterle, Irene Wuethrich and Sven Panke	
1. Introduction	50
2. <i>Escherichia coli</i> as a Model Organism and Production Host	52
3. Pathway Optimization and Strain Selection	54
4. The Recombineering Toolkit	56
5. Applications in Metabolic Engineering	65
6. Beyond <i>Escherichia coli</i>	68
7. Present and Future Challenges	70
References	71
Further Reading	82
3. Microbial Transformation of Iodine: From Radioisotopes to Iodine Deficiency	83
Chris M. Yeager, Seigo Amachi, Russell Grandbois, Daniel I. Kaplan, Chen Xu, Kathy A. Schwehr and Peter H. Santschi	
1. Iodine in the Environment	84
2. Volatilization and Assimilation of Organoiodine Compounds	91
3. Accumulation of Iodine	95
4. Iodate Reduction and Reductive Deiodination of Organoiodine Compounds	101
5. Oxidation of Iodide	106

6. Microbial Influence on Iodine-Soil Interactions	114
7. Summary	120
References	122
4. Uranium Bioreduction and Biomineralization	137
Rehemanjiang Wufuer, Yongyang Wei, Qinghua Lin, Huawei Wang, Wenjuan Song, Wen Liu, Daoyong Zhang, Xiangliang Pan and Geoffrey Michael Gadd	
1. Introduction	138
2. Uranium Species and Mobility	139
3. Uranium Bioreduction	141
4. Uranium Biomineralization With Phosphate	150
5. Uranium Biomineralization With Carbonate	155
6. Uranium Biomineralization With Silicate	157
7. Conclusions	157
Acknowledgments	158
References	158
5. The Contribution of Bacteriophages to the Biology and Virulence of Pathogenic Clostridia	169
Louis-Charles Fortier	
1. Introduction	170
2. Prophages and Toxin Production in <i>Clostridium botulinum</i> and <i>Clostridium novyi</i> —An Historical Overview	175
3. The Role of Temperate Phages in the Biology and Virulence of <i>Clostridium difficile</i>	179
4. <i>Clostridium perfringens</i> Phages Interfering With Sporulation	189
5. Perspectives and Future Challenges	191
Acknowledgments	192
References	192
