vii

1. Physiological Role of Two-Component Signal Transduction Systems in Food-Associated Lactic Acid Bacteria	1
Vicente Monedero, Ainhoa Revilla-Guarinos and Manuel Zúñiga	
1. Introduction	2
2. Number, Distribution, and Classification of TCSs in Lactobacilli	7
3. Physiological Roles of TCSs in Lactobacilli	10
4. Concluding Remarks	38
Supplementary data	39
References	39
2. Fungal Biorecovery of Gold From E-waste	53
Saskia Bindschedler, Thi Quynh Trang Vu Bouquet, Daniel Job, Edith Joseph and Pilar Junier	
1. Introduction	54
2. Current Context of Metal Recycling	55
3. The Problem of Gold	61
4. Conclusion	75
Acknowledgments	76
References	76
3. Stone-Eating Fungi: Mechanisms in Bioweathering and the Potential Role of Laccases in Black Slate Degradation With the Basidiomycete <i>Schizophyllum commune</i>	83
Julia Kirtzel, Daniela Siegel, Katrin Krause and Erika Kothe	
1. Introduction	84
2. Bioweathering	84
3. Ecological Significance of Rock-Inhabiting Fungi	87
4. Genes Involved in Rock Degradation	88
5. Multicopper Oxidases in the Environment	93
6. Laccases in Soil and Interaction With Minerals	94

7. Stress Response in Bioweathering	95
8. Conclusions	96
Acknowledgments	97
References	97
4. The Arsenic Detoxification System in <i>Corynebacteria</i>: Basis and Application for Bioremediation and Redox Control	103
Luis M. Mateos, Almudena F. Villadangos, Alfonso G. de la Rubia, Alvaro Mourenza, Laura Marcos-Pascual, Michal Letek, Brandán Pedre, Joris Messens and Jose A. Gil	
1. General Interest in <i>Corynebacterium glutamicum</i>	104
2. Arsenic and Its Role in Nature	105
3. Molecular Mechanisms of Arsenic Detoxification: <i>ars</i> Operons	107
4. Bioremediation of Arsenic: <i>Corynebacterium glutamicum</i> as an Example	120
5. Alleviation of Oxidative Stress in <i>Corynebacterium glutamicum</i> by the Redox System MSH/Mrx	126
6. Future Perspectives	130
Acknowledgments	131
References	131
