List of Contributors	xiii
Foreword	xvii
List of Abbreviations	xxi

Section I

Legacy and Emerging Contaminants in Marine Mammal Populations

1. Organochlorine Contaminants and Reproductive Implication in Cetaceans: A Case Study of the Common Dolphin

Sinéad Murphy, Robin J. Law, Robert Deaville, James Barnett, Matthew W. Perkins, Andrew Brownlow, Rod Penrose, Nicholas J. Davison, Jonathan L. Barber and Paul D. Jepson

Introduction	3
Cases of Reproductive Failure and Dysfunction Associated With Exposure to OCs in Cetaceans	7
Case Study of Short-Beaked Common Dolphin in the Northeast Atlantic	11
Study Design	13
Incidences of Reproductive Abnormalities and Disorders in Common Dolphins	15
Effects of Contaminants on Reproduction in Common Dolphins	21
PCB and Reproductive Implications for Common Dolphins	24
Conclusions	28
Acknowledgments	29
References	29

2. Feeding Ecology Tools to Assess Contaminant Exposure in Coastal Mammals

Elizabeth A. McHuron, Sarah H. Peterson and Todd M. O'Hara

Contaminants and Coastal Mammals	39
A Nonlinear View of the Fate and Transport of Contaminants to Coastal Ecosystems	41
Use of Stable Isotopes as a Chemical Feeding Ecology Tool in Contaminant Studies	45

Statistical Approaches	46
Trophic Level Interactions	47
Nontrophic Level Interactions	49
Geographic Variation	53
Limitations and Considerations	53
Additional Feeding Ecology Tools	58
Conclusions	60
References	61
3. The Effects of Oil Exposure on Cetaceans	
<i>Céline A.J. Godard-Codding and Tracy K. Collier</i>	
Introduction	75
Properties of Oil	75
Exposure of Cetaceans to Oil	76
Effects of Oil on Cetaceans	77
Range of Organismal Effects Following Oil Exposure	77
Organismal Effects Related to Specific Routes of Exposure	79
Effects Observed in Other Relevant Species	82
Population Effects Following Oil Exposure	84
Future Research Needs and Recommendations	85
References	87
Further Reading	93
4. Legacy Contamination in Estuarine Dolphin Species From the South American Coast	
<i>Salvatore Siciliano, Jailson F. Moura, Davi C. Tavares, Helena A. Kehrig, Rachel A. Hauser-Davis, Isabel Moreira, Ricardo Lavandier, Leila S. Lemos, Renata Emin-Lima and Natalia S. Quinete</i>	
Introduction	95
Essential and Nonessential Elemental Contamination in Guiana and Franciscana Dolphins	96
The Specific Case of Mercury Accumulation and Toxicity in Marine Mammals	101
Polychlorinated Biphenyl and Polybrominated Diphenyl Ether Contamination in Guiana and Franciscana Dolphins	102
Application of Biomarkers of Response to Environmental Pollutants in Dolphins	107
Final Remarks	109
References	109
5. Poly- and Perfluoroalkyl Substances in Marine Mammals	
<i>Patricia A. Fair and Magali Houde</i>	
Introduction	117
Global Distribution of PFASs in Marine Mammals	119

Temporal Trends in the Bioaccumulation of PFASs in Marine Mammals	123
Bottlenose Dolphins from Charleston, South Carolina, U.S. - A Case Study	129
Health-Related Effects of PFASs in Marine Mammals	131
Future Perspectives	136
References	138
6. Impacts of Marine Litter on Cetaceans: A Focus on Plastic Pollution	
<i>Maria Cristina Fossi, Matteo Baini, Cristina Panti and Sarah Baulch</i>	
Impact of Marine Litter on Cetaceans	147
Ingestion	149
Entanglement	160
Current Existing Protocols and Approach for the Analysis of Marine Litter	161
Stranded Organisms	161
Free-Ranging Organisms	164
Identification of Plastic Additives in Tissue Samples: Phthalates Detection	164
Sample Collection and Analysis	165
Plastic Additives in Environmental and Cetacean Samples	165
Development of Biomarkers to Evaluate the Exposure of Plastic Additive in Free-Ranging Cetaceans	166
A Threefold Monitoring Approach to Detect Marine Litter Ingestion and Impact in Cetaceans	168
Hot Spot Areas of Marine Litter for Marine Mammals: The Case Study of the Mediterranean Sea	169
Identification of the Species Most Threatened Species by Marine Litter	171
Future Development and Recommendations	172
Acknowledgments	173
References	173
7. Persistent Organic Pollutants in Cetaceans Living in a Hotspot Area: The Mediterranean Sea	
<i>Letizia Marsili, Begoña Jiménez and Asunción Borrell</i>	
Introduction	185
Case Studies	188
Striped Dolphin	188
Common Bottlenose Dolphin	193
Short-Beaked Common Dolphin	199
Sperm Whale	201
Fin Whale	202
Conclusions and Research Needs	205
References	205
Further Reading	212

8. Pollutants in Tropical Marine Mammals of the Galápagos Islands, Ecuador: an Ecotoxicological Quest to the Last Eden

Juan José Alava and Peter S. Ross

Introduction	213
Chemical Pollution in the Galápagos Marine Reserve:	
An Inconvenient Truth	214
Galápagos Pinnipeds Sampling and Study Area	215
POP Analysis	216
Legacy PCBs Versus Emerging PBDEs	216
Dioxins and Furans	218
The Raising of DDTs: Exposure and Biomagnification	218
Other Organochlorine Pesticides	222
Role of Oceanic and Atmospheric Transport of POPs	223
POP Health Risks	223
Contaminants of Emerging Concern in the Galápagos Islands	224
CUPs	224
PPCPs	225
Antifouling Paints	226
Microplastics	226
Mercury	227
Pollutant Management and Conservation Implications	
in the Last Eden	227
Acknowledgments	229
References	229

Section II

Effects of Toxicological and Cumulative Stress on Marine Mammal Health

9. Field Sampling Techniques and Ecotoxicologic Biomarkers in Cetaceans

Céline A.J. Godard-Codding and Maria Cristina Fossi

Introduction	237
Field Sampling Techniques in Cetaceans	238
Stranded Animals for Ecotoxicologic Investigation	239
Ecotoxicologic Investigation in Free-Ranging Cetaceans:	
The Skin Biopsy Approach	239
Skin Biomarkers in the Cetacean's World	241
Protein Expression in Cetaceans' Skin Biopsies	245
Gene Expression in Cetaceans' Skin Biopsies	245
The Relevance of In Vitro (Cell Cultures) and Ex Vivo	
(Organotypic Cultures) Models in Ecotoxicology	246
The Relevance of Hormone Analyses in a Multidisciplinary	
Biomarker Approach to Ecotoxicologic Investigation	247

Application in Case Studies	248
Interspecific Variability	248
Biomarker Approach in Hot Spot Areas	249
Biomarker Approach in Sperm Whale Worldwide	250
Conclusion	253
Acknowledgments	254
References	254
Further Reading	259
10. Ecotoxicological Biomarkers and Accumulation of Contaminants in Pinnipeds	
<i>Kristina Lehnert, Jean-Pierre Desforges, Krishna Das and Ursula Siebert</i>	
Introduction	261
Marine Mammals in the North Sea: Case Study of a Polluted Area	262
Environmental Toxicology: Where Ecology Meets Toxicology	267
Biomarkers	269
Endocrine Dysfunction	270
Liver Function	271
Disease Surveillance	271
Hematology and Blood Chemistry	272
Immune System	273
Gene Expression	275
Outlook	278
References	279
11. New Technologies for Monitoring Marine Mammal Health	
<i>Annalaura Mancía</i>	
Introduction	291
The Omics Technologies	292
Genomics	292
Transcriptomics	294
Proteomics	294
Metabolomics	295
Epigenomics	296
Toxicogenomics	297
Omics of the Marine Mammal World	297
Marine Mammal Genome Projects	298
Omics Findings for Marine Mammal Health	300
New Technologies: Challenge and Progress	304
Linking Marine Mammals to Humans: New Resources for Health	305
Applications of Modern Genomics Techniques: Metagenomics for Zoonoses	306

Applications of Marine Mammal Unique Adaptations:	
Marine Biomedicine	309
Concluding Remarks	311
References	312
12. Immunotoxic Effects of Environmental Pollutants in Marine Mammals	
<i>Jean-Pierre Desforbes, Christian Sonne, Rune Dietz and Milton Levin</i>	
Introduction	321
Marine Mammal Immunology	322
The Immune System: Innate Versus Adaptive	322
Immune Organs, Cells, and Proteins	322
Characterizing Immune Function	324
Immunotoxicology in Marine Mammals	325
Study Designs and Methodologies for Marine Mammal Immunotoxicology	325
Synthesis of Immunotoxicity in Marine Mammals	327
Considerations, Challenges, and Future Needs	333
Reference Intervals	333
Marine Mammal Cell Lines	333
Marine Mammal Immune Cell Tissue Bank	334
In Vitro Extrapolation	334
Multiple Stressors and Population-Level Effects	335
Conclusions	335
References	336
13. Ecotoxicologic Stress in Arctic Marine Mammals, With Particular Focus on Polar Bears	
<i>Heli Routti, Bjørn M. Jenssen and Sabrina Tartu</i>	
Contaminants in Arctic Marine Mammals	345
Transport of Contaminants to the Arctic	345
Biomagnification and Biotransformation	346
Monitoring Contaminants in Arctic Marine Mammals	348
Individual Variation	349
Spatial Trends	350
Temporal Trends	351
Effects of Contaminants in Arctic Marine Mammals	351
Seals and Whales	351
Polar Bears	353
Arctic Marine Mammals Faced by the Global Climate Change	355
Combined Effects of Contaminant Exposure and Climate Change in Polar Bear Population	356
Case Study: Synergistic Effects of Sea Ice Decline and Contaminant Exposure in Polar Bears From the Barents Sea	357
Background	357

Study Design	358
Results	359
Effect of Pollutants on Polar Bear Energy Homeostasis	362
Effect of Pollutants in Polar Bear Energy Homeostasis Using In Vitro and In Silico Approach	363
Conclusion and Perspectives	364
References	365
 14. Toxicological Risks and Considerations Associated With Lipophilic Contaminant Burdens of Southern Ocean Mysticetes	
<i>Susan M. Bengtson Nash</i>	
Synthetic Chemical Contamination of the Antarctic Region	381
The Antarctic Sea Ice Ecosystem	382
Feeding Ecology of Southern Ocean Mysticetes	383
Adaptation to the Polar Environment	383
Biogeochemical Cycling of POPs in the Polar Environment	384
Mysticete POP Exposure and Uptake	385
Temporal Trends of Southern Ocean Mysticete POP Burdens	388
POP Toxicokinetics and the Toxicological Risk Posed to Southern Ocean Mysticetes	390
Seasonal Cycles	390
Life Stages	390
Effects Assessment	391
Adjusted Risk Categories	392
Anomalies and Opportunities in a Changing Polar Climate	393
Lipophilic Contaminants as Tracers of Energetic Health: A Case Study on Humpback Whales	393
Conclusion	394
References	395
 15. Emerging Pathogens and Stress Syndromes of Cetaceans in European Waters: Cumulative Effects	
<i>Sandro Mazzariol, Manuel Arbelo, Cinzia Centelleghé, Giovanni Di Guardo, Antonio Fernandez and Eva Sierra</i>	
Introduction	401
Morbillivirus	403
Herpesvirus	404
Brucella and Other Bacteria	405
Toxoplasma gondii	407
Canary Islands	408
Dolphin Morbillivirus	408
Herpesvirus	410
Brucella spp., Erysipelothrix rhusiopathiae, and Toxoplasma gondii	411
Central Mediterranean Sea: Italy	411
Morbillivirus	412

Herpesvirus	413
<i>Brucella ceti</i> and <i>Erysipelothrix rhusiopathiae</i>	415
<i>Toxoplasma gondii</i>	415
Concluding Remarks	416
References	417
Further Reading	426
 16. Ecotoxicology of the Sirenia in the Twenty-First Century	
<i>Thomas J. O'Shea, Noel Y. Takeuchi, Liesbeth Weijs and Helene Marsh</i>	
The Sirenia	429
Twentieth-Century Concerns and Findings	431
Organochlorine Pesticides and Metabolites	432
Other Organohalogens and Polycyclic Aromatic Hydrocarbons	436
Heavy Metals and Other Toxic Elements	438
Biotoxins and Harmful Algal Blooms	440
Twenty-First-Century Findings and Concerns	440
Organochlorine Pesticides and Metabolites	440
Other Organohalogens and PAHs	441
Heavy Metals and Other Toxic Elements	445
Biotoxins and Harmful Algal Blooms	447
Conclusions and Suggestions for Future Research	449
Final Remarks	450
References	451

Section III

Implication for Monitoring and Conservation of Marine Mammals

17. Marine Mammals and Multiple Stressors: Implications for Conservation and Policy

Mark P. Simmonds

Introduction	459
An Inventory of Threats	460
An Example of a Complexity: Climate Change	463
Engaging With Multiple Stressors	463
The Latest Work on Cumulative Effects	466
Conclusions and Recommendations	467
Acknowledgments	469
References	469
