

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
1. Biochemical Characterization of Function and Structure of RseP, an <i>Escherichia coli</i> S2P Protease	1
Y. Hizukuri, K. Akiyama, and Y. Akiyama	
1. Introduction	2
2. The Use of MBP-Tagged Model Substrates for Analysis of Proteolytic Activity of RseP	4
3. <i>In Vitro</i> Analysis of Proteolysis of SPs by RseP	11
4. Structural Analysis of RseP Using Thiol-Specific Modification Reagents	18
5. <i>In Vivo</i> Cross-Linking Analysis to Probe the Interaction of RseP With Its Substrate in the Membrane	27
Acknowledgments	32
References	32
2. Signal Peptidase Enzymology and Substrate Specificity Profiling	35
R.E. Dalbey, D. Pei, and Ö.D. Ekici	
1. Introduction	36
2. Purification of $\Delta 2-75$ SP1	39
3. Purification of SP1 Substrate pONA	41
4. <i>In Vitro</i> Signal Peptide Cleavage Assay	43
5. <i>In Vivo</i> Assay of Signal Peptidase Activity	44
6. Substrate Specificity Profiling	46
7. Conclusions	54
Acknowledgment	54
References	54
3. Screening and Characterization Strategies for Nanobodies Targeting Membrane Proteins	59
S. Veugelen, M. Dewilde, B. De Strooper, and L. Chávez-Gutiérrez	
1. Introduction	60
2. Phage Display	62
3. Critical Aspects of Biopannings	64
4. Screening Strategies	71

5. Characterization of Nanobodies	80
6. Potential Applications	85
Acknowledgments	88
References	88
4. Probing the Activity of Eukaryotic Rhomboid Proteases <i>In Vitro</i>	99
B. Cordier and M.K. Lemberg	
1. Introduction	100
2. Expression and Solubilization of Rhomboid Proteases From Bacteria	101
3. <i>In Vitro</i> Probing of Rhomboid Protease Activity	112
Acknowledgments	123
References	123
5. Expression, Purification, and Enzymatic Characterization of Intramembrane Proteases	127
R. Zhou, Y. Shi, and G. Yang	
1. Introduction to Intramembrane Proteases	128
2. Expression and Purification of GlpG, S2P, and PSH	129
3. Enzymatic Activity Assays for Intramembrane Proteases	135
4. Expression and Purification of Human γ -Secretase	137
5. Enzymatic Activity Assay for Human γ -Secretase	143
6. Structures of I-CLiPs	145
7. Concluding Remarks	147
Acknowledgments	149
References	149
6. Analyzing Amyloid-β Peptide Modulation Profiles and Binding Sites of γ-Secretase Modulators	157
J. Trambauer, A. Fukumori, B. Kretner, and H. Steiner	
1. Introduction	158
2. Methods	160
Acknowledgments	181
References	181
7. Probing the Structure and Function Relationships of Presenilin by Substituted-Cysteine Accessibility Method	185
T. Tomita	
1. Introduction	186
2. Principle of Cysteine-Based Structural Analyses of Presenilin	189

3. Protocol	197
4. Summary and Perspectives	201
Acknowledgments	202
References	202
8. A New Method to Determine the Transmembrane Conformation of Substrates in Intramembrane Proteolysis by Deep-UV Resonance Raman Spectroscopy	207
J.W. Cooley, A. Abdine, M. Brown, J. Chavez, B. Lada, R.D. Jiji, and I. Ubarretxena-Belandia	
1. Introduction	208
2. <i>In Vitro</i> Intramembrane Proteolysis Assay	211
3. Intramembrane Proteolysis of the Substrate Monitored by dUVRR Spectroscopy	221
4. Conclusions	224
Acknowledgment	225
References	225
9. An Inducible Reconstitution System for the Real-Time Kinetic Analysis of Protease Activity and Inhibition Inside the Membrane	229
R.P. Baker and S. Urban	
1. Introduction	230
2. Enzymatic Considerations for Kinetic Analysis of Proteolysis in Detergent Micelle Systems	233
3. A New Strategy: Quantitative Analysis in Proteoliposomes	235
4. Preparation of Liposomes	238
5. Preparation of Fluorophore-Labeled Substrate	239
6. Establishing an Inducible and Fluorogenic Intramembrane Protease Assay	240
7. Real-Time Kinetic Analysis of Membrane-Immersed Proteolysis	245
8. Summary	250
Acknowledgments	250
References	250
10. Production of Recombinant Rhomboid Proteases	255
E. Arutyunova, R. Panigrahi, K. Strisovsky, and M.J. Lemieux	
1. Introduction	256
2. Overview	256

3. Example of an Expression and Purification Protocol—The pBAD System	258
Acknowledgments	275
References	276
11. Mechanism and Inhibition of Rhomboid Proteases	279
K. Strisovsky	
1. Introduction	279
2. Rhomboid Protease Mechanism	280
3. Substrate Specificity of Rhomboid Proteases	282
4. Rhomboid Protease Inhibitors	285
5. Concluding Remarks and Perspectives	290
Acknowledgments	290
References	290
12. Enzymatic Assays for Studying Intramembrane Proteolysis	295
D.M. Bolduc, D.J. Selkoe, and M.S. Wolfe	
1. Introduction	296
2. Detergent-Solubilized Assay	297
3. Proteoliposome Assay	299
4. Inducible Proteoliposome Assay	301
5. Conclusions	306
Acknowledgments	307
References	307
13. Methods for Structural and Functional Analyses of Intramembrane Prenyltransferases in the UbiA Superfamily	309
Y. Yang, N. Ke, S. Liu, and W. Li	
1. Introduction to the UbiA Superfamily	310
2. Biological Function and Enzymatic Activity of the Subfamilies	311
3. Predicting the Functional Role of Intramembrane Prenyltransferases by Sequence Clustering Analysis	315
4. Analysis of Enzymatic Activity	319
5. Structural Studies of the UbiA Superfamily	325
Acknowledgments	341
References	341

14. Functional Study of the Vitamin K Cycle Enzymes in Live Cells	349
J.-K. Tie and D.W. Stafford	
1. Introduction	350
2. Cell-Based Assay for Functional Study of Vitamin K Cycle Enzymes	361
3. Functional Study of VKOR Using TALENs-Mediated Gene Knockout Reporter Cells	370
4. Functional Study of GGCX Using CRISPR-Cas9-Mediated Gene Knockout Reporter Cells	378
5. Concluding Remarks	386
References	387
15. Activity Assays for Rhomboid Proteases	395
E. Arutyunova, K. Strisovsky, and M.J. Lemieux	
1. Introduction	396
2. <i>In Vivo</i> Assays	397
3. <i>In Vitro</i> Assays	398
Acknowledgments	434
References	434
Author Index	439
Subject Index	465
