ix

1. Molecular Mechanisms of Noncanonical Autophagy

1

N. Dupont, A.C. Nascimbeni, E. Morel, P. Codogno

1. Introduction	2
2. The Canonical Autophagic Pathway	3
3. Noncanonical Autophagy	7
4. Conclusions	16
Acknowledgments	17
References	17

2. Epigenetic Control of Gene Expression in Maize

25

J. Huang, J.S. Lynn, L. Schulte, S. Vendramin, K. McGinnis

1. Introduction	26
2. McClintock's Bequest: Transposable Elements Form the Foundation of Epigenetics and Come Back Into Focus in the "Omics" Era	26
3. The Battle Between two Genomes: Maternal and Paternal Influences on Gene Expression	31
4. A Puzzling and Illuminating Phenomenon: Paramutation as a Model to Study Transcriptional Silencing in Maize	33
5. Putting it all Together: Mutants Replace the Mystery With Mechanism	34
6. Location, Location, Location, and Know Your Neighbors: Real Estate Rules Apply to Genomes for Cytosine Methylation and Gene Expression	39
7. Cultivating Diversity: Differentially Methylated Regions Coincide With Inherited Phenotypic Diversity	41
8. Having the Right Tool for the Job: Diversified "RNA-Directed DNA-Methylation" May Have Emerged in Conjunction With the Complex Maize Genome	42
9. Maize Epigenetics in the Postgenomics Era	43
References	44

3. Mitochondria in Multiple Sclerosis: Molecular Mechanisms of Pathogenesis	49
S. Patergnani, V. Fossati, M. Bonora, C. Giorgi, S. Marchi, S. Missiroli, T. Rusielewicz, M.R. Wieckowski, P. Pinton	
1. Introduction	50
2. Biological Importance of Mitochondria	52
3. Neurodegeneration Associated With Mitochondria	61
4. MS	64
5. Mitochondria and MS	68
6. Mitochondria as a Potential Therapeutic Target for MS	78
7. MS Models	80
8. Conclusions and Perspectives	86
Acknowledgments	87
References	87
4. Molecular Regulation of the Spindle Assembly Checkpoint by Kinases and Phosphatases	105
G. Manic, F. Corradi, A. Sistigu, S. Siteni, I. Vitale	
1. Introduction	107
2. The Spindle Assembly Checkpoint: Inducers, Actors, and Effectors	108
3. Kinases Involved in the Spindle Assembly Checkpoint	115
4. Phosphatases Involved in the Spindle Assembly Checkpoint	134
5. Conclusions	142
Acknowledgments	145
References	145
5. BH3-Only Proteins in Health and Disease	163
J.A. Glab, G.W. Mbogo, H. Puthalakath	
1. Introduction	164
2. Between the Quick and the Dead	165
3. Fidelity Versus Promiscuity	166
4. The Activation Conundrum	168
5. BH3-Only Proteins, Homeostasis, and Development: It's a Matter of Life and Death	170
6. Concluding Remarks	183
Acknowledgments	184
References	185

6. The Multifaceted Contributions of Chromatin to HIV-1 Integration, Transcription, and Latency	197
E. De Crignis, T. Mahmoudi	
1. Introduction	198
2. Role of Chromatin in HIV-1 Integration	201
3. Role of Chromatin in HIV-1 LTR Transcription and Latency	213
4. Chromatin: a Druggable Target in HIV-1 Therapeutics	224
5. Concluding Remarks	231
Acknowledgments	231
References	231
7. The Inflammatory Signal Adaptor RIPK3: Functions Beyond Necroptosis	253
K. Moriwaki, F.K.-M. Chan	
1. Introduction	254
2. RIPK3 Functions as an Essential Adaptor for Necroptosis	255
3. Negative Regulatory Mechanisms of Necroptosis	257
4. How Does RIPK3 Promote Inflammation?	261
5. Nonnecrotic Functions of RIPK3	261
6. Concluding Remarks	267
References	268
