1. Evolving Centromeres and Kinetochores

1

Steven Friedman, Michael Freitag

1. Introduction

2

2. Centromeres: From Point to Holo

5

3. Kinetochore Proteins: Similar yet so Diverse

16

4. Fungal Opportunities

27

5. Summary and Outlook

28

Acknowledgments

30

References

30

Further Reading

41

2. The Genetics of Parkinson Disease

43

Lina Mastrangelo

1. Timeline of Parkinson Disease Research

44

2. Environmental Basis of Parkinson Disease

45

3. Genetic Basis of Parkinson Disease

46

4. Autosomal Dominant Parkinson Disease

47

5. Autosomal Recessive Parkinson Disease

52

6. The Past and the Future of Parkinson Disease Therapies

53

7. Conclusions

56

References

56

3. Genetics of Mitochondrial Disease

63

Russell P. Saneto

1. Introduction

64

2. Epidemiology

66

3. Oxidative Phosphorylation

68

4. Mitochondrial Genetics

70

5. Mitochondrial DNA-Encoded Mitochondrial Disorders

76

6. Nuclear-Encoded Mitochondrial Disorders

84

7. Genetic Investigation of Mitochondrial Disease

101

8. Treatment	102
9. Conclusion	103
References	103
Further Reading	116
4. Evolutionary Trajectories of Entomopathogenic Fungi ABC Transporters	117
Bikash Baral	
1. Introduction	118
2. ABC Proteins Molecular Architecture	119
3. ABC Proteins Functional Characterization	120
4. Substrate Specificity and the Mechanisms of Drug Recognition by the Fungal ABC Pumps	123
5. Fungal Entomopathogens	128
6. Gene Evolution as a Major Driving Force in Fungal Evolution	129
7. Inventory of Entomopathogenic Fungi ABC Proteins	130
8. Challenges in Studying the ABC Proteins	148
9. Conclusions and Future Perspectives	149
Acknowledgments	150
References	150
5. Delivery of Biomolecules via Extracellular Vesicles: A Budding Therapeutic Strategy	155
Devin M. Stranford, Joshua N. Leonard	
1. Introduction	156
2. Cargo Loading	157
3. Evaluating and Enhancing Uptake and Functional Delivery	163
4. Vesicle Source	166
5. Production, Scale-Up, and Purification Methods	168
6. Conclusions	169
