Contributors	xiii
Preface	xix
CHAPTER 1 Ultrastructural analysis of the extracellular matrix	1
Douglas R. Keene, Sara F. Tufa	
1. Introduction	2
2. Methods	5
3. Materials	35
References	36
CHAPTER 2 Live tissue antibody injection: A novel method for imaging ECM in limb buds and other tissues	41
Donald A. Fowler, Michael B. Filla, Charles D. Little, Brenda J. Rongish, Hans C.E. Larsson	
1. Introduction	42
2. Method	43
3. Results	47
4. Summary	53
References	53
CHAPTER 3 Nonlinear optical imaging of extracellular matrix proteins	57
Chien-Cheng Shih, Dennis M. Oakley, Matthew S. Joens, Robyn A. Roth, James A.J. Fitzpatrick	
1. Introduction	58
2. Methods	61
3. Imaging the Microstructure of Mice Aorta Using MHIM	66
4. Conclusions	74
Acknowledgments	74
References	75
CHAPTER 4 Methods for the visualization and analysis of extracellular matrix protein structure and degradation	79
Annemarie K. Leonard, Elizabeth A. Loughran, Yuliya Klymenko, Yueying Liu, Oleg Kim, Marwa Asem, Kevin McAbee, Matthew J. Ravosa, M. Sharon Stack	
1. Introduction	80
2. Advanced Imaging for Visualization of Collagen and Other ECM Proteins in Tissues	80

3. Analysis of Cellular Interaction With Collagen-Rich Matrices ..87	87
4. Zymography	91
Acknowledgments	94
References.....	94
CHAPTER 5 Cell-derived decellularized extracellular matrices97	97
Greg M. Harris, Irene Raitman, Jean E. Schwarzbauer	
1. Introduction	98
2. Decellularization of Cell-Derived ECM	100
3. Assessment of Decellularized Matrix.....	103
4. Exploiting a Decellularized Matrix	107
5. Conclusions	109
Acknowledgments	110
References.....	110
CHAPTER 6 Analysis of collagen and elastin cross-links.....115	115
Mitsuo Yamauchi, Yuki Taga, Shunji Hattori, Masashi Shiiba, Masahiko Terajima	
1. Introduction	116
2. Materials.....	119
3. Methods.....	122
4. Notes	126
Acknowledgment	129
References.....	130
CHAPTER 7 Measurement of elastin, collagen, and total protein levels in tissues133	133
Ivan Stoilov, Barry C. Starcher, Robert P. Mecham, Thomas J. Broekelmann	
1. Introduction	134
2. Acid Hydrolysis and Total Protein Measurement.....	134
3. Elastin: Immunoassay for Desmosine	136
4. Collagen: Hydroxyproline Measurement	142
5. Analysis.....	144
Acknowledgments	144
References.....	144
CHAPTER 8 Measurement of lysyl oxidase activity from small tissue samples and cell cultures147	147
Philip C. Trackman, Manish V. Bais	
1. Introduction	148
2. Equipment	150
3. Solutions.....	150

4. Procedures.....	152
References.....	156
CHAPTER 9 Microtiter assays for quantitation of assembly of plasma and cellular fibronectin	157
Bianca R. Tomasini-Johansson, Deane F. Mosher	
1. Background and Rationale for Assays	158
2. Examples of Assays.....	160
3. Method	162
Acknowledgments	168
References.....	168
CHAPTER 10 Basement membrane collagen IV: Isolation of functional domains	171
Sergei P. Boudko, Neonila Danylevych, Billy G. Hudson, Vadim K. Pedchenko	
1. Introduction	172
2. Isolation of 7S and NC1 Domains of Collagen IV From Solid Tissues	174
3. Isolation of 7S and NC1 Domains From ECM Deposited by Cultured Cells	177
4. Isolation of Collagenous Domain by Limited Pepsin Digestion	178
5. Recombinant Expression of Collagen IV Fragments.....	179
6. Dissociation and Assembly of Collagen IV NC1 Hexamers.....	182
7. Conclusion.....	183
Acknowledgments	184
References.....	184
CHAPTER 11 Isolation and analysis of laminins.....	187
Monique Aumailley	
1. Introduction	188
2. Isolation of Laminins.....	191
3. Analysis of Laminins in Tissue and Cells	195
4. Test Cell Adhesion-Promoting Activity of Laminin	200
Acknowledgments	203
References.....	203
Further Reading	205
CHAPTER 12 Elastin purification and solubilization	207
Carmen M. Halabi, Robert P. Mecham	
1. Introduction.....	208
2. Isolation of Cross-Linked, Insoluble Elastin From Tissues.....	210

3. Assessment of Elastin Levels in Tissues.....	213
4. Histological Stains for Elastin in Tissue Sections	215
5. Solubilized Forms of Insoluble Elastin	217
6. Conclusions	219
Acknowledgments	219
References.....	220
CHAPTER 13 Fibrillins	223
Heena Kumra, Dieter P. Reinhardt	
1. Introduction and Rationale	225
2. Isolation of Microfibrils.....	226
3. Recombinant Production of Fibrillins	229
4. Knockdown of Fibrillins in Cell Culture	232
5. Immunoblotting of Fibrillins	235
6. Protein Interaction Assay for Fibrillins.....	235
7. Analysis of Fibrillins and Their Assembly in Cell Culture.....	237
8. Analysis of Fibrillins in Tissue by Immunofluorescence	239
9. Analysis of Fibrillins in Tissue by Immunohistochemistry.....	240
Acknowledgments	243
References.....	244
CHAPTER 14 Expression and purification of recombinant fibulins in mammalian cells.....	247
Katsuhiko Hanada, Takako Sasaki	
1. Introduction.....	248
2. Recombinant Expression of Fibulins	250
3. Purification of Recombinant Fibulins	256
References.....	258
CHAPTER 15 The biochemistry and immunohistochemistry of versican.....	261
Stephen P. Evanko, Christina K. Chan, Pamela Y. Johnson, Charles W. Frevert, Thomas N. Wight	
1. Introduction.....	262
2. Isolation, Purification, and Characterization of Versican From Bovine Aorta	263
3. Isolation of Versican From Cell Cultures	268
4. Characterization of the Versican Preparations by Western Blotting.....	269
5. Localization of Versican in Tissue Using Immunohistochemistry.....	272
6. Quantitation of Versican on Tissue Sections	273
Acknowledgments	276
References.....	276

CHAPTER 16 Isolation, production, and analysis of small leucine-rich proteoglycans in bone	281
David J. Kirby, Marian F. Young	
1. Introduction	282
2. Isolation of Protein From Bone	283
3. Isolation of Proteoglycans From Conditioned Media	289
4. Treatment With Chondroitinase and Assessment of SLRPs	292
5. Summary	294
References	295
Further Reading	296
 CHAPTER 17 Quantification of hyaluronan (HA) using a simplified fluorophore-assisted carbohydrate electrophoresis (FACE) procedure	 297
Ronald J. Midura, Valbona Cali, Mark E. Lauer, Anthony Calabro, Vincent C. Hascall	
1. Introduction	298
2. Principle and Theory	301
3. Equipment	302
4. Materials (High Quality, Reagent Grade)	305
5. Solutions	306
6. AMAC Labeling of HA and CS Disaccharides	308
7. Gel Preparation	311
8. Image Acquisition	313
9. Data Normalization	315
References	315
 CHAPTER 18 Isolation and functional analysis of syndecans	 317
Pyong Woo Park	
1. Introduction	318
2. Isolation of Syndecans	319
3. Functional Analysis	325
Acknowledgments	330
References	330
 CHAPTER 19 Production and purification of recombinant human SPARC	 335
Gail Workman, Amy D. Bradshaw	
1. Introduction	336
2. Method	337
3. Purification of Recombinant SPARC Produced by Insect Cells	339
References	343

CHAPTER 20 Thrombospondins: Purification of human platelet thrombospondin-1	347
John M. Sipes, Joanne E. Murphy-Ullrich, David D. Roberts	
1. Introduction	348
2. Preparation of Thrombospondin-1 From Human Platelets	350
3. Nondenaturing Removal of TGF β	361
References	366
CHAPTER 21 How to detect and purify tenascin-C	371
Sean P. Giblin, Devadarssen Murdamoothoo, Claire Deligne, Anja Schwenzer, Gertraud Orend, Kim S. Midwood	
1. Introduction	372
2. Analysis of Tenascin-C mRNA	373
3. Analysis of Tenascin-C Protein—Western Blotting	380
4. Analysis of Tenascin-C Protein—Tissue Staining	383
5. Analysis of Tenascin-C Protein—ELISA	386
6. Purification of His-Tagged Recombinant Tenascin-C	389
7. Knockdown of Tenascin-C Expression	394
8. Preparation of Cell-Derived Matrix by Fibroblasts Expressing or Lacking TNC	396
9. Summary	398
Acknowledgments	398
References	398
CHAPTER 22 Investigating cell-type specific functions of tenascin-C	401
Devadarssen Murdamoothoo, Anja Schwenzer, Jessica Kant, Tristan Rupp, Anna Marzeda, Kim Midwood, Gertraud Orend	
1. Introduction	402
2. Adhesion Assay	403
3. Analysis of Actin Stress Fibers	405
4. Analysis of Cell Survival	406
5. Analysis of Cell Proliferation	408
6. Analysis of Cell Migration	410
7. Analysis of Endothelial Cell Branching	411
8. Analysis of Pseudotube Formation	412
9. Analysis of Neovascularization	414
10. Analysis of Immune Cell Behavior	420
Acknowledgments	427
References	427

CHAPTER 23 Matrilins	429
Mats Paulsson, Raimund Wagener	
1. Introduction.....	430
2. Methods.....	434
3. Matrilin Antibody Generation	441
4. Conclusions	442
Acknowledgments	442
References.....	442

Michael W. Beitz

Brigham Young University, Provo, Utah
United States

Sergio P. Bruchez

Center for Matrix Biology, University of
United States

Angie B. Bruchez

Center for Matrix Biology, University of
Scholar Department, University of
United States

Thomas J. Bruchez

Washington University, St. Louis, Missouri

Anthony Calafat

Lerner Research Institute, Cleveland, Ohio

Kathleen Call

Lerner Research Institute, Cleveland, Ohio

Christine K. Chan

Matrix Biology Program, University of

Neonils-Davies

Center for Matrix Biology, University of
United States

Chloe Deligne

The Kennedy Institute, London, United Kingdom
United Kingdom

Stephen P. Evans

Matrix Biology Program, University of

Michael S. Fife

University of Kentucky, Lexington, Kentucky
