---------------------	-----------

1. Histone Variants and Disease 1

Delphine Quénet

1. Introduction	2
2. Overview of Nucleosome Structure	2
3. Posttranslational Modifications of Histones	3
4. Histone Variants	8
5. Histone Chaperones	15
6. Histone Variants, Chaperones, and Diseases	19
7. Concluding Remarks	26
Acknowledgments	27
References	27

2. NF- κ B and the Transcriptional Control of Inflammation 41

Jennifer P. Mitchell and Ruaidhrí J. Carmody

1. Introduction	42
2. The Role of NF- κ B in Inflammation	47
3. Posttranslational Modification and the Regulation of NF- κ B Transcriptional Activity	66
4. Concluding Remarks	73
Acknowledgments	73
References	74

3. Alternative Splicing in Genetic Diseases: Improved Diagnosis and Novel Treatment Options 85

Atze J. Bergsma, Erik van der Wal, Mike Broeders, Ans T. van der Ploeg,
and W.W.M. Pim Pijnappel

1. Introduction	87
2. Different Outcomes of Alternative Splicing and Their Impact on Protein Expression	88
3. Mechanisms of Splicing Regulation in Homeostasis and Disease	91
4. Identification of Pathogenic Variants That Affect Splicing	104
5. Therapeutic Approaches to Modulate Splicing	114

6. Future Perspectives	122
Acknowledgments	123
References	124
4. Transcriptional Regulation of Metabolism by SIRT1 and SIRT7	143
Kazuya Yamagata and Tatsuya Yoshizawa	
1. Introduction	143
2. Metabolic Functions of SIRT1 in the Liver	144
3. Metabolic Function of SIRT1 in Adipocytes	147
4. Metabolic Function of SIRT1 in Skeletal Muscle and the Heart	149
5. Metabolic Function of SIRT1 in Pancreatic β -Cells	150
6. Metabolic Function of SIRT1 in the Hypothalamus	151
7. Metabolic Function of SIRT1 in Bone	153
8. Biological Function of SIRT7	153
9. Metabolic Function of SIRT7 in the Liver	155
10. Metabolic Function of SIRT7 in Other Tissues	156
11. Conclusions	157
Acknowledgments	159
References	159
5. Regulation of Gene Transcription Following Stimulation of Transient Receptor Potential (TRP) Channels	167
Gerald Thiel, Andrea Lesch, Sandra Rubil, Tobias M. Backes, and Oliver G. Rössler	
1. Introduction	168
2. TRP Channel Stimulation Activates Stimulus-Responsive Transcription Factors	169
3. Conclusion and Future Prospects	183
Acknowledgment	184
References	184
6. Transcription: Insights From the HIV-1 Promoter	191
Enrico Ne, Robert-Jan Palstra, and Tokameh Mahmoudi	
1. Introduction	192
2. Structure of the HIV-1 Promoter (5'-LTR)	195
3. Chromatin Landscape of the HIV-1 Promoter	202
4. Basal HIV-1 Transcription	210
5. Transcriptional Elongation	214

6. Stochasticity in Transcription	220
7. HIV-1 Transcription Regulation in the Nuclear 3D Environment	223
8. Concluding Remarks	226
Acknowledgments	226
References	227
Further Reading	243
