

CONTENTS

<i>Contributors</i>	ix
<i>Preface</i>	xi
1. Lipid Nanodiscs as a Tool for High-Resolution Structure Determination of Membrane Proteins by Single-Particle Cryo-EM	1
Rouslan G. Efremov, Christos Gatsogiannis, and Stefan Raunser	
1. Introduction	2
2. General Considerations	9
3. Single-Particle Cryo-EM of the Ryanodine Receptor RyR1 Reconstituted Into Lipid Nanodiscs	14
4. EM Analysis of the TcdA1 Pore Complex Embedded in Lipid Nanodiscs	20
5. Conclusions and Perspectives	23
Acknowledgments	24
References	24
2. SSM-Based Electrophysiology for Transporter Research	31
Andre Bazzzone, Maria Barthmes, and Klaus Fendler	
1. Background	32
2. Technical Implications	38
3. Description of the Workflow	53
4. Assay Development	64
5. Data Interpretation and Analysis	73
References	80
3. Saposin-Lipoprotein Scaffolds for Structure Determination of Membrane Transporters	85
Joseph A. Lyons, Andreas Bøggild, Poul Nissen, and Jens Frauenfeld	
1. Introduction	86
2. Membrane Protein Reconstitution	87
3. EM of Salipro Particles	94
4. Summary and Conclusion	97
Acknowledgments	98
References	98

4. Single-Molecule Fluorescence Studies of Membrane Transporters Using Total Internal Reflection Microscopy	101
Joris M.H. Goudsmits, Antoine M. van Oijen, and Dirk J. Slotboom	
1. Introduction	102
2. Preparing Membrane Proteins and Lipid Membranes	105
3. Single-Molecule Fluorescence Microscopy	110
4. Data Analysis	115
Acknowledgments	118
References	118
5. The MEMbrane Protein Single ShoT Amplification Recipe: MemStar	123
Abdul Aziz-Qureshi, Pascal F. Meier, Chiara Lee, and David Drew	
1. Introduction	124
2. Materials	128
3. Procedure	131
4. Summary and Conclusion	136
Acknowledgments	137
References	137
6. Efficient Screening and Optimization of Membrane Protein Production in <i>Escherichia coli</i>	139
Jacopo Marino, Katharina Holzhüter, Benedikt Kuhn, and Eric R. Geertsma	
1. Introduction	140
2. Preparation of Expression Vectors and Cloning	146
3. Analysis of Membrane Protein Production Using GFP	154
4. Summary and Conclusion	159
Acknowledgments	160
References	160
7. Pinning Down the Mechanism of Transport: Probing the Structure and Function of Transporters Using Cysteine Cross-Linking and Site-Specific Labeling	165
Christopher Mulligan and Joseph A. Mindell	
1. Introduction	167
2. The Unique and Useful Chemistry of Cysteine	169
3. The Many Uses of Cysteine	171
4. Cysteine-Reactive Reagents Used for Cross-Linking and Labeling	177

5. Methods of Detecting Cross-Link Formation	181
6. Strategies Used to Decide the Position of Cysteine Residues	190
7. Detailed Protocol for Cross-Linking a Transporter	193
References	196
8. Ion Channel Conformation and Oligomerization Assessment by Site-Directed Spin Labeling and Pulsed-EPR	203
Christos Pilotas	
1. Introduction	204
2. Designing the Pulsed-EPR Experiment	206
3. Sample Preparation for EPR Experiments	214
4. The EPR Methodology Toolbox	221
Acknowledgments	238
References	238
9. Strategy for the Thermostabilization of an Agonist-Bound GPCR Coupled to a G Protein	243
Annette Strege, Byron Carpenter, Patricia C. Edwards, and Christopher G. Tate	
1. Introduction	244
2. A Thermostability Assay for Measuring the Stability of GPCR-G Protein Complexes	246
3. Summary and Conclusion	257
Acknowledgments	262
References	262
