1. Macrophages and Mitochondria: A Critical Interplay Between Metabolism, Signaling, and the Functional Activity	1
J. Tur, T. Vico, J. Lloberas, A. Zorzano, and A. Celada	
1. Introduction	4
2. Mitochondrial Metabolism Governs Macrophage Activation State	5
3. Mitochondrial ROS in Innate Immune Responses	10
4. Mitochondrial-Mediated Antiviral Immunity	14
5. Inflammasome Activation and Mitochondria	23
6. Concluding Remarks	28
Acknowledgments	29
References	29
2. Molecular Mechanisms of Somatic Hypermutation and Class Switch Recombination	37
S.P. Methot and J.M. Di Noia	
1. Antibody Diversification During the Humoral Response	38
2. Molecular Mechanisms of SHM and CSR	39
3. DNA Deamination at the Igs	41
4. AID Initiates a DNA Repair Cascade	57
5. Postdeamination Roles of AID?	69
6. Perspectives	70
Acknowledgments	71
References	71
3. Emerging Major Histocompatibility Complex Class I-Related Functions of NLRC5	89
S.T. Chelbi, A.T. Dang, and G. Guarda	
1. Background	90
2. Lessons From CIITA	91
3. NLRC5 and Its Role in Regulating MHC Class I Levels	96
4. NLRC5 and Its Emerging Roles in Health and Disease	105
5. Concluding Remarks	114
Acknowledgments	114
References	115

v

4. Nucleic Acid Immunity	121
G. Hartmann	
1. Introduction	122
2. Principles of Nucleic Acid Immunity in Different Species	123
3. Historic Overview of Different Fields Merging Into Nucleic Acid Immunity	125
4. Functional Components of Nucleic Acid Immunity	130
5. Innate and Adaptive Components in Nucleic Acid Immunity	133
6. Innate and Adaptive Nucleic Acid Immunity in Prokaryotes	134
7. Receptors and Nucleases Not Involving Classical Immune Functions	134
8. RNA Interference	144
9. Immune-Sensing Receptors	145
10. Conclusions	154
Acknowledgments	155
References	155
5. About Training and Memory: NK-Cell Adaptation to Viral Infections	171
Q. Hammer and C. Romagnani	
1. Introduction	172
2. NK-Cell Adaptations to Viral Infections	175
3. Functional Imprinting of Adaptive NK Cells	182
4. Epigenetic Remodeling as Hallmark of Immune Training and Memory	188
5. Training and Cross-Reactive Memory: Consequences for Heterologous Immunity	191
6. Outlook and Outstanding Questions	198
Acknowledgments	198
References	198
Index	209
Contents of Recent Volumes	217
