1. New Insights Into the Roles of Retinoic Acid Signaling in Nervous System Development and the Establishment of Neurotransmitter Systems	1
E. Zieger and M. Schubert	
1. Introduction	2
2. Developmental Signaling	3
3. Retinoids as Morphogens, Teratogens, and Drugs	4
4. RA Signaling Pathway	5
5. Major Functions of RA Signaling	9
6. RA Signaling During Nervous System Development	12
7. RA Signaling and the Establishment of Neurotransmitter Systems	35
8. RA Signaling Outside Vertebrates: Evolutionary Considerations	49
9. Concluding Remarks	56
Acknowledgments	57
References	57
2. AMBRA1, a Novel BH3-Like Protein: New Insights Into the AMBRA1-BCL2-Family Proteins Relationship	85
A. Di Rita and F. Strappazon	
1. Introduction	87
2. AMBRA1 in Autophagy, Selective Autophagy, and Beyond	88
3. Autophagy and Apoptosis Cross-Talk	95
4. Autophagy Inhibition by the Oncogenic Function of BCL2	101
5. BCL2-AMBRA1 Interaction as a Novel Therapeutic Target	104
6. Conclusion	106
Acknowledgments	107
References	107
3. Rationale for the Combination of Dendritic Cell-Based Vaccination Approaches With Chemotherapy Agents	115
I. Truxova, M. Hensler, P. Skapa, M.J. Halaska, J. Laco, A. Ryska, R. Spisek, and J. Fucikova	
1. Introduction	117

2. Immunological Aspects of Anticancer Chemotherapy With Regards to DC Functions	119
3. Clinical Trials of Combined DC-Based Immunotherapy and Chemotherapy Affecting DC Functions	137
4. Conclusions	147
Acknowledgments	147
References	147
4. Smac Mimetics to Therapeutically Target IAP Proteins in Cancer	157
S. Fulda	
1. Introduction	157
2. IAP Proteins	158
3. Mechanisms of Action of Smac Mimetics	159
4. Smac Mimetics as Single Agents	159
5. Smac Mimetic-Based Combination Therapies	160
6. Conclusions	163
Acknowledgments	164
References	164
5. Consequences of Keratin Phosphorylation for Cytoskeletal Organization and Epithelial Functions	171
M.S. Sawant and R.E. Leube	
1. Introduction	172
2. Characteristics of Keratin Phosphorylation	173
3. Regulation of Protein Binding to Keratins by Phosphorylation	181
4. Role of Keratin Phosphorylation in Cell Physiology	183
5. Disease Relevance of Keratin Phosphorylation	196
6. Concluding Remarks: Significance of Keratin Phosphorylation	210
Acknowledgments	210
References	211
6. Plastid Protein Targeting: Preprotein Recognition and Translocation	227
P. Chotewutmontri, K. Holbrook, and B.D. Bruce	
1. Introduction	228
2. Origin of Plastids	229
3. Plastid Protein Targeting Routes	230
4. Regulation of Plastid Protein Import	261

5. Concluding Remarks	277
Acknowledgments	277
References	277
7. Immunomodulatory Activity of VEGF in Cancer	295
A. Lapeyre-Prost, M. Terme, S. Pernot, A.-L. Pointet, T. Voron, E. Tartour, and J. Taieb	
1. Introduction	296
2. The VEGF Family	297
3. VEGF Receptors	299
4. The VEGF-A/VEGFR Axis	301
5. Antitumor Immunity	302
6. Immunosuppressive Roles of VEGF	309
7. Immunomodulatory Properties of Therapeutics Targeting VEGF	313
8. Medical Applications	320
9. Concluding Remarks	329
Acknowledgments	329
References	329
