Contributors

ix

1. Metabolic Alterations at the Crossroad of Aging and Oncogenesis

1

L. Raffaghello and V. Longo

1. Introduction 2
2. Dysregulation of Metabolism in Cancer and Aging 3
3. Metabolic Interventions With Effects on Aging and Cancer 13
4. Geroscience as a Strategy to Optimize Cancer Therapy 24
5. Conclusions 28
- Acknowledgments 29
- References 29

2. Cellular and Molecular Mechanisms of Autoimmunity and Lupus Nephritis

43

S.K. Devarapu, G. Lorenz, O.P. Kulkarni, H.-J. Anders, and S.R. Muly

1. Introduction 44
2. The Phenomenon of Immune Tolerance 46
3. Factors That Influence the Loss of Immune Tolerance During Autoimmunity 53
4. Factors That Induce Autoimmunity 59
5. Costimulatory and Coinhibitory Pathways in Autoimmunity 84
6. PRRs in Autoimmunity 90
7. Tissue Inflammation and Injury in Autoimmunity 97
8. Genetic Risk Factors for Organ Manifestations in Human Autoimmune Diseases 103
9. Lupus Nephritis 105
10. Summary 114
- Acknowledgments 115
- References 115

3. Old and Novel Functions of Caspase-2

155

M.A. Miles, T. Kitevska-Ilioski, and C.J. Hawkins

1. Introduction 156
2. Biochemical Activity 157

3. Activation	167
4. Caspase-2-Mediated Responses to DNA Damage and Mitotic Stress	170
5. Responses to ER Stress	177
6. Relieving Oxidative Stress	179
7. Metabolism	182
8. Cancer	184
9. Vision	189
10. Neurological Conditions	191
11. Conclusions	195
References	201
4. Metabolic Reprogramming and Oncogenesis: One Hallmark, Many Organelles	213
A.S.H. Costa and C. Frezza	
1. Introduction	214
2. Hallmarks of Metabolic Transformation in Cancer Cells	214
3. Compartmentalization of Metabolism	217
4. Metabolic Cooperation Among Organelles	223
5. Challenges and Future Directions	225
6. Conclusions	226
Acknowledgments	227
References	227
5. Molecular Biology Digest of Cell Mitophagy	233
I. Matic, D. Strobbe, F. Di Guglielmo, and M. Campanella	
1. Mitochondria Cannot Be Mended but Can Be Checked	233
2. Keeping the Engine Clean: Mitophagy	236
3. The Parkin-Dependent Way of Mitophagy	239
4. The Parkin-Independent Way of Mitophagy	247
5. Concluding Remarks	250
Acknowledgments	251
References	251
6. Regulation of Cell Calcium and Role of Plasma Membrane Calcium ATPases	259
T. Calì, M. Brini, and E. Carafoli	
1. Introduction	260
2. PMCA Pump	261

3. Isoforms of PMCA Pump	264
4. Regulation of PMCA Pump	271
5. Role of PMCA Pump in Regulating Cell Ca^{2+}	279
6. PMCA Pumps and Pathology	282
7. Concluding Remarks	286
Acknowledgments	287
References	287
7. Emerging Mechanisms and Roles for Asymmetric Cytokinesis	297
C. Thieleke-Matos, D.S. Osório, A.X. Carvalho, and E. Morais-de-Sá	
1. Introduction	298
2. Primer on Animal Cell Cytokinesis	300
3. Molecular and Cellular Mechanisms Controlling Asymmetric Cytokinesis	310
4. Polarized Cytokinesis: Defining Cellular Identity and Shape	322
5. Concluding Remarks	330
Acknowledgments	331
References	331
