ix

1. The First "Virus Hunters"	1
Thomas C. Mettenleiter	
1. Introduction	2
2. The First "Virus Hunters"	2
3. The Henle–Loeffler–Koch Postulates	5
4. The World's First Virus Research Institute: Greifswald/Insel Riems	6
5. Early Virus Discovery	7
6. The Nature of Viruses	14
Acknowledgments	14
References	15
Further Reading	16
2. Loeffler 4.0: Diagnostic Metagenomics	17
Dirk Höper, Claudia Wylezich, and Martin Beer	
1. Introduction	18
2. Technical Considerations of Diagnostic Metagenomics	19
3. Recent Examples in "Virus Discovery" for Animal Diseases and Zoonoses	27
4. Metagenomics for Food Safety	30
5. Metagenomics for Basic Research in (Veterinary) Virology	31
6. Conclusions and Future Directions	33
References	34
3. Schmallenberg Virus: A Novel Virus of Veterinary Importance	39
Kerstin Wernike and Martin Beer	
1. First Detection of Schmallenberg Virus and Initial Spread	40
2. In Loeffler's Footsteps: From First Detection to the Fulfillment of Koch's Postulates	41
3. Knowledge Gained Since 2011 About the Virus, Its Transmission, and Clinical Manifestations	43
4. Molecular Characterization and Genetic Variability	46
5. Methods Developed for Diagnosis and to Prevent SBV Infection	49
6. Current Situation	51

7. Summary	53
Acknowledgment	53
References	53
4. Assessing the Diversity of Rodent-Borne Viruses: Exploring of High-Throughput Sequencing and Classical Amplification/Sequencing Approaches	61
Stephan Drewes, Petra Straková, Jan F. Drexler, Jens Jacob, and Rainer G. Ulrich	
1. Rodents: Important Reservoirs for Zoonotic Pathogens	63
2. The History of Rodent-Borne Viruses and Their Discovery	69
3. PCR-Mediated Identification of Novel Viruses	73
4. Virus Hunting by Shot-Gun High-Throughput Sequencing	85
5. HTS Application for Diagnostics of Rodent-Borne Viruses	93
6. Workflows for Virus Discovery in Rodent Specimens	94
7. Conclusions	96
Acknowledgments	97
References	97
Further Reading	105
5. The Expanding Field of Mammalian Astroviruses: Opportunities and Challenges in Clinical Virology	109
Céline L. Boujon, Michel C. Koch, and Torsten Seuberlich	
1. Introduction	110
2. Taxonomy of <i>Astroviridae</i>	111
3. Molecular Biology of Astroviruses	111
4. Tools for Astrovirus Detection and Research	113
5. Astrovirus Discoveries in the Pre-genomics Era	115
6. Novel Astroviruses in Humans	117
7. Astrovirus Discoveries in Mammalian Animals	117
8. Association With Disease	121
9. Astroviruses in Neurological Diseases	122
10. Astrovirus Infection in Nonenteric and Nonnervous Tissues	124
11. Astroviruses and Causality of Disease	124
12. Host Specificity, Intraspecies Transmission, and Evolutionary Dynamics	127
13. Conclusions and Perspectives	129
Acknowledgments	129
References	129

6. New Leaves in the Growing Tree of Pestiviruses	139
Sandra Blome, Martin Beer, and Kerstin Wernike	
1. Introduction	140
2. Classical Pestiviruses in New Species	142
3. Atypical Pestiviruses	143
4. Conclusions and Implications	154
References	154
7. Bluetongue Virus: From BTV-1 to BTV-27	161
Guillaume Belbis, Stéphan Zientara, Emmanuel Bréard, Corinne Sailleau, Grégory Caignard, Damien Vitour, and Houssam Attoui	
1. Introduction	162
2. The Bluetongue Virus	163
3. BTV Pathogenesis	164
4. Epidemiological Situation	169
5. NGS Dramatically Improved Feasibility of BTV Genome Characterization	173
6. Conclusions	184
References	186
8. The Recently Discovered Bokeloh Bat Lyssavirus: Insights Into Its Genetic Heterogeneity and Spatial Distribution in Europe and the Population Genetics of Its Primary Host	199
Elisa Eggerbauer, Cécile Troupin, Karsten Passior, Florian Pfaff, Dirk Höper, Antonie Neubauer-Juric, Stephanie Haberl, Christiane Bouchier, Thomas C. Mettenleiter, Hervé Bourhy, Thomas Müller, Laurent Dacheux, and Conrad M. Freuling	
1. Introduction	200
2. BBLV: A Novel Bat Lyssavirus Isolated First in Germany	205
3. Further Investigation in the Presence of BBLV in Bats in Germany and in France	209
4. Discussion	216
Acknowledgments	223
References	224
9. Software Dedicated to Virus Sequence Analysis "Bioinformatics Goes Viral"	233
Martin Hölzer and Manja Marz	
1. Next-Generation Sequencing	235
2. Detection of De Novo Viruses	238

3. Viral Quasispecies	239
4. Secondary Structures of RNA Viruses	242
5. Analysis of Transcriptomic Host Reactions to Viral Infections	244
6. Viral Phylogeny/Cophylogeny	249
7. Conclusions and Future Perspectives	251
References	251
