List of Contributors	xiii
Biographies	xv
Introduction.....	xvii
CHAPTER 1 Sirtuins, NAD⁺, Aging, and Disease: A Retrospective and Prospective Overview	1
<i>Leonard Guarente</i>	
Acknowledgments	6
Further Reading	6
CHAPTER 2 Regulation of Sirtuins by Systemic NAD⁺ Biosynthesis	7
<i>Mitsukuni Yoshida and Shin-ichiro Imai</i>	
2.1 Introduction	7
2.2 NAD ⁺ Biosynthesis, Consumption, and Degradation.....	8
2.3 The Role of NAD ⁺ Biosynthesis and Sirtuins in Tissue Homeostasis and Disease Conditions	11
2.3.1 Liver	11
2.3.2 Skeletal muscle	12
2.3.3 Adipose tissue	12
2.3.4 Pancreatic β cells	13
2.3.5 Hypothalamus.....	13
2.3.6 Hippocampus.....	15
2.3.7 Sensory neurons	15
2.3.8 Cardiovascular system	16
2.3.9 Intestine	16
2.4 The Concept of the NAD World: The NAMPT/NAD ⁺ /SIRT1-Mediated Systemic Regulatory Network for Aging and Longevity Control in Mammals.....	17
2.5 Concluding Remarks	18
Acknowledgments	19
References.....	19
CHAPTER 3 NAD⁺ Modulation: Biology and Therapy.....	27
<i>Elena Katsyuba and Johan Auwerx</i>	
3.1 A Bit of History	27
3.2 How NAD ⁺ Is Produced.....	27
3.3 NAM, NA, NR, or Tryptophan?.....	29
3.4 Compartmentalization of NAD ⁺ Homeostasis Within the Cell	30

3.5	NAD ⁺ as a Regulator of Sirtuin Activity.....	31
3.6	NAD ⁺ Besides Sirtuins.....	34
3.7	NAD ⁺ Boosting Strategies	35
3.8	Therapeutic Potential of NAD ⁺ Boosting	36
3.9	Conclusion	37
	References.....	37
CHAPTER 4	The Enzymatic Activities of Sirtuins	45
	<i>Hening Lin</i>	
4.1	Desuccinylation, Demalonylation, and Deglutarylation Catalyzed by SIRT5	47
4.2	Hydrolysis of Long-Chain Fatty Acyl Groups (Defatty-Acylation) by Several Sirtuins	49
4.3	The Various Deacylation Activities Reported for SIRT4.....	50
4.4	The ADP-Ribosyltransferase Activity of Sirtuins.....	51
4.5	Special Consideration for Sirtuins That Can Recognize Structurally Very Different Acyl Groups	52
4.6	Factors That Affect Sirtuin Substrate Specificity.....	53
4.7	Summary and Concluding Remarks	55
	Acknowledgments	55
	References.....	55
CHAPTER 5	Structural and Mechanistic Insights in Sirtuin Catalysis and Pharmacological Modulation	63
	<i>Sébastien Moniot, Weijie You and Clemens Steegborn</i>	
5.1	Sirtuin Function, Structure, and Catalytic Mechanism	63
5.2	Sirtuin Inhibitors	64
5.3	Sirtuin Activators	66
5.4	Outlook	69
	References.....	69
CHAPTER 6	Pharmacological Approaches for Modulating Sirtuins	71
	<i>Alice E. Kane and David A. Sinclair</i>	
6.1	Introduction	71
6.2	Allosteric Activators of Sirtuins	71
6.3	Pharmacological Modulation of NAD ⁺	74
6.4	Beneficial Health Effects of STACs.....	75
6.5	Beneficial Health Effects of NBMs.....	75
6.6	Conclusions	78
	References.....	78

CHAPTER 7	Reactive Acyl-CoA Species and Deacylation by the Mitochondrial Sirtuins	83
	<i>Kathleen A. Hershberger and Matthew D. Hirschey</i>	
7.1	Introduction	83
7.2	Enzymatic Activity of the Mitochondrial Sirtuins	83
7.3	Proteomic Characterization of Acyl-Lysine Modifications	85
7.4	The Roles of Mitochondrial Sirtuins Under Basal Conditions	86
7.5	Physiological Roles of Mitochondrial Sirtuins in the Heart	86
7.6	Reactive Acyl-CoA Species and Carbon Stress	88
7.7	RACS, Metabolism, and Heart Failure	88
7.8	Conclusions	89
	Acknowledgments	91
	References	91
CHAPTER 8	Mitochondrial Sirtuins: Coordinating Stress Responses Through Regulation of Mitochondrial Enzyme Networks	95
	<i>Wen Yang, Robert A.H. van de Ven and Marcia C. Haigis</i>	
8.1	Introduction	95
8.2	SIRT3	96
8.2.1	SIRT3 substrates and pathways	96
8.2.2	Regulation of SIRT3	99
8.2.3	SIRT3-related diseases	100
8.3	SIRT4	104
8.3.1	SIRT4 substrates and pathways	104
8.3.2	Regulation of SIRT4	105
8.3.3	SIRT4-related diseases	106
8.4	SIRT5	106
8.4.1	Substrates of SIRT5	106
8.4.2	Regulation of SIRT5	107
8.4.3	SIRT5-related diseases	107
8.5	Concluding Remarks	108
	References	108
CHAPTER 9	Multitasking Roles of the Mammalian Deacetylase SIRT6	117
	<i>Sylvana Hassanieh and Raul Mostoslavsky</i>	
9.1	Introduction	117
9.2	SIRT6 Structure, Enzymatic Activity, and Regulation	117
9.3	SIRT6 Functions in Genomic Stability and DNA Repair	120
9.3.1	Telomere and centromere maintenance	120
9.4	Base Excision Repair	121
9.5	Double-Strand Breaks Repair	121

9.6	Metabolic Functions of SIRT6	122
9.6.1	Glucose metabolism	122
9.7	Lipid Metabolism	123
9.8	Cancer	124
9.9	Inflammation	126
9.10	Cardiovascular Diseases	126
9.11	Lifespan	127
	References	127
CHAPTER 10 Chromatin and Nuclear Signaling: SIRT7 Function in the Nucleolus and Beyond		131
	<i>Maria Angulo-Ibanez and Katrin F. Chua</i>	
10.1	Catalytic Activities of SIRT7: Structure, Enzymatic Modulation, and Substrates	131
10.2	SIRT7 Dynamics in the Cell: At Nucleoli and Beyond	134
10.2.1	Stress-dependent partitioning of nucleolar and nuclear functions by SIRT7	135
10.2.2	SIRT7 signaling from the nucleus: to mitochondria and beyond	136
10.3	SIRT7 Function in Aging and Disease	136
10.3.1	Aging-like phenotypes of SIRT7-deficient mice	136
10.3.2	SIRT7 regulation of metabolic disease	137
10.3.3	SIRT7 in cancer: epigenetic and energetic homeostasis	137
10.4	Concluding Remarks and Future Perspectives	138
	References	139
CHAPTER 11 Mammalian Sirtuins, Cellular Energy Regulation, and Metabolism, and Carcinogenesis		141
	<i>Athanassios Vassilopoulos, Rui-Hong Wang and David Gius</i>	
11.1	Introduction	141
11.1.1	Sirtuins in aging, cellular metabolism, and metabolic reprogramming	141
11.1.2	Sirtuins can function as metabolism-fidelity or tumor-suppressor proteins	142
11.1.3	Mitochondrial sirtuins and carcinogenesis	143
11.1.4	Nonmitochondrial sirtuins and carcinogenesis	145
11.2	Conclusions	147
	References	148
CHAPTER 12 Roles for Sirtuins in Cardiovascular Biology		155
	<i>Adam B. Stein, William Giblin, Angela H. Guo and David B. Lombard</i>	
12.1	Introduction	155
12.2	SIRT1	156

12.3	SIRT2	161
12.4	SIRT3	161
12.5	SIRT4	163
12.6	SIRT5	164
12.7	SIRT6	164
12.8	SIRT7	165
12.9	Summary	165
	Acknowledgments	167
	References	167
CHAPTER 13	Sirtuins in Brain and Neurodegenerative Disease	175
	<i>Éva M. Szegő, Tiago F. Outeiro and Aleksey G. Kazantsev</i>	
13.1	Introduction	175
13.2	Sirtuin Isoforms and Expression in the Brain	175
13.3	Cellular Pathways and Functions Regulated by Sirtuins	177
13.3.1	SIRT1	177
13.3.2	SIRT2	179
13.3.3	SIRT3	179
13.3.4	SIRT4	180
13.3.5	SIRT5	180
13.3.6	SIRT6	180
13.3.7	SIRT7	181
13.4	Sirtuins and NAD ⁺ Homeostasis	181
13.5	Sirtuin Functions in the Brain	182
13.6	Sirtuins and Neurodegenerative Disease	183
13.7	Sirtuins and Alzheimer's Disease	184
13.8	Sirtuins and Parkinson's Disease	185
13.9	Sirtuins and Huntington's Disease	185
13.10	Sirtuins and Amyotrophic Lateral Sclerosis	186
13.11	Drug Discovery and Development of Sirtuin Modulators	186
13.12	Future Perspectives	187
	Acknowledgments	187
	References	188
	Index	197
