Contributors	vii
Preface	ix
CHAPTER 1 Bioinformatics in Microbiome Analysis	1
Yuhan Hao, Zhiheng Pei, Stuart M. Brown	
1. Introduction	1
2. Bioinformatic Applications for the Analysis of Single Pathogens	2
3. Bioinformatic Applications for the Analysis of Microbial Communities	4
3.1. 16S rRNA-Based Approach and Taxonomic Diversity	4
3.2. Metagenomic Shotgun Sequencing Approach	7
4. Statistics, Machine Learning and Network Analysis	9
5. Sequencing Platforms	10
6. Future Prospective	11
Acknowledgements	12
References	12
Further Reading	18
CHAPTER 2 A Review of the Oesophageal Microbiome in Health and Disease	19
Dervla Kelly, Liying Yang, Zhiheng Pei	
1. Introduction	19
1.1. Oesophageal Microbiome Composition	20
1.2. Oesophageal Microbiome Variation Between Individuals	21
2. Functions of the Oesophageal Microbiome	21
2.1. Barrier Functions of the Microbiome	22
2.2. Metabolic Functions of the Microbiome	22
2.3. Immunomodulation by the Microbiome	22
2.4. Effects of Gut Microbiome on Host Beyond the Intestinal Tract	23
3. Oesophageal Microbiome and Disease	23
3.1. Oesophageal Microbiome and Reflux Disease and Barrett's Oesophagus	23
3.2. Oesophageal Microbiome and Cancer	25

4. Future Directions	28
4.1. Study Design.....	28
4.2. "Omics" Technologies.....	28
4.3. Metagenomics.....	28
4.4. Metatranscriptomics.....	28
4.5. Metaproteomics and Metabolomics	29
Conclusion	29
Acknowledgements.....	30
References.....	30

CHAPTER 3 The Application of Molecular Methods Towards an Understanding of the Role of the Vaginal Microbiome in Health and Disease

Joanna-Lynn C. Borgogna, Carl J. Yeoman

1. Introduction	37
2. <i>Lactobacillus</i> -Mediated Protection.....	39
2.1. <i>Lactobacillus</i> spp. of the Vaginal Microbiome	39
3. The Vaginal Microbiome.....	48
3.1. Community State Types	48
3.2. CST-I: <i>L. crispatus</i> -Dominated Microbiota	48
3.3. CST-III: <i>L. iners</i> -Dominated Microbiota	51
3.4. CST-II: <i>L. gasseri</i> - and CST-V: <i>L. jensenii</i> -Dominated Microbiota.....	54
3.5. CST-IV: <i>Lactobacillus</i> -Depauperate Microbiomes	55
4. Modulators of the Vaginal Microbiome.....	57
4.1. Age and Physiology.....	57
4.2. Menses	60
4.3. Pregnancy.....	61
4.4. Host Behaviours.....	63
4.5. Sexual Activity	64
5. Vaginal Dysbiosis and Morbidity.....	65
Summary and Conclusions.....	66
References.....	67
Further Reading	91
