Section A

Polyphenols in Agriculture, Plant Growth Economics and Delivery

1. Not Only What Is Food Is Good—Polyphenols From Edible and Nonedible Vegetable Waste

Laura Siracusa and Giuseppe Ruberto

1 Introduction

- 1.1 Why to Re-evaluate: The Importance of Vegetable Wastes in the Circular Economy Era
- 1.2 The Tight Biochemical Connection Between Vegetables and Their Byproducts

2 Behind a Common Meal: Polyphenols in Food Byproducts

- 2.1 Introducing the Concept of This Section
- 2.2 First Course: Pasta With Tomato Sauce (Polyphenols in Wheat Bran and Tomato Byproducts)
- 2.3 A Fresh Side Dish: Mixed Salad (Polyphenols From Fennel, Carrot, Lettuce Leaves, Artichoke, Lemon Juice, and Olive Oil Byproducts)
- 2.4 Fruits (Polyphenols From Apple, Pomegranate, Banana, and Berry Byproducts)

3 Something to Drink: Polyphenols in Most Common Beverage Byproducts

- 3.1 Orange Juice (Polyphenols From Orange Byproducts)
- 3.2 Wine (Polyphenols From Grape and Wine Byproducts)

xi

xvii

4 Other Off-the-Menu Miscellaneous	16
5 Conclusive Remarks	16
Acknowledgments	17
References	17
Further Reading	21

2. Polyphenols in Agricultural Byproducts and Food Waste

Ioannis Mourtzinis and Athanasia Goula

1 Introduction

2 Byproducts Rich in Phenolic Compounds

- 2.1 Coffee Byproducts
- 2.2 Grape and Wine Byproducts
- 2.3 Citrus Byproducts
- 2.4 Apple Byproducts
- 2.5 Pomegranate Byproducts
- 2.6 Olive Byproducts
- 2.7 Onion Byproducts
- 2.8 Other Plant Byproducts

3 Methods for Recovery of Polyphenolic Compounds From Byproducts

- 3.1 Drying Methods
- 3.2 Polyphenol Extraction
- 3.3 Ultrasound-Assisted Extraction
- 3.4 Microwave-Assisted Extraction (MAE)
- 3.5 Supercritical Fluid Extraction
- 3.6 Pressurized Liquid Extraction
- 3.7 Adsorptive Extraction
- 3.8 Molecularly Imprinted Polymers (MIP)
- 3.9 Extraction Assisted With Cyclodextrins as a Cosolvent

4 Stabilization of Phenolic Extracts

- 4.1 Methods of Phenolic Extracts Stabilization by Encapsulation

5 Addition of Phenolic Extracts in Foods

- 6 Conclusions
- References

13

3. Phenolic Natural Compounds and Their Influence on Physiological Processes in Plants

45

Corneliu Tanase, Oana-Crina Bujor and Valentin I. Popa

1 Introduction	45
2 Natural Sources of Phenolic Compounds	46
3 Influence of Some Phenolic Natural Products on Plant's Development	46
3.1 The Effect of Phenolic Compounds on Seed Germination Process	46
3.2 The Influence of Phenolic Compounds on Growth and Development Process on Plants	50
3.3 The Influence of the Phenolic Compounds on the Cell Division Process	51
3.4 The Influence of Phenol Compounds on Photosynthetic Activity	53
4 Conclusions	55
References	56

4. Improving Bioavailability of Polyphenols Using Nanodelivery Systems Based on Food Polymers

59

A. Aguirre and R. Borneo

1 Introduction	59
2 Health Benefits of Polyphenols Phytochemicals	59
3 Nanoparticles	61
3.1 Nanoparticles Can Be Used to Enhance the Bioavailability of Polyphenols	61
4 Food Derived Polymers for Polyphenol Nanodelivery Systems	62
4.1 Polysaccharide-Based Systems	62
4.2 Protein-Based Systems	62
5 Final Remarks	62
References	63

5. Polyphenols Resources in Indonesia From Economic Perspective

67

Suminar Setiati Achmadi

1 Introduction	67
2 Tannins From Mangrove Forest	67
2.1 Use	67
2.2 Resources	68
2.3 Advancement in Science and Technology	68
2.4 Implication	68
3 Cocoa	68
3.1 Use	68
3.2 Resources	69

3.3 Advancement in Science and Technology	69
3.4 Prospects	70

4 Tea

70

4.1 Use	70
4.2 Resources	70
4.3 Advancement of Science and Technology	71
4.4 Prospect	72

5 Coffee

72

5.1 Use	72
5.2 Production	73
5.3 Prospect	74

6 Gambier

74

6.1 Use	74
6.2 Resources	75
6.3 Advancement of Science and Technology	75
6.4 Prospects	75

7 Mangosteen

75

7.1 Use	75
7.2 Resource	76
7.3 Advancement of Science and Technology	76
7.4 Prospects	77

8 Conclusion

77

Section B

Isolation and Analysis of Polyphenol Structure

6. Structure and Antioxidant Efficiency of Beech (*Fagus sylvatica* L.) Bark Polyphenols Unraveled by High-Performance Liquid Chromatography/Photodiode Array Detection/Multistage Electrospray Mass Spectrometry and Chemometrics

83

Tamás Hofmann

1 Introduction	83
2 Sample Preparation and Extraction	84
3 Determination of Antioxidant Capacities	84
4 The HPLC-PDA-ESI-MS/MS Identification of Beech (<i>Fagus sylvatica</i> L.) Bark Polyphenols	86
5 Mass Spectrometric Evaluation of Relative Quantities of the Compounds by MRM Peak Areas	93
6 Study of the Antioxidant Efficiency of Compounds Using Chemometrics	95
6.1 Correlation Analysis	95
6.2 Factor Analysis	101
6.3 Cluster Analysis	104
6.4 Combined Evaluation of Chemometric Analysis	105

7 Conclusions	107	7.3 Superheated Liquid Extraction	145
Acknowledgments	107	7.4 Supercritical Fluid Extraction	145
References	107	7.5 Comparison of the Effect of Auxiliary Energies on the Extraction of Flavonoids From Citrus	145
7. Characterization and Quantification of Polyphenols in Fruits	111	8 Identification and Quantitation of Citrus Flavonoids	147
<i>Fabian Weber and Maike Passon</i>		9 Foreseeable Applications of Citrus Flavonoids	147
1 Introduction	111	References	148
2 Sample Preparation	112	10. Extraction Methods of Polyphenol From Grapes: Extractions of Grape Polyphenols	151
3 Analytical Methods	113	<i>Ivana Tomaz, Nera Huzanić, Darko Preiner, Domagoj Stupić, Željko Andabaka, Edi Maletić, Jasminka Karoglan Kontić and Danijela Ašperger</i>	
3.1 Sum Parameters	113	1 Introduction	152
3.2 Chromatographic Techniques	114	2 Sampling	153
3.3 Chemometric Methods	116	3 Sample Preparation	153
4 Preparative Methods	117	3.1 Sample Storage	154
References	117	3.2 Thawing	154
8. Phenotypic Diversity of Colored Phytochemicals in Sorghum Accessions With Various Pericarp Pigments	123	3.3 Drying	154
<i>Haley Davis, Xiaoyu Su, Yanting Shen, Jingwen Xu, Donghai Wang, J. Scott Smith, Fadi Aramouni and Weiqun Wang</i>		4 Extraction Techniques	154
1 Introduction	123	4.1 Solid-Liquid Extraction	155
2 Pericarp Pigments	124	4.2 Ultrasound-Assisted Extraction	155
3 Phytochemicals	125	4.3 Microwave-Assisted Extraction	159
4 Anthocyanins	125	4.4 Enzyme-Assisted Extraction	161
5 Carotenoids	126	4.5 Matrix Solid Phase Dispersion	161
6 Health Benefits of Colored Phytochemicals	127	4.6 Other Extraction Techniques	161
7 Discussion	129	5 Conclusion	164
8 Conclusion	130	References	164
Acknowledgments	130	11. Total Polyphenols Content and Antioxidant DPPH Assays on Biological Samples	169
References	130	<i>Veronica Sanda Chedea and Raluca Maria Pop</i>	
9. Relevance and Analysis of Citrus Flavonoids	133	1 Introduction	169
<i>Carlos A. Ledesma-Escobar, Feliciano Priego-Capote and María D. Luque de Castro</i>		2 The Folin-Ciocalteu Method or the Assessment of Total Polyphenols Content	170
1 Generalities	134	2.1 In Human Plasma	170
2 Natural Occurrence of Citrus Flavonoids	134	2.2 In Human Urine	170
3 Analysis of Flavonoids	136	2.3 In Cow's Plasma and Milk	176
4 Sampling Methodology	136	3 DPPH Test	176
5 Sample Pretreatment	137	3.1 In Plasma: Human and Horse	176
6 Experimental Designs Used in Citrus Studies	142	3.2 In Infant Urine	177
7 Extraction Methods: Effect of the Auxiliary Energies	143	4 Total Polyphenols and Antioxidant Activity Relationship	180
7.1 Ultrasound-Assisted Extraction	144	5 Conclusions	180
7.2 Microwave-Assisted Extraction	144	References	181

12. Extraction of Phenolic Compounds From *Coriandrum sativum* L. and *Amaranthus hybridus* L. by Microwave Technology

185

Diana B. Muñiz-Márquez, Jorge E. Wong-Paz, Juan C. Contreras-Esquivel, Raúl Rodríguez-Herrera and Cristóbal N. Aguilar

1 Introduction	185
2 Material and Methods	186
2.1 Plant Material Preparation	186
2.2 Reagents	186
2.3 Extraction Procedure	186
2.4 Phenolic Compound Determination	186
2.5 DPPH (1,1-Diphenyl-2-Picrylhydrazyl) Radical-Scavenging Assay	186
2.6 HPLC Analysis	187
2.7 Statistical Analysis	187
3 Results and Discussion	187
3.1 Effects of Extraction Conditions Based on Phenolic Compounds	187
3.2 Antioxidant Activity	188
3.3 HPLC Analysis	189
4 Conclusions	189
Acknowledgments	190
References	190

13. Anthocyanins and Other Polyphenols in *Citrus* Genus: Biosynthesis, Chemical Profile, and Biological Activity

191

Gabriele Ballistreri, Simona Fabroni, Flora Valeria Romeo, Nicolina Timpanaro, Margherita Amenta and Paolo Rapisarda

1 Introduction	191
2 Anthocyanin Compounds	192
2.1 Phenolic Compounds	192
3 Biosynthesis of Anthocyanins and Phenolic Compounds	194
4 Anthocyanins in <i>Citrus</i> Species	197
4.1 Phenolic Compounds in <i>Citrus</i> Species	198
4.2 Oranges	202
4.3 Mandarins and Their Hybrids	204
4.4 Lemon	209
4.5 Limes	209
4.6 Grapefruit	209
4.7 Pummelo	209
4.8 Citron	209
4.9 Bergamot and Chinotto	210
5 Biological Activity of <i>Citrus</i> Flavonoids and Other Phenolic Compounds	210
6 Conclusion	212
References	212

14. Rice Phenolics: Extraction, Characterization, and Utilization in Foods

217

Nopparat Cheetangdee

1 Introduction	217
1.1 Phenolics	218
1.2 Flavonoids	218
1.3 Anthocyanins and Proanthocyanidins	218
1.4 Tocopherols and Tocotrienols	218
1.5 Steryl Ferulate (γ -Oryzanol)	218
1.6 Phosphorus Compounds	219
2 Extraction of Phenolic Compounds From Rice	219
2.1 Solvent Extraction	219
2.2 Enzyme-Aided Extraction	221
2.3 Ultrasonic-Aided Extraction (UAE)	222
2.4 Microwave-Assisted Extraction (MAE)	222
2.5 Subcritical Water Extraction (SWE)	223
2.6 Pressurized Liquid Extraction	223
3 Characterization of Phenolics in Rice	223
3.1 Intrinsic Factors	224
3.2 Extrinsic Factors	226
4 Utilization of Rice Phenolics in foods	231
4.1 Meat Products	232
4.2 Fermented Foods	233
4.3 Lipid-Based Foods	233
4.4 Carbohydrate-Based Foods	234
4.5 Fruits and Vegetables	236
5 Conclusions	236
References	237

15. Extraction of Polyphenols From Aromatic and Medicinal Plants: An Overview of the Methods and the Effect of Extraction Parameters

243

Antigoni Oreopoulou, Dimitrios Tsimogiannis and Vassiliki Oreopoulou

1 Introduction	243
2 An Overview of Extraction Techniques	243
2.1 Conventional Extraction Methods	243
2.2 Novel Extraction Methods	245
3 Effect of Extraction Parameters	250
3.1 Extraction Solvent	250
3.2 pH	252
3.3 Temperature	253
3.4 Extraction Time	253
3.5 Solvent-to-Solid Ratio	254
3.6 Factors Related to the Raw Material	254
References	255
Further Reading	259

Section C

Analysis Techniques for Polyphenols

16. Classification of Phenolic Compounds in Plants 263

Dimitrios Tsimogiannis and Vassiliki Oreopoulou

- 1 Introduction 263
- 2 C₆ Phenolic Compounds 263
- 3 C₆-C_n (1 ≤ n ≤ 4) Phenolic Compounds 264
- 4 C₆-C_n-C₆ (1 ≤ n ≤ 3, or n = 7) Phenolic Compounds 266
 - 4.1 Xanthonoids, Stilbenoids, Anthraquinones, Anthrones, and Diaryl Heptanoids 266
 - 4.2 C₆-C₃-C₆ Phenolics: Flavonoids 267
- 5 Phenolic Dimers and Condensation Oligomeric Products 274
- 6 Polymeric Phenols (C₆)_n, (C₆-C₃)_n, and (C₆-C₃-C₆)_n (n > 12) 277
- 7 Hybrid Phenolics 278
- References 281

17. Gas Chromatography: Mass Spectrometry Analysis of Polyphenols in Foods 285

Pilar Viñas and Natalia Campillo

- 1 Polyphenolic Compounds 285
- 2 Polyphenolic Compounds in Foods 286
- 3 Methods for Determining Polyphenols 287
- 4 Determination of Polyphenols by Gas Chromatography-Mass Spectrometry (GC-MS). Derivatization Reactions 288
- 5 Sample Preparation Techniques 303
- 6 Miniaturized Techniques for Sample Preparation In GC-MS 306
- References 309

18. Reaction of Hemoglobin With the Schiff Base Intermediate of the Glucose/Asparagine Reaction: Formation of a Hemichrome 317

Aristodimos Ioannou and Constantinos Varotsis

- 1 Introduction 317
- 2 Materials and Methods 318
 - 2.1 Chemicals 318
 - 2.2 Sample Preparation 318
 - 2.3 Experimental Setup 319
- 3 Results and Discussion 320
 - 3.1 HPLC 320
 - 3.2 ATR-FTIR Spectra 321

3.3 HPLC-FTIR Coupling 322

3.4 Hemoglobin With Added Schiff Base LC Fraction 323

4 Conclusions 324

References 324

19. Adsorption and Ion Exchange for the Recovery and Fractionation of Polyphenols: Principles and Applications 327

Dietmar Rolf Kammerer, Judith Kammerer and Reinhold Carle

- 1 Adsorption and Ion Exchange Technology: Historic Overview of Its Application Potential 327
- 2 Adsorbent and Ion Exchange Materials 327
- 3 Principles of Adsorption and Ion Exchange 329
- 4 Kinetics and Equilibria of Sorption and Ion Exchange Processes 329
- 5 Practical Implementation of Sorption and Ion Exchange Processes 330
- 6 Application of Adsorption and Ion Exchange Technology 330
- 7 Application of Adsorbent Resins and Ion Exchangers for the Recovery of Bio- and Technofunctional Phenolic Compounds from Byproducts of Food Processing 332
- References 336

20. HILIC Chromatography: Powerful Technique in the Analysis of Polyphenols 341

Aleksandra Sentkowska and Krystyna Pyrzynska

- 1 Introduction 341
 - 1.1 Stationary Phases 341
 - 1.2 Mobile Phases 342
 - 1.3 Detection 347
 - 1.4 Practical Applications of HILIC Mode 347
- 2 Conclusions 349
- References 349

21. Chromatographic Analysis of Polyphenols 353

Krystyna Pyrzynska and Aleksandra Sentkowska

- 1 Introduction 353
- 2 Sample Preparation 353
- 3 Chromatographic Analysis 355
 - 3.1 Detectors 355
 - 3.2 Columns 356

4 Hydrophilic Interaction Chromatography	358	References	391
5 Multidimensional Chromatography	359	Further Reading	394
6 HPLC With Online Antioxidant Activity Assays	360	24. The Phenolic Gingerols and Gingerol-Derived Shogaols: Features and Properties Related to the Prevention and Treatment of Cancer and Chronic Inflammation	395
7 Conclusions	361	<i>Chao-Yu Loung, Andrea N. Rasmussen and David W. Hoskin</i>	
References	361	1 Introduction	395
22. Sweet Potato Leaf Polyphenols: Preparation, Individual Phenolic Compound Composition and Antioxidant Activity	365	2 Toxicity	396
<i>Tai-Hua Mu and Hong-Nan Sun</i>		3 Pharmacokinetics	396
1 Overview of Polyphenols in Sweet Potato Leaves	365	4 Effects on Other Drugs	397
1.1 Sweet Potato Leaves	365	5 Chemoprevention	397
1.2 Polyphenols in Sweet Potato Leaves	365	6 Antiproliferative and Cytotoxic Effects on Cancer Cells	398
2 Extraction and Purification of Polyphenols From Sweet Potato Leaves	366	7 Effects on Cancer Metastasis	399
2.1 Polyphenol Extraction Methods	366	8 Antiinflammatory and Immune-modulating Effects	400
2.2 Polyphenol Purification Methods	367	9 Conclusions	402
2.3 Extraction and Purification of Polyphenols From Sweet Potato Leaves	368	References	402
3 Individual Phenolic Compound Composition and Antioxidant Activity of Sweet Potato Leaf Polyphenols	374	25. Polyphenols Present in <i>Campomanesia</i> Genus: Pharmacological and Nutraceutical Approach	407
3.1 Individual Phenolic Compound Composition of Sweet Potato Leaf Polyphenols	374	<i>Caroline Honaiser Lescano, Fernando Freitas de Lima, Anderson Rodrigues Lima Caires and Ivan Pires de Oliveira</i>	
3.2 Antioxidant Activity of Sweet Potato Leaf Polyphenols	375	1 Introduction	408
4 Conclusion and Prospect	378	2 Bioactivities of <i>Campomanesia</i> Genus	409
References	378	2.1 Antioxidant Activity	411
23. Evaluation of the Phytochemistry and Biological Activity of Grape (<i>Vitis vinifera</i> L.) Stems: Toward a Sustainable Winery Industry	381	2.2 Antiinflammatory	412
<i>Irene Gouvêas, Marcelo Queiroz, Miguel Rodrigues and Ana I.R.N.A. Barros</i>		2.3 Gastroprotective Potential	412
1 Introduction	381	2.4 Cardiovascular Protective	413
1.1 State of the Art	381	2.5 Antimicrobial, Antiproliferative, and Apoptotic Activities	413
1.2 Phytochemical Composition of Grape Stems	382	2.6 Antidiabetic	414
1.3 Biological Activity of Grape Stem Phenolic Compounds	385	3 Nutraceutical and Pharmacological Perspectives of Polyphenols	414
1.4 Industrial Applications: Challenges for the Winery Sector	388	3.1 Quercetin	414
1.5 The Utilization of Winery Byproducts as Animal Feed	390	3.2 Ellagic Acid	414
2 Conclusions	391	3.3 Rutin	415
Acknowledgments	391	3.4 Catechin and Epigallocatechin	415
		3.5 Myricetin and Myricitrin	415
		3.6 Gallic Acid	416
		3.7 Kaempferol	416
		4 Conclusion	416
		References	417
		Index	421
