Preface

xv

1. Selective Methyl Labeling of Proteins: Enabling Structural and Mechanistic Studies As Well As Drug Discovery Applications by Solution-State NMR

1

Andrew Proudfoot, Andreas O. Frank, Alexandra Frommlet, and Andreas Lingel

- 1. Introduction to Selective Labeling 2
- 2. Labeling Schemes 6
- 3. Experimental Section 11
- 4. Applications 17
- 5. Conclusion 31
- Acknowledgments 32
- References 32

2. Isotopic Labeling of Eukaryotic Membrane Proteins for NMR Studies of Interactions and Dynamics

37

Igor Dikly, Lindsay D. Clark, Kevin H. Gardner, and Daniel M. Rosenbaum

- 1. Introduction 38
- 2. Expression and Isotopic Labeling in *Pichia* 41
- 3. Purification/NMR Sample Preparation 47
- 4. Running $^{13}\text{C}/^1\text{H}$ HMQC and Methyl Relaxation Experiments 52
- 5. Concluding Remarks 59
- Acknowledgments 60
- References 60

3. Optimal Isotope Labeling of Aromatic Amino Acid Side Chains for NMR Studies of Protein Dynamics

67

Ulrich Weininger

- 1. Introduction 68
- 2. NMR Properties of Aromatic Side Chains 69
- 3. Site-Selective ^{13}C Labeling of Aromatic Side Chains 71
- 4. NMR Spectra of Site-Selectively Labeled Aromatic Side Chains 75
- 5. Relaxation Dispersion Experiments 76
- 6. Picosecond to Nanosecond Dynamics 79

7. Conclusions	83
References	83
4. A Quick and Colorful Method to Measure Low-Level Contaminations of Paramagnetic Ni^{2+} in Protein Samples Purified by Immobilized Metal Ion Affinity Chromatography	87
Starla D. Glover and Cecilia Tommos	
1. Introduction	88
2. Materials and Methods	90
3. Method to Determine Micromolar Ni^{2+} Contaminations in Protein Samples	91
4. Two Examples of Useful Applications for the Developed Colorimetric Method	100
5. Conclusion	105
Acknowledgments	105
References	105
Further Reading	106
5. Toolkit for NMR Studies of Methyl-Labeled Proteins	107
Paolo Rossi, Yoan R. Monneau, Youlin Xia, Yojiro Ishida, and Charalampos G. Kalodimos	
1. Introduction	108
2. Methods	113
3. Summary	138
References	139
6. Synthetic Biology-Based Solution NMR Studies on Membrane Proteins in Lipid Environments	143
Erik Henrich, Frank Löhr, Julija Mezhyrova, Aisha Laguerre, Frank Bernhard, and Volker Dötsch	
1. Introduction	144
2. Basic Cell-Free Expression System	147
3. Nanodisc Preparation	150
4. Cell-Free Insertion of Membrane Proteins Into Nanodiscs and Quality Optimization	154
5. Basic NMR Sample Processing and Analysis	161
6. Backbone Assignment of Membrane Proteins	166
7. NMR Structural Approaches for Membrane Proteins in Lipid Bilayers	168
8. Outlook	174
Acknowledgments	176
References	176

7. Preparation of Phosphorylated Proteins for NMR Spectroscopy	187
Ganesan Senthil Kumar, Rebecca Page, and Wolfgang Peti	
1. Introduction	188
2. Phosphorylation	190
3. Methods to Monitor Phosphorylation	193
4. Problems, Pitfalls, and Alternative Routes	197
5. Protocol for In Vitro Phosphorylation	199
6. Summary and Conclusions	201
Acknowledgments	202
References	202
8. Synthesis and NMR Characterization of the Prenylated Peptide, α-Factor	207
Taysir K. Bader, Todd M. Rappe, Gianlugi Veglia, and Mark D. Distefano	
1. Introduction	208
2. Synthesis of α -Factor	210
3. Analysis of α -Factor	226
4. Summary	234
Acknowledgments	236
References	236
9. The Preparation and Solution NMR Spectroscopy of Human Glycoproteins Is Accessible and Rewarding	239
Adam W. Barb, Daniel J. Falconer, and Ganesh P. Subedi	
1. Introduction	240
2. Glycoprotein Production	243
3. Strategies to Obtain Glycoprotein Compositional Homogeneity	246
4. Compositional Analysis of Glycoproteins	249
5. Solution NMR of Labeled Glycoproteins	253
6. Summary	258
Acknowledgement	258
References	259
10. Nonuniform Sampling for NMR Spectroscopy	263
Scott Robson, Haribabu Arthanari, Sven G. Hyberts, and Gerhard Wagner	
1. Introduction	265
2. Development of NUS Methods	265
3. Reconstruction Programs	266
4. NUS Schedules	273
5. Benefits of NUS	279

6. Implementation of NUS Experiments	286
7. Conclusion	287
Acknowledgments	288
References	289
11. Exploring Protein Conformational Landscapes Using High-Pressure NMR	293
Julien Roche, Catherine A. Royer, and Christian Roumestand	
1. Introduction	294
2. Monitoring "Global" Folding/Unfolding Reactions With 1D High-Pressure NMR Spectroscopy	296
3. Monitoring "Local" Protein Folding/Unfolding Reaction With High-Pressure 2D NMR Spectroscopy: Exploring the Folding Landscape	302
4. Characterization of the TSE in the Folding Reaction	314
5. Conclusions	317
References	318
12. CS-ROSETTA	321
Santrupti Nerli and Nikolaos G. Sgourakis	
1. Introduction	322
2. Terminologies	323
3. Preliminary Requirements	326
4. Methods	327
5. Architecture	341
6. Integration With Structural Restraints	347
7. Combined Approaches	352
8. Computational Requirements	354
9. Toolbox	355
10. Conclusions	357
Acknowledgments	358
References	358
13. Combining Evolutionary Covariance and NMR Data for Protein Structure Determination	363
Yuanpeng Janet Huang, Kelly P. Brock, Yojiro Ishida, Gurla V.T. Swapna, Masayori Inouye, Debora S. Marks, Chris Sander, and Gaetano T. Montelione	
1. Introduction	364
2. The EC-NMR Algorithm and Implementation	368

3. Quality Control and Structure Validation	376
4. Representative EC-NMR Results	378
5. Future Prospects	386
Acknowledgments	387
References	387

14. Combining NMR Spectroscopy and Molecular Dynamic Simulations to Solve and Analyze the Structure of Protein-RNA Complexes **393**

Sebastien Campagne, Miroslav Krepl, Jiri Sponer, and Frederic H-T. Allain

1. Introduction	394
2. Sample Preparation	395
3. Data Analysis and Structure Calculations	399
4. Structural Ensemble and Functional Validation	410
5. Molecular Dynamic Simulations Provide Additional Insight to the Solution Structures	413
6. Conclusion	417
Acknowledgments	418
References	418
