Preface

ix

1. Combined Quantum Mechanics and Molecular Mechanics Studies of Enzymatic Reaction Mechanisms 1

Jon Ainsley, Alessio Lodola, Adrian J. Mulholland, Christo Z. Christov, and Tatyana G. Karabancheva-Christova

1. Introduction 2
2. The QM/MM Method 3
3. Calculation of QM/MM Energy 5
4. Treatment of Bonds at the QM/MM Boundary 7
5. QM/MM Embedding Techniques 8
6. QM/MM Modeling of Reaction Mechanisms 9
7. QM/MM Applications in Protein-Ligand Docking 13
8. Practical QM/MM Applications for Enzyme Reactivity 14
9. Conclusions 25
- References 26

2. Computational Methods for Efficient Sampling of Protein Landscapes and Disclosing Allosteric Regions 33

Canan Atilgan

1. Why Is There Need for Developing Efficient Computational Methods for Proteins? 34
2. Marvels and Limitations of MD Simulations 38
3. Viewing Proteins as Networks of Interacting Residues 42
4. Elastic Network Models of Proteins 46
5. Beyond Elastic Networks: PRS 51
6. New Directions for Efficient Sampling of Conformational Landscapes 56
- Acknowledgments 58
- References 58

3. Computational Methods for Epigenetic Drug Discovery: A Focus on Activity Landscape Modeling 65

J. Jesús Naveja, C. Iluhí Oviedo-Osornio, and José L. Medina-Franco

1. Introduction 66
2. Epigenetic Targets 67

3. Activity Landscape Modeling	68
4. Conclusions and Perspectives	80
Acknowledgments	80
References	81
4. The OECD Principles for (Q)SAR Models in the Context of Knowledge Discovery in Databases (KDD)	85
Gabriela Gómez-Jiménez, Karla Gonzalez-Ponce, Durbis J. Castillo-Pazos, Abraham Madariaga-Mazon, Joaquin Barroso-Flores, Fernando Cortes-Guzman, and Karina Martinez-Mayorga	
1. Introduction	86
2. Definition of the Goals	86
3. Selection of Data Mining Methods	102
4. Exploratory Analysis and Model/Hypothesis Selection	103
5. Data Mining	110
6. Evaluation	111
7. Interpretation/Utilization	111
8. Read-Across	112
Acknowledgments	114
References	114
5. Computational Methods to Discover Compounds for the Treatment of Chagas Disease	119
Eduardo M. Cortés-Ruiz, Oscar Palomino-Hernández, Karla Daniela Rodríguez-Hernández, Bertha Espinoza, and José L. Medina-Franco	
1. Introduction	120
2. Biological Relevant Space	122
3. Chemical Space	124
4. Computational Approaches for Lead Identification	130
5. Conclusions	138
6. Perspectives	138
Acknowledgments	139
References	139
