Contributors	xiii
Preface	xix

CHAPTER 1 Assays for the spindle assembly checkpoint in cell culture.....1

Chiara Marozzi, Jonathon Pines

1. Introduction.....	2
2. Choice of Fluorescent Protein Tag.....	4
3. Choice of Microscope.....	4
4. Assays	5
5. Materials.....	9
Acknowledgments	10
References.....	10

CHAPTER 2 Quantitative methods to measure aneuploidy and chromosomal instability.....15

Kristina M. Godek, Duane A. Compton

1. Introduction.....	16
2. Immunofluorescence Assay for Lagging Chromosomes in Anaphase.....	19
3. Chromosome Missegregation Assay	21
4. Aneuploid Cell Survival Assay	25
5. Concluding Remarks.....	30
Acknowledgments	30
References.....	30

CHAPTER 3 Dissecting the role of the tubulin code in mitosis.....33

Luís T. Ferreira, Ana C. Figueiredo, Bernardo Orr, Danilo Lopes, Helder Maiato

1. Introduction.....	36
2. Modulation of the Detyrosination/Tyrosination Cycle in Mammalian Cells.....	40
3. Analysis of Microtubule Dynamics in Mitosis	57
4. Identification of MAPs and Motors Binding to (De)Tyrosinated Microtubules.....	62
5. Conclusions and Outlook.....	66
Acknowledgments	67
References.....	67

CHAPTER 4	Employing CRISPR/Cas9 genome engineering to dissect the molecular requirements for mitosis	75
	Kara L. McKinley	
1.	Introduction	76
2.	CRISPR/Cas9 Gene Disruption in Human Cells for Acute and Chronic Protein Elimination	80
3.	Insertion of Tags Into Endogenous Loci to Report on and Perturb Gene Function	96
4.	Conclusions and Outlook	101
	Acknowledgments	101
	References	102
CHAPTER 5	Applying the auxin-inducible degradation system for rapid protein depletion in mammalian cells	107
	Bramwell G. Lambrus, Tyler C. Moyer, Andrew J. Holland	
1.	Introduction	108
2.	Materials Required	115
3.	Methods	116
4.	Functional Analysis	129
5.	Useful Tips	130
6.	Troubleshooting	131
7.	Conclusion	132
	References	132
CHAPTER 6	Small molecule tools in mitosis research	137
	Franziska Teusel, Lars Henschke, Thomas U. Mayer	
1.	Introduction	138
2.	Inhibitors of Mitotic Kinases	139
3.	Inhibitors of Mitotic Phosphatases	142
4.	Inhibitors of the Cytoskeleton	142
5.	Motor Protein Inhibitors	144
6.	Inhibitors of the Ubiquitin Proteasome Pathway	145
7.	Protocols	146
	Acknowledgment	151
	References	151
CHAPTER 7	Optogenetic control of mitosis with photocaged chemical dimerizers	157
	Huaiying Zhang, David M. Chenoweth, Michael A. Lampson	
1.	Introduction	158
2.	Materials	159
3.	Methods	161

4. Notes	162
5. Outlook.....	163
References.....	164
CHAPTER 8 Measuring mitotic forces	165
Anna A. Ye, Thomas J. Maresca	
1. Introduction.....	166
2. Selection and Placement of Sensors.....	166
3. Equipment and Materials.....	168
4. FRET-Based TS.....	171
5. Talin-Vinculin-Based Force Sensor.....	177
6. Conclusions.....	180
References.....	182
CHAPTER 9 Employing the one-cell <i>C. elegans</i> embryo to study cell division processes	185
Neil Hattersley, Pablo Lara-Gonzalez, Dhanya Cheerambathur, J. Sebastian Gomez-Cavazos, Taekyung Kim, Bram Prevo, Renat Khaliullin, Kian-Yong Lee, Midori Ohta, Rebecca Green, Karen Oegema, Arshad Desai	
1. Introduction.....	186
2. Engineering Cell Division Genes.....	188
3. Monitoring of Cell Division Processes	210
4. Conclusion/Perspective.....	223
Acknowledgments	224
Appendix.....	224
References.....	225
CHAPTER 10 A cell-free system of <i>Drosophila</i> egg explants supporting native mitotic cycles	233
Jorge de-Carvalho, Ojas Deshpande, Catarina Nabais, Ivo A. Telley	
1. Introduction.....	234
2. Materials.....	236
3. Microscope Setup.....	242
4. Extract Preparation	246
5. Strategies for Obtaining Particular Configurations in Explants	251
6. Chemical Perturbation Experiments.....	252
7. Conclusions.....	255
Acknowledgments	255
References.....	255

CHAPTER 11 Living <i>Xenopus</i> oocytes, eggs, and embryos as models for cell division	259
Ani Varjabedian, Angela Kita, William Bement	
1. Introduction	260
2. Methods	268
3. Construct Preparation	271
4. Activated Egg Experiments	273
5. Embryo Experiments	276
6. Mounting Samples for Live Imaging	279
References	281
 CHAPTER 12 Analysis of chromosomes from mouse oocytes and mammalian cultured cells by light microscopy	 287
Mariana C.C. Silva, Gordana Wutz, Kikuë Tachibana, Jan-Michael Peters	
1. Introduction	288
2. Diakinesis (Prometaphase I) and Metaphase II Mouse Oocyte Chromosome Spreads	289
3. In Situ Fluorescence Microscopy of Metaphase II Eggs to Assess Ploidy	296
4. Spreading and Giemsa Staining of Chromosomes From Mammalian Cultured Cells	298
5. Immunofluorescence Staining of Spread Chromosomes From Mammalian Cultured Cells	300
Acknowledgments	303
References	304
 CHAPTER 13 In vitro reconstitution of lateral to end-on conversion of kinetochore-microtubule attachments	 307
Manas Chakraborty, Ekaterina V. Tarasovets, Ekaterina L. Grishchuk	
1. Introduction	308
2. Materials	311
3. Methods	318
4. Outlook	324
Acknowledgments	325
References	325

CHAPTER 14 Isolation of mitotic chromosomes from vertebrate cells and characterization of their proteome by mass spectrometry	329
Itaru Samejima, William C. Earnshaw	
1. Introduction	330
2. Isolation of Mitotic Chromosomes From DT40 Cells	332
3. Sample Preparation for Mass Spectrometry	336
4. Fractionation of a Complex Sample by Off-Line SCX Column Chromatography	339
5. Instrument Settings of Mass Spectrometers	341
6. The Raw File	342
7. Computer Programs for Analyzing Mass Spectrometry Data	342
8. Data Analysis and Data Presentation	344
9. Conclusions	345
Acknowledgments	346
References	346
 CHAPTER 15 Purification of kinetochores from the budding yeast <i>Saccharomyces cerevisiae</i>	 349
Amitabha Gupta, Rena K. Evans, Lori B. Koch, Aimee J. Littleton, Sue Biggins	
1. Introduction	350
2. Overview of Yeast Kinetochores	351
3. Isolation of Yeast Kinetochores	354
4. Differences in Kinetochores Composition Based on Purification	362
5. Conclusions	366
Acknowledgments	367
References	368
 CHAPTER 16 Characterization of DNA helicases and nucleases from meiotic extracts of <i>S. cerevisiae</i>	 371
Rokas Grigaitis, Aitor Susperregui, Philipp Wild, Joao Matos	
1. Introduction	372
2. Synchronization and Harvesting of Large Meiotic Cultures of <i>S. cerevisiae</i>	373
3. Purification and Characterization of the STR Complex From Prophase I	376
4. Functional Analysis of Sgs1 Helicase and Mus81-Mms4 Nuclease From Meiotic Extracts	379

5. Adaptation to Other DNA Processing Enzymes and DNA	
Substrates	387
Acknowledgments	387
Author Contributions	387
References	388

CHAPTER 17 Single-nucleus Hi-C of mammalian oocytes and zygotes389

Johanna Gassler, Ilya M. Flyamer, Kikuë Tachibana

1. Introduction	390
2. Materials	392
3. Single-Nucleus Hi-C	395
4. Notes	401
5. Discussion	403
Acknowledgments	404
References	405

CHAPTER 18 Induction of fetal primary oocytes and the meiotic prophase from mouse pluripotent stem cells409

Hidetaka Miyauchi, Hiroshi Ohta, Mitinori Saitou

1. Introduction	410
2. Preparation of Feeder Cells	413
3. The Induction of PGCLCs From Pluripotent Stem Cells	416
4. Propagation of PGCLCs, and Induction of Fetal Primary Oocytes and Meiosis From PGCLCs	419
5. Materials and Reagents	422
6. Conclusion	424
Acknowledgments	426
References	426

CHAPTER 19 Electrical-assisted microinjection for analysis of fertilization and cell division in mammalian oocytes and early embryos431

Greg FitzHarris, John Carroll, Karl Swann

1. Introduction	432
2. Notes and Technical Suggestions	437
3. Materials/Key Equipment	438
References	439

CHAPTER 20 Single cell genomics to study DNA and chromosome changes in human gametes and embryos.....441

Robert C. Blanshard, Chongyi Chen, Xiaoliang Sunney Xie, Eva R. Hoffmann

1. Introduction.....	442
2. Methods.....	443
3. Conclusions.....	455
Acknowledgments	456
References.....	456

CHAPTER 21 Cytoplasmic removal, enucleation, and cell fusion of mouse oocytes.....459

Hirohisa Kyogoku, Shuhei Yoshida, Tomoya S. Kitajima

1. Introduction.....	460
2. Isolation of GV-stage Oocytes	461
3. Cytoplasmic Removal.....	462
4. Enucleation and Oocyte Fusion.....	464
5. Spindle Fusion	467
6. Materials.....	470
7. Discussion	471
Acknowledgments	472
References.....	473
