SECTION 1 MICROFLUIDICS FOR MICRO-ORGANISMS

CHAPTER 1 Drug delivery and temperature control in microfluidic chips during live-cell imaging experiments	3
Javier Muñoz-Garcia, Julien Babic, Damien Coudreuse	
1. Introduction	4
2. Fabrication of the Microfluidic Chip	7
3. Setting Up and Using the Microfluidic System	18
4. Drug Delivery in the Microsystem	23
5. General Conclusions: Pros and Cons	25
Acknowledgments	27
References	27
CHAPTER 2 Controllable stress patterns over multi-generation timescale in microfluidic devices	29
Youlian Goulev, Audrey Matifas, Gilles Charvin	
1. Introduction	30
2. Method	32
3. Microfluidic Chip Design	32
4. PDMS Chip Fabrication	32
5. Microfluidics Live-Cell Imaging Setup	35
6. Principles of H ₂ O ₂ Ramping Stress	36
7. Stress Ramping Setup	38
8. Discussion	39
References	39
CHAPTER 3 A bacterial antibiotic resistance accelerator and applications	41
Julia Bos, Robert H. Austin	
1. Introduction	42
2. Materials	43
3. Methods	44
4. Device Performances	50
5. Conclusions	54
References	55
Further Reading	57

CHAPTER 4 A microfluidic fluidized bed to capture, amplify and detect bacteria from raw samples	59
Lucile Alexandre, Iago Pereiro, Amel Bendali, Sanae Tabnaoui, Jana Srbova, Zuzana Bilkova, Shane Deegan, Lokesh Joshi, Jean-Louis Viovy, Laurent Malaquin, Bruno Dupuy, Stéphanie Descroix	
1. Introduction	60
2. Method	61
3. Discussion	73
References	75

SECTION 2 MICROFLUIDICS FOR CELL MIGRATION

CHAPTER 5 Micro-engineered "pillar forests" to study cell migration in complex but controlled 3D environments	79
Jörg Renkawitz, Anne Reversat, Alex Leithner, Jack Merrin, Michael Sixt	
1. Introduction	80
2. Method	82
3. Pitfalls and Limitations	87
4. Discussion	87
References	90

CHAPTER 6 Measuring spontaneous neutrophil motility signatures from a drop of blood using microfluidics	93
Sinan Muldur, Anika L. Marand, Felix Ellett, Daniel Irimia	
1. Introduction	94
2. Microfluidic Device	95
3. Sample Preparation and Loading	98
4. Microscopy	100
5. Data Analysis	102
6. Conclusion	106
Acknowledgments	106
References	106

CHAPTER 7 Directing cell migration on flat substrates and in confinement with microfabrication and microfluidics	109
Emilie Le Maout, Simon Lo Vecchio, Alka Bhat, Daniel Riveline	
1. Introduction	110
2. Microfabrication of Motifs	114
3. Rectifying Cell Motion With Asymmetrical Patterns: Micro-Contact Printing of Adhesive Motifs	118
4. Control of Cell Migration in Confined 3D Environment	121
5. Control of Cell Migration in 3D With Chemotaxis	126
6. Troubleshooting	130
7. Conclusion	131
References	132

CHAPTER 8 3D cell migration in the presence of chemical gradients using microfluidics	133
Andrew G. Clark, Anthony Simon, Koceila Aizel, Jérôme Bibette, Nicolas Bremond, Danijela Matic Vignjevic	
1. Introduction	134
2. Gradient device fabrication	135
3. Chamber preparation for live imaging experiments	138
4. Data analysis	143
5. Common Experimental Problems and Troubleshooting	144
6. Conclusion	145
Appendix. Example Collagen Recipe	146
References	146

SECTION 3 MICROFLUIDICS FOR CELL MECHANICS

CHAPTER 9 Microfluidics for cell sorting and single cell analysis from whole blood	151
Ramanathan Vaidyanathan, Trifanny Yeo, Chwee Teck Lim	
1. Introduction	152
2. Cell Sorting and CTC Isolation Using Spiral Microfluidic Chip	155
3. Isolation and Retrieval of Single CTCs	164
4. Conclusion	170
References	171

CHAPTER 10 High-throughput single-cell mechanical phenotyping with real-time deformability cytometry	175
Marta Urbanska, Philipp Rosendahl, Martin Kräter, Jochen Guck	
1. Introduction	176
2. Method Overview	177
3. Experimental Protocols	180
4. Data Analysis	188
5. Discussion	193
Acknowledgments	196
References	196
CHAPTER 11 A microfluidic cell-trapping device to study dynamic host-microbe interactions at the single-cell level	199
Chiara Toniolo, Matthieu Delincé, John D. McKinney	
1. Introduction	200
2. Protocol	201
3. Discussion	211
References	213
CHAPTER 12 Mechano-chemostats to study the effects of compressive stress on yeast	215
L.J. Holt, O. Hallatschek, M. Delarue	
1. Introduction	216
2. Presentation and Microfabrication of the Mechano-Chemostat	218
3. Control of the Mechanical Environment	223
4. Physiological Response to a Mechanical Stress	227
5. Discussion	228
References	229
