SECTION I MICROFLUIDICS FOR CELL CULTURE, CELL MANIPULATION AND CELL SORTING

CHAPTER 1 Viable cell culture in PDMS-based microfluidic devices	3
Melikhan Tanyeri, Savaş Tay	
1. PDMS: Material Properties	4
2. Cell Density and Perfusion	9
3. Advantages of PDMS-Based Microfluidic Cell Culture	11
4. Challenges of PDMS-Based Microfluidic Cell Culture	13
5. Applications	16
6. Outlook	24
References	24
CHAPTER 2 High-throughput microfluidic single-cell trapping arrays for biomolecular and imaging analysis	35
Xuan Li, Abraham P. Lee	
1. Introduction	36
2. Chip Design and Rationale	37
3. Fabrication of the Microfluidic Single-Cell Trapping Array	38
4. Experimental Protocol for Single-Cell Trapping	42
5. Application 1: Single-Cell mRNA Probing	43
6. Application 2: Single-cell Array for Live-cell Imaging	45
7. Conclusion	49
Acknowledgments	49
References	49
CHAPTER 3 Artificial niche microarrays for identifying extrinsic cell-fate determinants	51
Samy Gobaa, Raphael V. Gayet, Matthias P. Lutolf	
1. Introduction	52
2. Method	53
3. Discussion	64
Acknowledgments	67
References	68
Further Reading	69

CHAPTER 4	Reconstruction of directed neuronal networks in a microfluidic device with asymmetric microchannels	71
	Josquin Courte, Renaud Renault, Audric Jan, Jean-Louis Viovy, Jean-Michel Peyrin, Catherine Villard	
1.	Introduction	72
2.	Method	74
3.	Results	86
4.	Discussion	91
	Acknowledgment	94
	References	94

CHAPTER 5	Single-cell 3D electro-rotation	97
	Liang Huang, Peng Zhao, Fei Liang, Wenhui Wang	
1.	Introduction	98
2.	Theory and Method	100
3.	Devices Design, Fabrication and Work Procedures	102
4.	Data Analysis	109
5.	Discussion	114
	Acknowledgments	114
	References	114

SECTION II DROPLET-BASED MICROFLUIDICS

CHAPTER 6	Direct quantification of <i>EGFR</i> variant allele frequency in cell-free DNA using a microfluidic-free digital droplet PCR assay	119
	Benjamin Demaree, Daniel Weisgerber, Ata Dolatmoradi, Makiko Hatori, Adam R. Abate	
1.	Introduction	120
2.	Discussion	121
3.	Methods	124
4.	Conclusion	130
	References	130

CHAPTER 7	Quantifying phenotypes in single cells using droplet microfluidics	133
	Fengjiao Lyu, Lucas R. Blanch, Sindy K.Y. Tang	
1.	Introduction	134
2.	Materials and Methods	136

3. Example 1. Quantitative Detection of Cells Expressing BlaC Using Droplet-Based Microfluidics for Use in the Diagnosis of Tuberculosis.....	142
4. Example 2. Measuring Variability in Metabolism With Single-Cell Resolution.....	146
5. Conclusions.....	155
References.....	156
CHAPTER 8 Modular microfluidics for double emulsion formation.....	161
Bryant Thompson, Nareh Movsesian, Christine Cheng, Prathamesh Karandikar, Malancha Gupta, Noah Malmstadt	
1. Introduction.....	162
2. Modular Fluidic and Instrumentation Components (MFICs)...	164
3. Initiated Chemical Vapor Deposition (iCVD).....	166
4. Contact Angle Measurement.....	168
5. Double Emulsion MFIC System.....	169
6. Discussion.....	171
References.....	173
Further Reading.....	175
CHAPTER 9 Universal anchored-droplet device for cellular bioassays.....	177
Gabriel Amselem, Sébastien Sart, Charles N. Baroud	
1. Introduction.....	178
2. Fabrication of Hydrophobic PDMS Chips.....	180
3. Producing and Manipulating Immobilized Microfluidic Droplets.....	185
4. Using the Microfluidic Device for Animal Cell and Bacteria Culture and Analysis.....	190
5. Conclusions.....	196
Acknowledgments.....	197
References.....	197
SECTION III MICROFLUIDICS FOR CELLULAR ANALYSIS	
CHAPTER 10 Cell biology at the interface of nanobiosensors and microfluidics.....	203
Nikhil Bhalla, Hung-Ju Chiang, Amy Q. Shen	
1. Introduction.....	204
2. Nanobiosensors.....	205
3. Microfluidic Devices.....	212

4. Nanoplasmo-Fluidics: Coupling Nanoplasmonics With Microfluidics.....	217
5. Challenges in Nanoplasmo-Fluidics for Cell Biology.....	221
6. Outlook.....	222
References.....	222
CHAPTER 11 BET-seq: Binding energy topographies revealed by microfluidics and high-throughput sequencing... 229	
Arjun K. Aditham, Tyler C. Shimko, Polly M. Fordyce	
1. Introduction.....	230
2. BET-Seq Library Design and Synthesis.....	232
3. Performing a BET-Seq Experiment.....	237
4. Sequencing Library Preparation.....	241
5. Analysis.....	245
6. Conclusion.....	248
Acknowledgments.....	248
References.....	249
