

CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
1. Reactive Cysteine Persulphides: Occurrence, Biosynthesis, Antioxidant Activity, Methodologies, and Bacterial Persulphide Signalling	1
Tomohiro Sawa, Katsuhiko Ono, Hiroyasu Tsutsuki, Tianli Zhang, Tomoaki Ida, Motohiro Nishida, and Takaaki Akaike	
1. Introduction	3
2. Occurrence	3
3. Biosynthesis	7
4. Antioxidant Activity	11
5. Methodologies	12
6. Cysteine Persulphides in Bacterial Signalling	20
7. Conclusion	23
Acknowledgements	23
References	24
2. Nitric Oxide Signalling in Yeast	29
Rika I. Astuti, Ryo Nasuno, and Hiroshi Takagi	
1. Introduction	30
2. Nitric Oxide as a Biomolecule Modifier	31
3. NO Biosynthesis	33
4. NO Detoxification	41
5. Physiological Role of NO in Yeast (Dual Effects)	47
6. Conclusions	53
7. Future Perspectives	53
Acknowledgements	54
References	54
Further Reading	62
3. The Inflammasome: Regulation of Nitric Oxide and Antimicrobial Host Defence	65
Rajalakshmy A. Ramachandran, Christopher Lupfer, and Hasan Zaki	
1. Introduction	66
2. NO Is an Effector Molecule in Antimicrobial Host Defence	70

3. NOD-Like Receptors	72
4. The Inflammasome	74
5. The NLRP1 Inflammasome	75
6. The NLRP3 Inflammasome	77
7. The NAIP/NLRC4 Inflammasome	80
8. The AIM2 Inflammasome	81
9. Pyrin Inflammasome	85
10. Other Inflammasome Complexes	86
11. Noncanonical Inflammasome Activation	87
12. The Inflammasome in Antimicrobial Host Defence	89
13. Inflammasomes in the Regulation of Intestinal Microbiome and Inflammatory Disorders	93
14. Involvement of NO in the Effector Mechanism of Inflammasome-Mediated Host Defence	95
15. Reciprocal Regulation of the Inflammasome by NO	97
16. Concluding Remarks	99
References	99
 4. Nitric Oxide, an Old Molecule With Noble Functions in <i>Pseudomonas aeruginosa</i> Biology	 117
Masanori Toyofuku and Sang-Sun Yoon	
1. Introduction	118
2. Anaerobic Respiration, a Leaky Process for NO Production	119
3. Regulation of Denitrification	124
4. NO, an Important Molecule That Influences <i>P. aeruginosa</i> Behaviour	128
5. Clinical Relevance of NO in <i>P. aeruginosa</i> Infection	135
6. Conclusions	138
References	140
 5. Emerging Roles of Nitric Oxide Synthase in Bacterial Physiology	 147
Elizabeth H. Hutfless, Sujata S. Chaudhari, and Vinai C. Thomas	
1. Evolutionary Significance of NOS	148
2. Domain Organization and Cofactors of NOS	150
3. Structural Aspects of Bacterial NOS	152
4. Mechanistic and Kinetic Aspects of Bacterial NOS-Mediated Catalysis	159
5. Biological Relevance of NOS in Bacteria	169
6. Bacterial NOS as a Therapeutic Target	178
7. Conclusions	180
Acknowledgement	181
References	181

6. Anaerobic Bacterial Response to Nitrosative Stress 193

Jeffrey A. Cole

1. Interaction Between Oxidative and Nitrosative Stress Responses	195
2. Nitric Oxide as the Primary Source of Nitrosative Stress	197
3. Transcription Factors That Regulate the <i>E. coli</i> and <i>Salmonella enterica</i> Response to Nitrosative Stress	201
4. Regulation of the Anaerobic Nitrosative Stress Response in Other Bacteria	202
5. Nitric Oxide Reduction by Enteric Bacteria	208
6. <i>E. coli</i> Genes of Unknown Function Expressed Under Conditions of Nitrosative Stress	210
7. The Enigmatic Hcp	211
8. The Role of the YtfE (RIC) Protein in the Repair of Nitrosylated Iron-Sulphur Proteins	213
9. Proteins Involved in the Anaerobic Nitrosative Stress Response in Bacteria Other Than Enterobacteriaceae	216
10. Reasons Why Different Conclusions Have Resulted From Different Studies	220
11. Conclusions	227
References	228
