

CONTENTS

<i>Contributors</i>	xiii
<i>Preface</i>	xvii
1. Processing of DNA Double-Strand Breaks in Yeast	1
Robert Gnügge, Julyun Oh, and Lorraine S. Symington	
1. Introduction	2
2. Cell Cultivation and DSB Generation	4
3. Genomic DNA Extraction	6
4. DNA Quantification	7
5. Resection Quantification	8
Acknowledgments	23
References	23
2. Methods to Study DNA End Resection I: Recombinant Protein Purification	25
Roopesh Anand, Cosimo Pinto, and Petr Cejka	
1. Introduction to DNA End Resection	26
2. Expression of Recombinant Proteins in Insect Cells	27
3. Large-Scale Protein Purification of DNA End Resection Proteins	34
Acknowledgments	59
References	59
3. Methods to Study DNA End Resection II: Biochemical Reconstitution Assays	67
Cosimo Pinto, Roopesh Anand, and Petr Cejka	
1. Introduction	68
2. Short-Range DNA End Resection by MRN and CtIP	69
3. Long-Range DNA End Resection by DNA2-BLM and DNA2-WRN	87
Acknowledgments	103
References	103

4. Direct Quantitative Monitoring of Homology-Directed DNA Repair of Damaged Telomeres	107
Priyanka Verma, Robert L. Dilley, Melina T. Gyparakis, and Roger A. Greenberg	
1. Introduction	108
2. Direct Detection of Break-Induced Telomere Synthesis	109
3. In Vivo Imaging of DNA Double-Strand Break-Induced Telomere Mobility	127
References	131
5. Kinetic Analysis of the Exonuclease Activity of the Bacteriophage T4 Mre11-Rad50 Complex	135
Tibebe A. Teklemariam, Osvaldo D. Rivera, and Scott W. Nelson	
1. Introduction	136
2. Assays Using Plasmids and PCR Products	138
3. End-Labeled Oligonucleotide Substrates	142
4. Determining Exonuclease Polarity	146
5. 2-Aminopurine-Based Oligonucleotide Substrates	148
6. Conclusions	153
References	153
6. Expression, Purification, and Biochemical Evaluation of Human RAD51 Protein	157
Shyamal Subramanyam and Maria Spies	
1. Introduction	158
2. System for the Bacterial Expression of Human RAD51 Protein	159
3. Equipment, Materials, and Reagents	160
4. Bacterial Expression of the RAD51 Protein From the pCH1/RAD51o Plasmid	163
5. Purification of RAD51	164
6. FRET-Based DNA-Binding Assay to Measure ssDNA-Binding Activity of the RAD51 Recombinase	167
7. Three-Strand DNA Strand Exchange Assay	170
8. Conclusions	175
Acknowledgments	176
References	176
7. Determining the RAD51-DNA Nucleoprotein Filament Structure and Function by Cryo-Electron Microscopy	179
Lingyun Zhao, Jingfei Xu, Weixing Zhao, Patrick Sung, and Hong-Wei Wang	
1. Introduction	180
2. Purification of hRAD51	183
3. Assembly of Presynaptic, Postsynaptic, and Arrested Synaptic Complexes	184

4. Negative Staining EM	185
5. Cryo-EM Sample Preparation	187
6. Cryo-EM Data Collection	188
7. Image Processing and Reconstruction	189
8. Conclusion and Perspectives	195
Acknowledgments	195
References	196
8. Observation and Analysis of RAD51 Nucleation Dynamics at Single-Monomer Resolution	201
Shyamal Subramanyam, Colin D. Kinz-Thompson, Ruben L. Gonzalez Jr., and Maria Spies	
1. Introduction	202
2. Observing RAD51 Nucleation on ssDNA Using Total Internal Reflection Fluorescence Microscopy	206
3. Ensemble Analysis of Single-Molecule Data	217
4. Real-Time Observation and Analysis of RAD51 Nucleation Using ebFRET	219
5. Conclusions	227
Acknowledgments	229
References	229
9. TIRF-Based Single-Molecule Detection of the RecA Presynaptic Filament Dynamics	233
Sung H. Kim	
1. Introduction	234
2. Total Internal Reflection Fluorescence-Based SM-FRET Measurement	236
3. Nucleation	241
4. End-Dependent Presynaptic Filament Dynamics	243
5. Protein Scaffold Shift Within Presynaptic Filament	246
6. ATP-Dependent Conformational Change	248
7. Conclusions	251
Acknowledgment	251
References	251
10. The RadA Recombinase and Paralogues of the Hyperthermophilic Archaeon <i>Sulfolobus solfataricus</i>	255
Michael L. Rolfmeier and Cynthia A. Haseltine	
1. Introduction	256
2. Biochemical Approaches to Study of the <i>S. solfataricus</i> SsoRadA Protein and Its Paralogues	258

3. Methods Shared Across Protocols	259
4. Heterologous Protein Purification	261
5. ATPase Activity Assays	272
6. DNA and ATP Binding Assays	276
7. Mechanistic Recombination Assays	279
8. Summary and Conclusion	282
References	283
11. Reconstituting the 4-Strand DNA Strand Exchange	285
Olga M. Mazina and Alexander V. Mazin	
1. Introduction	286
2. Preparation of DNA Substrates for 4-Strand DNA Exchange	288
3. Preparation of Joint Molecules	297
4. Branch Migration of Joint Molecules	300
5. Summary and Conclusion	303
Acknowledgments	304
References	304
Further Reading	305
12. Purification of <i>Saccharomyces cerevisiae</i> Homologous Recombination Proteins Dmc1 and Rdh54/Tid1 and a Fluorescent D-Loop Assay	307
Yuen-Ling Chan and Douglas K. Bishop	
1. Introduction	308
2. Overexpression of Dmc1	310
3. Purification of Dmc1	312
4. D-Loop Assay Using Fluorescent Dye-Tagged ssDNA	317
Acknowledgment	319
References	319
13. Probing Dynamic Assembly and Disassembly of Rad51 Tuned by Srs2 Using smFRET	321
Yupeng Qiu, Hye Ran Koh, and Sua Myong	
1. Filament Formation by Rad51	322
2. ATP-Dependent Activity of Srs2 on DNA	328
3. The Srs2 Activity on the Rad51 Filament	339
4. Conclusions	343
References	343

14. The Recombination Mediator BRCA2: Architectural Plasticity of Recombination Intermediates Revealed by Single-Molecule Imaging (SFM/TIRF)	347
Arshdeep Sidhu, Dejan Ristic, Humberto Sánchez, and Claire Wyman	
1. Introduction	348
2. Organization and Architectural Plasticity of Protein and DNA-Protein Assemblies: Single-Molecule SFM Imaging	350
3. SFM Imaging to Reveal and Quantify Protein Architectural Plasticity	354
4. SFM Analysis of RAD51 Filament and Joint Molecules	358
5. Identifying Specific Proteins in Complex Structures by Fluorescence: BRCA2-RAD51 Complexes Analyzed by TIRF-SFM	364
6. Conclusions	371
References	371
15. Single-Molecule Dynamics and Localization of DNA Repair Proteins in Cells	375
Maarten W. Paul, Alex N. Zelensky, Claire Wyman, and Roland Kanaar	
1. Introduction	376
2. Generating Cells With Endogenously Expressed Fusion Proteins for Live-Cell Imaging	378
3. Mobility Assays	389
4. Relative Position of Proteins In DSB Foci	396
5. Conclusion/Perspective	403
References	404
16. Single-Stranded DNA Curtains for Studying the Srs2 Helicase Using Total Internal Reflection Fluorescence Microscopy	407
Luisina De Tullio, Kyle Kaniecki, and Eric C. Greene	
1. Introduction	408
2. Methods	412
3. Conclusions and Future Directions	433
Acknowledgments	433
References	434
17. Single-Molecule Analysis of Replication Protein A-DNA Interactions	439
Fletcher E. Bain, Laura A. Fischer, Ran Chen, and Marc S. Wold	
1. Expression and Purification of RPA	440
2. Labeling of RPA	444

3. Single-Molecule Analysis of RPA–DNA Interactions: How to Do It	446
Acknowledgments	460
References	460
18. Single-Molecule Studies of ssDNA-Binding Proteins Exchange	463
Olivia Yang and Taekjip Ha	
1. Introduction	464
2. Single-Molecule FRET Experimental Strategies	465
3. Notes	474
4. Summary	476
Acknowledgments	477
References	477
19. Dissecting the Recombination Mediator Activity of BRCA2 Using Biochemical Methods	479
Catharina von Nicolai, Åsa Ehlén, Juan S. Martinez, and Aura Carreira	
1. Introduction	480
2. Biochemical Assays to Study the Mediator Function of BRCA2	481
3. Conclusions and Future Directions	509
References	510
20. Approaches to Understanding the Mediator Function of Brh2 in <i>Ustilago maydis</i>	513
Qingwen Zhou, William K. Holloman, and Milorad Kojic	
1. Introduction	514
2. Biochemical Methods	516
3. Genetic Methods	519
Acknowledgments	523
References	523
21. GEN1 Endonuclease: Purification and Nuclease Assays	527
Ying Wai Chan and Stephen C. West	
1. Introduction	528
2. Purification of GEN1	529
3. Cleavage of Synthetic DNA Substrates	533
4. Cleavage of Cruciform-Containing Plasmids by GEN1	538
5. Summary	540
Acknowledgments	540
References	541

22. Biochemical and Structural Properties of Fungal Holliday Junction-Resolving Enzymes **543**

Yijin Liu, Alasdair Freeman, Anne-Cécile Déclais, Anton Gartner,
and David M.J. Lilley

1. Holliday Junctions and Their Resolution	544
2. The Resolution Process	544
3. A Mechanism Ensuring Productive Junction Resolution	546
4. Processing of Holliday Junctions in Eukaryotes	550
5. Genes for the FEN1/XPG1 Superfamily in Thermophilic Fungi	551
6. Expression and Purification of GEN1 From <i>C. thermophilum</i>	552
7. The Biochemical Properties of CtGEN1	553
8. The Crystal Structure of a CtGEN1-Product Complex	560
9. The Interaction of CtGEN1 With Four-Way DNA Junctions Deduced From the Crystal Lattice	562
10. Comparison With Other Junction-Resolving Enzymes	563
Acknowledgments	564
References	564

23. Preparation and Resolution of Holliday Junction DNA Recombination Intermediates **569**

Rajvee Shah Punatar and Stephen C. West

1. Introduction	569
2. Preparation of DNA Substrates	571
3. Generation and Purification of α -Structures	583
4. In Vitro Resolution Assays	585
5. Notes	587
Acknowledgments	588
References	589
