

CONTENTS

Contributors

ix

1. Membrane Trafficking in Autophagy 1

Kristiane Sørensen, Thomas P. Neufeld, and Anne Simonsen

1. Introduction	2
2. Autophagy	4
3. Membrane Trafficking	10
4. Membrane Trafficking in Autophagosome Formation	13
5. Autophagosome Maturation	44
6. Autophagic Lysosome Reformation	65
7. Noncanonical Autophagy	67
8. Concluding Remarks	70
Acknowledgments	70
References	70

2. Altered Metabolism of Leukemic Cells: New Therapeutic Opportunity 93

Julia Starkova, Ivana Hermanova, Katerina Hlozkova, Alzbeta Hararova, and Jan Trka

1. Introduction	94
2. Leukemia Classification	98
3. Current Therapy	100
4. Metabolism of Normal Hematopoietic vs Leukemic Cells	102
5. Glucose Metabolism	104
6. Oxidative Phosphorylation	111
7. Tricarboxylic Acid Cycle: Isocitrate Dehydrogenase	113
8. Lipid Metabolism	116
9. Amino Acid Metabolism	121
10. Concluding Remarks	126
Acknowledgments	130
References	130

3. Profiling Celiac Disease-Related Transcriptional Changes 149

Ainara Castellanos-Rubio and Jose Ramon Bilbao

1. Celiac Disease	150
2. Microarray Studies	151

3. RNA-Seq Studies	159
4. miRNA Expression	160
5. Disease Association and Function: Expression Quantitative Trait Loci	161
6. CD Variants in Noncoding Regions	166
References	169
4. Indoleamine 2,3-Dioxygenase and Its Therapeutic Inhibition in Cancer	175
George C. Prendergast, William J. Malachowski, Arpita Mondal, Peggy Scherle, and Alexander J. Muller	
1. Introduction	176
2. IDO1 in Immune Escape From T Cell Immunity	178
3. IDO1 in Inflammatory Programming: MDSC Development and Metastasis	180
4. IDO1 in Inflammatory Programming: Pathogenic Neovascularization and Metastasis	181
5. IDO2 in B-Cell Inflamed States and Certain IDO1 Functions: Connections and Questions	183
6. TDO in Inflammatory Programming: Immune Escape, Anoikis Resistance, and Metastasis	186
7. Lead Clinical Agents: Indoximod, Epacadostat, and Navoximod	189
8. Other IDO/TDO Inhibitor Clinical Candidates	195
Acknowledgments	195
References	196
5. Loss of Nuclear Envelope Integrity in Aging and Disease	205
Joke Robijns, Gaëlle Houthaevae, Kevin Braeckmans, and Winnok H. De Vos	
1. The Nuclear Envelope Safeguards Nuclear Compartmentalization	206
2. Nuclear Envelope Erosion Compromises Transport Selectivity	208
3. Nuclear Envelope Shedding Bypasses NPC Control	209
4. Nuclear Envelope Rupture Triggers Abhorrent Nucleocytoplasmic Exchange	212
5. Conclusion	217
Acknowledgment	218
References	218
6. Mechanisms of Cortical Differentiation	223
Lata Adnani, Sisu Han, Saiqun Li, Pierre Mattar, and Carol Schuurmans	
1. Introduction	228
2. A Primer on Neocortical Anatomy	229
3. Early Neocortical Development	233

4. Control of Neocortical Neurogenesis	244
5. Control of Neocortical Gliogenesis	270
6. Conclusions and Future Perspectives	286
Acknowledgments	288
References	288
7. New Insights Into Autophagy Dysfunction Related to Amyloid Beta Toxicity and Neuropathology in Alzheimer's Disease	321
Claudia Ntsapi, Dumisile Lumkwana, Chrisna Swart, Andre du Toit, and Ben Loos	
1. Introduction	322
2. Autophagy and Its Machinery	324
3. A β Biogenesis and AD-Related Toxicity	329
4. Autophagy Dynamics and AD Pathogenesis	332
5. APP and the Autophagosome: Site of Clearance and Site of Production	337
6. A β Clearance and the Role of Autophagy in A β Homeostasis	338
7. The Protein Signature of Autophagic Failure in AD	342
8. Autophagy Control: Therapeutic Interventions in AD	344
9. Summary and Future Directions	347
Acknowledgments	347
References	348
