<b>CHAPTER 1 Epigenetics and Regeneration: An Overview.....</b>	<b>1</b>
Daniela Palacios	
1.1 Introduction .....	1
1.2 Epigenetic Regulation of Gene Expression and Cell Fate .....	2
1.3 Development, Reprogramming, and Tissue Regeneration: From the Zygote to Emerging Sources of Multipotent Cells for Regenerative Purposes.....	5
1.4 The Epigenetics of Tissue Development, Homeostasis, and Regeneration.....	8
1.5 Epigenetics and Environment: How Age, Environmental Cues, and Epigenetic Drugs Influence The Capability of Stem Cells to Regenerate .....	9
1.6 Conclusions: Is There a Place for Epigenetics in Regenerative Medicine? .....	10
Acknowledgments .....	11
List of Abbreviations.....	11
References .....	11

## **SECTION I EPIGENETICS: MOLECULAR PLAYERS AND MECHANISMS**

<b>CHAPTER 2 Dynamics and Mechanisms of DNA Methylation Reprogramming .....</b>	<b>19</b>
Sari Pennings, Ailsa Revuelta, Katy A. McLaughlin, Nur Annies Abd Hadi, Petchroi Petchreing, Raffaele Ottaviano, Richard R. Meehan	
2.1 Introduction .....	19
2.2 DNA Methylation Machinery .....	20
2.3 DNA Demethylation.....	25
2.4 DNA Methylation in Early Development.....	26
2.5 How Necessary is DNA Methylation Reprogramming for Early Development?...	29
2.6 DNA Methylation Trajectories During Reprogramming of Somatic Cells .....	31
2.7 6-Methyldeoxyadenosine in Mammalian DNA? .....	34
2.8 Future Perspectives.....	35
Acknowledgments .....	35
References .....	35
<b>CHAPTER 3 Histone Modifications.....</b>	<b>47</b>
Sonia Albin, Vlada Zakharova, Slimane Ait-Si-Ali	
3.1 Epigenetics and Chromatin Dynamics.....	48
3.2 Histone Modifications .....	48
3.2.1 Histone Lysine Acetylation.....	48

3.2.2 Histone Lysine Methylation .....	51
3.2.3 Histone Lysine Methylation in Transcription.....	51
3.2.4 Histone Arginine Methylation.....	53
3.2.5 Histone Phosphorylation .....	54
3.2.6 Histone Ubiquitination .....	54
3.2.7 Histone Sumoylation .....	55
3.2.8 Histone Glycosylation .....	56
3.2.9 Histone Poly-ADP Ribosylation .....	56
<b>3.3 The Histone Code.....</b>	<b>57</b>
3.3.1 Bivalent Domains, Promoters, and Enhancers .....	57
3.3.2 Histone Modifications and Nuclear Organization .....	59
<b>3.4 Histone Modifications in Cell Fate Changes and Cell Differentiation.....</b>	<b>61</b>
3.4.1 Histone Modifications as Regulators of Neuronal Development and Function .....	61
3.4.2 Histone Mutations in Disease: The Example of Histone Gene Mutations in Brain Tumors .....	62
3.4.3 Histone Modifications in Skeletal Muscle Differentiation and Regeneration.....	62
<b>3.5 Conclusions and Perspectives .....</b>	<b>65</b>
List of Abbreviations.....	65
References .....	66
<b>CHAPTER 4 Noncoding RNAs as Regulators of Gene Expression in Pluripotency and Differentiation.....</b>	<b>73</b>
Cristina Oliveira-Mateos, Anaís Sánchez-Castillo, Sònia Guil	
<b>4.1 Introduction .....</b>	<b>74</b>
4.1.1 Classification and Mechanisms of Action .....	74
<b>4.2 The Role of miRNAs in Pluripotency .....</b>	<b>76</b>
4.2.1 miRNAs as Regulators of the Cell Cycle and Apoptosis of Embryonic Stem Cells (ESCs).....	78
4.2.2 miRNAs Regulating the Maintenance of Self-Renewal and Pluripotency of ESCs .....	78
4.2.3 miRNAs in Somatic Cell Reprogramming Towards iPSCs.....	80
<b>4.3 miRNAs as Regulators of Cell Fate and Cell Differentiation .....</b>	<b>83</b>
4.3.1 miRNAs and Regulation of Muscle Differentiation.....	83
4.3.2 miRNAs and the Regulation of Osteogenic and Chondrogenic Differentiation .....	83
4.3.3 miRNAs and the Regulation of Neural Differentiation .....	84
4.3.4 miRNAs and the Regulation of Hematopoietic Differentiation.....	85
<b>4.4 lncRNAs in Pluripotency and Differentiation .....</b>	<b>85</b>
4.4.1 lncRNAs and the Control of Pluripotency.....	89
4.4.2 lncRNAs and Their Role in Differentiation .....	91
<b>4.5 ncRNA-Based Therapeutic Strategies.....</b>	<b>94</b>

4.6	Conclusions.....	97
	Acknowledgments .....	97
	List of Abbreviations.....	97
	References .....	99
	Glossary .....	105
<b>CHAPTER 5</b>	<b>Organizing Principles for the Spatial Folding of Chromosomes.....</b>	<b>107</b>
	Nataša Josipović, Argyris Papantonis	
5.1	Multiscale Genomic Organization: An Overview .....	107
5.2	Methods for Studying Spatial Chromatin Organization.....	110
5.3	About TADs as “Building Blocks” of the Genome .....	111
5.4	CTCF and Cohesin as Architectural Factors .....	113
5.5	Transcription as an Organizational Force.....	115
5.6	Heterochromatinization as an Organizational Force .....	118
5.7	Chromatin Organization in Aging and Disease.....	119
	List of Abbreviations.....	120
	References .....	121
	Glossary .....	130
<b>SECTION II</b>	<b>DEVELOPMENT, REPROGRAMMING &amp; TISSUE</b>	
	<b>REGENERATION</b>	
<b>CHAPTER 6</b>	<b>Epigenetics of Early Mammalian Development: A Pathway to</b>	
	<b>Regenerative Medicine.....</b>	<b>133</b>
	Wendy Dean, Courtney W. Hanna	
6.1	Introduction .....	133
6.2	Overview.....	134
6.3	Programming and Reprogramming DNA Methylation: Building and	
	Breaking Totipotency.....	136
6.3.1	Programming DNA Methylation in Development: Germ Cells to	
	Gametes .....	136
6.3.2	Reprogramming DNA Methylation in Early Development: Zygote	
	to the Blastocyst.....	139
6.3.3	Epigenetic Activities in Early Development .....	141
6.4	Reprogramming of Chromatin in Early Mouse Development: Restoring	
	Totipotency.....	144
6.4.1	The Lock That Is Key: The Gamete-to-Zygote Transition .....	144
6.5	Coupling Epigenetic Instructions to Ensure Lineage Commitment.....	149
6.5.1	Histone Remodeling in the Postimplantation Embryo .....	150
6.6	Reprogramming Back to Totipotency: The Road Less Travelled .....	152
6.7	Conclusion and Outlook: Single Cell Resolution and Heterogeneity.....	154
	List of Abbreviations.....	155
	References .....	157

<b>CHAPTER 7</b>	<b>SOMATIC CELL EPIGENETIC REPROGRAMMING: MOLECULAR MECHANISMS AND THERAPEUTIC POTENTIAL</b> .....	<b>165</b>
	Zhaoyi Chen, Adam Pietrobon, Lisa M. Julian, William L. Stanford	
7.1	Introduction .....	166
7.1.1	Strategies For Somatic Cell Reprogramming: Induced Pluripotency and Lineage Transdifferentiation .....	166
7.2	Genomic and Epigenomic Mechanisms Underlying Somatic Cell Fate Reprogramming .....	167
7.2.1	Modulation of Chromatin Landscapes Drives Somatic Cell Reprogramming .....	168
7.2.2	Mechanisms of OSKM Genome Engagement in Cell Fate Reprogramming .....	169
7.2.3	Dynamics of Key Epigenetic Signatures During Reprogramming .....	174
7.3	Substitutions and Alternatives to OSKM Reprogramming .....	176
7.3.1	Modulating Reprogramming Efficiency .....	177
7.3.2	Epigenetic Memory in Reprogramming .....	185
7.3.3	Technical Considerations and Future Directions.....	186
7.4	Disease Modeling and Clinical Utility of Somatic Cell Reprogramming .....	187
7.4.1	Reprogramming Cells With Epigenetic Aberrations.....	187
7.4.2	Clinical Translation of iPSCs.....	188
7.5	Conclusions.....	189
	List of Abbreviations.....	190
	References .....	190
<b>CHAPTER 8</b>	<b>Regenerative Potential Across Species: An Eco-Evo-Devo Perspective</b> .....	<b>197</b>
	James A. Coffman	
8.1	Introduction .....	197
8.2	Universal Problems and Processes of Repair and Regeneration in Eukaryotes ...	200
8.3	Evolution of Regenerative Potential in Animals: Development, Plasticity, and Epigenetics.....	203
8.4	Why Is Adult Regenerative Capacity in Amniotes More Limited Than in Fish and Amphibians?.....	204
8.5	Conclusion: Determinants of Regenerative Potential That Medicine Might Productively Target .....	208
	List of Abbreviations.....	209
	References .....	210
	Glossary .....	214

## SECTION III REGENERATIVE MEDICINE: THE EPIGENETICS OF TISSUE HOMEOSTASIS, REPAIR AND REGENERATION

<b>CHAPTER 9</b>	<b>Common Challenges in Tissue Regeneration</b> .....	217
	Jonas Eriksson, William D'Angelo, Stephen F. Badylak	
9.1	Introduction .....	217
9.2	Challenges in TE/RM.....	218
9.2.1	Source of Cells .....	218
9.2.2	Artificial Conditions of In Vitro Culture.....	219
9.2.3	Immunologic Barriers.....	220
9.2.4	Lack of Stem Cell Survival Following Implantation .....	222
9.3	Conclusions.....	226
	List of Abbreviations.....	226
	References .....	226
<b>CHAPTER 10</b>	<b>Epigenetic Mechanisms in Liver and Pancreas Generation and Regeneration</b> .....	231
	Dario Nicetto, Ryan L. McCarthy, Kenneth S. Zaret	
10.1	Generating and Regenerating Liver and Pancreas— Epigenetics in Organ Development Homeostasis.....	232
10.1.1	Epigenetic Mechanisms During Hepatic and Pancreatic Cell Differentiation .....	232
10.1.2	Inductive Signaling Impact on Liver and Pancreas Development.....	233
10.1.3	Pioneer Factors' Role in Cellular Competence and Cell Fate Initiation ...	233
10.1.4	Cell Identity Establishment and Maintenance—Impact of Histone Modifications, DNA Methylation, and Nucleosome Remodelers.....	235
10.1.5	The Role of Long Noncoding RNAs in Liver and Pancreas .....	238
10.1.6	Modulating Organ Function—Environmental Influences on Liver and Pancreas Epigenomes .....	238
10.2	Generating and Regenerating Liver and Pancreas—Epigenetic Impact on Organ Regeneration .....	239
10.2.1	Epigenetic Mechanisms of Liver Regeneration.....	239
10.2.2	Transcription Factor Regulation of the Regenerative Response.....	240
10.2.3	Epigenetic Regulation of Liver Regenerative Response.....	243
10.2.4	Epigenetic Mechanisms of Pancreas Regeneration .....	244
10.3	Future Perspectives.....	247
	List of Abbreviations.....	248
	References .....	249
	Glossary .....	257

<b>CHAPTER 11 Transcriptional and Epigenetic Mechanisms Controlling Intestinal Cell Fate</b> .....	<b>259</b>
Fulvio Chiacchiera	
11.1 Introduction .....	260
11.2 The Intestinal Architecture.....	260
11.3 Cell Plasticity Preserving Intestinal Regeneration .....	262
11.3.1 Intestinal Stem Cells: The “+4 Model” and the “Stem Cell Zone Model” .....	262
11.3.2 LGR5 <sup>+</sup> Intestinal Stem Cells.....	262
11.3.3 The “+4” Intestinal Stem Cells.....	265
11.3.4 Reconciling the Two Models: The Astonishing Plasticity of Intestinal Crypts.....	266
11.4 Signaling Pathways Regulating Intestinal Regeneration.....	268
11.4.1 The WNT Signaling Pathway .....	269
11.4.2 The BMP Signaling Pathway.....	269
11.4.3 The NOTCH Signaling Pathway.....	270
11.4.4 The EGF Signaling Pathway.....	270
11.5 Transcriptional and Epigenetic Mechanisms Shaping Intestinal Epithelium .....	271
11.5.1 Transcription Factors Responsible for Intestinal Cell Specification and Differentiation of Enterocytes.....	271
11.5.2 Transcriptional Control of the Differentiation of Secretory Cells.....	274
11.5.3 Transcription Factors Involved in the Differentiation of M Cells.....	277
11.5.4 Transcription Factors and Epigenetic Modifiers Preserving Intestinal Stem Cells and Cell Plasticity.....	277
11.6 Conclusions.....	280
List of Abbreviations.....	280
References .....	281
<b>CHAPTER 12 Using Epigenetics as a Pharmacological Tool in Heart Regeneration</b> .....	<b>287</b>
Christina Pagiatakis, Simone Serio, Roberto Papait	
12.1 Introduction .....	287
12.2 Epigenetic Mechanisms in Cardiac Development, Differentiation, and Disease.....	289
12.2.1 Molecular Basis of Epigenetics .....	289
12.2.2 Cardiac Development.....	291
12.2.3 Epigenetic Factors Governing Cardiac Development .....	293
12.2.4 Epigenetic Factors Governing Cardiac Disease .....	295
12.3 Cardiac Differentiation, Transdifferentiation of the Heart, Induced Pluripotent Stem Cells (iPSCs), and Reprogramming.....	298
12.3.1 Composition of the Heart.....	298
12.3.2 Stem Cells.....	298

12.4	Exploiting Pharmacological Epigenetics for Cardiac Reprogramming and Regenerative Medicine—Future Perspectives .....	301
	List of Abbreviations.....	302
	References .....	302
	Further Reading .....	307
<b>CHAPTER 13</b>	<b>Epigenetic Regulation of Muscle Stem Cells During Skeletal Muscle Regeneration and Disease .....</b>	<b>309</b>
	Beatrice Biferali, Chiara Mozzetta	
13.1	Introduction .....	310
	13.1.1 Muscle Stem Cells.....	310
13.2	Transcriptional Hierarchies in Myogenesis .....	311
	13.2.1 Paired Box Factors, PAX3 and PAX7 .....	311
	13.2.2 Muscle Regulatory Factors, MRFs .....	312
13.3	Epigenetic Mechanisms Governing Muscle Stem Cells Fates.....	314
	13.3.1 Quiescence .....	314
	13.3.2 Activation .....	318
	13.3.3 Self-renewal.....	321
	13.3.4 Differentiation .....	323
13.4	Epigenetics of Skeletal Muscle Degenerative Diseases .....	324
	13.4.1 Aging .....	324
	13.4.2 Muscular Dystrophy .....	326
13.5	Conclusion .....	327
	List of Abbreviations.....	327
	References .....	328
<b>CHAPTER 14</b>	<b>The Intrinsic Role of Epigenetics in Axonal Regeneration.....</b>	<b>333</b>
	Daniela Palacios, Maria Teresa Viscomi	
14.1	Introduction .....	333
14.2	Experimental Models of Axonal Injury in Mammals .....	335
	14.2.1 CNS.....	335
	14.2.2 PNS .....	335
14.3	Axonal Injury: Cellular and Molecular Events After Nerve Injury.....	336
14.4	Successful PNS Regeneration and Failure of CNS Regeneration: Cell-Intrinsic and Cell-Extrinsic Factors .....	337
	14.4.1 Cell-Intrinsic Factors.....	337
	14.4.2 Cell-Extrinsic Factors.....	338
14.5	The Epigenetics of Axonal Regeneration.....	339
	14.5.1 DNA Methylation and Hydroxymethylation .....	340
	14.5.2 Histone Modifications .....	341
	14.5.3 Noncoding RNAs .....	343
14.6	Therapeutic Interventions Targeting the Epigenome to Promote Axonal Regeneration.....	346
14.7	Conclusions and Perspectives .....	347

List of Abbreviations.....	348
References .....	348
Further Reading .....	354
<b>CHAPTER 15 Insights Into the Epigenetics of Retinal Development and Diseases .....</b>	<b>355</b>
E.Y. Popova, C.J. Barnstable	
15.1 Introduction .....	356
15.2 Morphological and Molecular Development of the Retina.....	356
15.2.1 Morphological Development of the Retina .....	356
15.2.2 Development of the Inner Retina.....	357
15.2.3 Development of Photoreceptors.....	359
15.3 The Epigenetic Changes as Cells Move From Precursor to Differentiated Cell During Retinal Development .....	360
15.3.1 ES Cell Chromatin .....	360
15.3.2 Changes in Nuclei Structure for Different Cell Types.....	361
15.3.3 Changes in Histone Modifications Are Specific for Different Classes of Genes.....	363
15.3.4 DNA Methylation.....	366
15.3.5 Chromatin Accessibility .....	366
15.3.6 Enhancers.....	367
15.4 Epigenetic Modifiers Participate in Retinal Development and Maintenance.....	369
15.5 Epigenetics of Ocular Diseases.....	369
15.5.1 Retinitis Pigmentosa.....	369
15.5.2 Retinoblastoma .....	374
15.5.3 Diabetic Retinopathy .....	375
15.5.4 Glaucoma.....	376
15.5.5 AMD .....	376
15.6 ESCs, iPSCs, Epigenetic Memory, Reprogramming, and Cell Replacement Therapy .....	376
15.7 Conclusions.....	377
List of Abbreviations.....	378
References .....	378
<b>CHAPTER 16 At the Intersection of Epigenetics and Regeneration: An Analysis of the Experimental Outlook of Organoid Technology.....</b>	<b>385</b>
Nicolò Caporale, Giuseppe Testa	
16.1 Introduction .....	385
16.2 Developmental Epigenetics: A Dual Interpretation.....	389
16.3 A New Experimental System: 3D Organoids.....	389
16.4 Organoids Enable Key Advances for Modeling Human Diseases.....	390
16.5 Epigenetic Regulation in Organoids: A Tool for Controlling Tissue Regeneration and Gaining Functional Insight.....	392

<b>16.6</b>	Regenerative Potentials of Genome and Epigenome Editing in Organoids .....	395
<b>16.7</b>	Conclusion and Future Directions: Microfluidics, Automatized Culture Systems, and Single Cell Multiomics Will Make Organoids a Transformative Tool for Regenerative Medicine .....	397
	Acknowledgments .....	398
	List of Abbreviations.....	398
	References .....	398

## **SECTION IV EPIGENETICS, REGENERATION, AND ENVIRONMENT**

<b>CHAPTER 17</b>	<b>Epigenetic Pharmacology in Regenerative Medicine (Epi-Drugs).....</b>	<b>405</b>
	Giulia Stazi, Clemens Zwergel, Sergio Valente, Antonello Mai	
<b>17.1</b>	Introduction .....	405
<b>17.2</b>	Liver.....	406
<b>17.3</b>	Pancreas .....	407
<b>17.4</b>	Intestinum .....	408
<b>17.5</b>	Respiratory System.....	409
<b>17.6</b>	Heart .....	410
<b>17.7</b>	Skeletal Muscles.....	413
<b>17.8</b>	Skeleton .....	416
<b>17.9</b>	Haematopoietic System.....	417
<b>17.10</b>	Neural System .....	419
<b>17.11</b>	Conclusions & Perspectives.....	423
	Summarizing Table .....	424
	List of Abbreviations.....	435
	References .....	437
<b>CHAPTER 18</b>	<b>Genomic and Epigenomic Potential With Age: Genome, Epigenome, and the Epigenetic Clock.....</b>	<b>445</b>
	Danielle Gutman, Gil Atzmon	
<b>18.1</b>	General Introduction.....	445
<b>18.2</b>	Genomics of Aging and Longevity.....	446
	18.2.1 Pregenomic Era .....	446
	18.2.2 Genomic Era.....	446
<b>18.3</b>	Genomic Era-Sequencing (Targeted, Exome, and Whole Genome) .....	449
<b>18.4</b>	Aging Epigenomics .....	450
	18.4.1 Epigenetic Alterations and Aging.....	450
	18.4.2 DNA Methylation and the Epigenetic Clock.....	450
<b>18.5</b>	Noncoding RNAs .....	452
<b>18.6</b>	Histone Modifications .....	452
<b>18.7</b>	Age-Associated Chromatin Remodeling.....	453

18.8	Conclusion .....	454
	List of Abbreviations.....	454
	References .....	456
<b>CHAPTER 19 Epigenetics and Lifestyle: The Impact of Stress, Diet, and Social Habits on Tissue Homeostasis .....</b>		
	Raúl F. Pérez, Pablo Santamarina, Agustín F. Fernández, Mario F. Fraga	<b>461</b>
19.1	Introduction .....	462
	19.1.1 Epigenetics and the Environment .....	462
	19.1.2 Homeostasis, the Stem Cell Theory of Aging, and Epigenetics.....	463
19.2	Epigenetics and Diet .....	464
	19.2.1 Influence of Diet on the Epigenome.....	464
	19.2.2 Natural Compounds as HDAC Inhibitors: Epigenetic Chemoprevention of Disease .....	466
	19.2.3 The Case of Resveratrol.....	467
	19.2.4 Cellular Metabolites and Energy Influencing Epigenetic Regulation .....	468
	19.2.5 Influence of Nutrition on 5hmC: The Role of Vitamin C .....	469
19.3	Stress and Epigenetics.....	470
	19.3.1 Epigenetic Consequences of Psychosocial Stress.....	470
	19.3.2 Day, Night, and Epigenetic Changes.....	472
19.4	Epigenetics and an Unhealthy Lifestyle .....	473
	19.4.1 Tobacco Smoking.....	473
	19.4.2 Exposure to Heavy Metals.....	475
	19.4.3 Alcohol Consumption.....	477
19.5	Conclusions.....	479
	List of Abbreviations.....	479
	References .....	481
	Glossary .....	489

## SECTION V CONCLUSIVE REMARKS

<b>CHAPTER 20 iPSC- and Organoid-Based Biomedicine at the Intersection of Epigenetics and Regeneration: Charting the Normative Contours of Emerging Biomedical Platforms .....</b>		
	Luca Marelli, Giuseppe Testa	<b>493</b>
20.1	Introduction .....	494
20.2	New Vistas in Normative Reflection.....	495
20.3	Methodology.....	496
20.4	Biomedical Platforms .....	497
20.5	iPSC- and Organoid-Based Biomedicine as Emerging Biomedical Platforms.....	498
	20.5.1 iPSCs: Translating Disease in Space and Time .....	498
	20.5.2 "How Old is Your 3D Brain?" .....	500

<b>20.6</b>	Normative Challenges Posed by iPSC and Organoid Research.....	502
<b>20.7</b>	Governance Challenges in Data-Intensive iPSC and Organoid Platforms .....	502
<b>20.8</b>	Data Protection: The EU Regulatory Landscape.....	504
20.8.1	iPSC- and Organoid-Based Biomedicine in Light of the GDPR.....	505
20.8.2	The “Accountability Principle” and its Implications .....	505
20.8.3	The GDPR Vis-à-Vis the “Data Protection vs Data Utility” Conundrum .....	506
<b>20.9</b>	Conclusions.....	507
	References .....	507
	Index .....	511
