Preface ix

Acknowledgments xi

1. Conceptual Framework, Paradigms, and Models

- 1.1 Introduction 1
- 1.2 Pattern and Process 2
- 1.3 Definition of Ecosystem 3
- 1.4 Landscape Units 5
- 1.5 Defining Deserts 6
- 1.6 Causes of Aridity of Global Deserts 7
- 1.7 The Pulse-Reserve Paradigm/Model 8
- 1.8 The Soil Resource 9
- 1.9 Rooting Patterns 12
- 1.10 Long-Term Legacy Effects 13
- 1.11 Legacies in Ecological Time 15
- 1.12 Conceptual and Simulation Models 15
- 1.13 Ecosystem Processes 17
- 1.14 Problems of Scaling 18
- References 19
- Further Reading 20

2. Landforms, Geomorphology, and Vegetation

- 2.1 The Soil Template 22
- 2.2 Desert Mountains and Hillslopes 23
- 2.3 Piedmonts, Alluvial Fans, and Bajadas 24
- 2.4 Ephemeral Streams (Arroyos and Wadis) 29
- 2.5 Basins and Flatlands 32
- 2.6 Desert Pavements and Stony Surfaces 33
- 2.7 Rivers and Floodplains 35
- 2.8 Sand Dunes and Sand Features 35
- 2.9 Less Abundant Geomorphic Structures 38
- 2.10 Animals and Geomorphology 40
- Summary 43
- References 43
- Further Reading 45

3. Characterization of Desert Climates

- 3.1 Climate Drivers 47
- 3.2 Rainfall Variables 49
- 3.3 Seasonality 53
- 3.4 Spatial Effects 56
- 3.5 Predictability 58
- 3.6 Intensity, Duration, Frequency, and Return Time 59
- 3.7 Fog and Water Vapor Deposition (Dew) 62
- 3.8 Microclimate 64
- 3.9 Global Warming and Climate Change 68
- Summary 69
- References 69
- Further Reading 72

4. Wind and Water Processes

- 4.1 Wind Erosion 73
- 4.2 Water—Redistribution of Rainfall 80
- 4.3 Splash Erosion—Kinetic Energy of Raindrops 85
- 4.4 Infiltration and Run-Off 86
- 4.5 Exchanges Among Landscape Units 94
- 4.6 Exchanges Within Landscape Units 96
- 4.7 Modeling Overland Flow and Ephemeral Channel Flow 98
- 4.8 Episodic Events 99
- 4.9 Ephemeral Ponds and Lakes 101
- Summary 102
- References 103
- Further Reading 107

5. Patch—Mosaic Dynamics

- 5.1 Seeds: Germination and Establishment Sites 110
- 5.2 Single Species Patches 114
- 5.3 Intraspecific Morphological Variation 114
- 5.4 Mosaics and Multispecies Patches (Nurse Plants) 116
- 5.5 Competition Versus Facilitation 117

- 5.6 Animal-Produced Patches 121
- 5.7 Temporal Dynamics and Feedbacks 128
- Summary 129
- References 130

6. Adaptations

- 6.1 Avoidance of Extremes 136
- 6.2 Physiological and Morphological Adaptations 148
- Summary 166
- References 167
- Further Reading 171

7. Primary Production

- 7.1 Measurement of Net Primary Production 174
- 7.2 Comparison of Production Estimates With Mesic Ecosystems 176
- 7.3 Rain Use Efficiency 178
- 7.4 Belowground Productivity 179
- 7.5 Models of Annual Aboveground Net Primary Production 180
- 7.6 Landscape Relationships 183
- 7.7 Productivity in Extreme Deserts 187
- 7.8 Productivity Linked to Rainfall 188
- 7.9 Productivity of Species and Functional Groups 190
- 7.10 Experimental Studies 193
- 7.11 Remote Sensing of ANPP 196
- Summary 198
- References 198
- Further Reading 201

8. Consumers and Their Effects

- 8.1 Secondary Production 203
- 8.2 Ecosystem Engineers 204
- 8.3 Pollination 207
- 8.4 Seed Dispersal 208
- 8.5 Chewers and Browsers 210
- 8.6 Top-Down; Bottom-Up Regulation of Consumers 217
- 8.7 Food Webs 225
- 8.8 Surface-Active Arthropods 226
- 8.9 Large Herbivores 231
- 8.10 Granivory 235
- 8.11 Predators 240
- 8.12 Belowground Food Webs 246
- 8.13 Ephemeral Ponds and Lakes 249
- Summary 252

- References 253
- Further Reading 262

9. Decomposition and Nutrient Cycling

- 9.1 Nutrient Limitations 265
- 9.2 Decomposition 268
- 9.3 Nutrient Cycles 287
- 9.4 Resorption 292
- 9.5 Nitrogen Cycle 293
- 9.6 Other Potentially Limiting Nutrients 301
- 9.7 Mycorrhizae and Dark Septate Fungi 302
- Summary 306
- References 307
- Further Reading 315

10. Nonnative, Exotic, or Alien Species

- 10.1 Alien Plants 317
- 10.2 Great Basin Invasives: Cheat Grass 319
- 10.3 Hot Desert Invasive Plants 321
- 10.4 A River Flood-Plain Exotic Invasive 326
- 10.5 Nonnative Plants in Australia 328
- 10.6 Other Forage Exotics 328
- 10.7 Mesquites (*Prosopis* spp.) 329
- 10.8 The Invasive Syndrome 330
- 10.9 Control, Restoration, and Management of Invasive Exotics 331
- 10.10 Invasive Alien Animals 332
- 10.11 Feral Ungulates 336
- 10.12 Solutions? 337
- Summary 337
- References 338
- Further Reading 342

11. Anthropogenic Climate Change in Deserts

- 11.1 What is Climate Change? 344
- 11.2 Climate Models and Predictions 345
- 11.3 Faunal Effects 359
- Summary 363
- References 364
- Further Reading 369

12. Desertification

- 12.1 History of Desertification 372
- 12.2 Ecosystem and Landscape Consequences of Desertification 377
- 12.3 Effects on Animals and Animal Feedbacks 383

12.4 Climate Effects of Desertification	384
12.5 Social and Economic Consequences of Desertification	385
12.6 The Dryland Development Paradigm	389
12.7 Effects of Desertification on Biodiversity	389
Summary	391
References	391
Further Reading	395

13. Rehabilitation of Degraded Landscapes

13.1 Stabilizing Sand Dunes	398
13.2 Rehabilitation of Shrub Infested Rangeland	399
13.3 Restoring a Functional Soil	404
13.4 Degraded Croplands	405
13.5 Nurse Plants and Patches	406
13.6 Keystone Species	406
13.7 Symbiotic Microbes	408
13.8 Restoring Ecosystems on Mined Lands	409
Summary	410
References	410

14. Monitoring and Assessment

14.1 Definitions	414
14.2 Existing Assessment and Monitoring Systems	415

14.3 Landscape Function Analysis	416
14.4 A Quantitative Approach to Monitoring and Assessment	417
14.5 Indicators	418
14.6 Remote Sensing	421
Summary	423
References	423
Further Reading	424

15. The Human Footprint (Roads; Urbanization; Energy Developments)

15.1 Roads and Transportation Corridors	425
15.2 Urbanization	430
15.3 Fossil Fuel Developments Plus Electric Power Generation	439
15.4 Sustainable Energy Development	440
Summary	442
References	443

Glossary 447
