vii

1. Eosinophil Development, Disease Involvement, and Therapeutic Suppression	1
Patricia C. Fulkerson and Marc E. Rothenberg	
1. Eosinophil Development	2
2. Eosinophil Disease Involvement	11
3. Eosinophil Therapeutic Suppression	19
4. Future Directions	21
References	21
2. Unexpected Roles for Intracellular Complement in the Regulation of Th1 Responses	35
Erin E. West, Behdad Afzali, and Claudia Kemper	
1. Introduction	36
2. Canonical Functions of Liver-Derived and Systemic Complement	37
3. Noncanonical Functions of Immune Cell-Derived Complement	41
4. The Role of Complement in Adaptive Immunity	45
5. The Key Roles of C3 and CD46 in Human Th1 Responses	50
6. The Key Roles of C5 in Human Th1 Responses	55
7. Cell Metabolism as Key Complement "Target" During Immune Cell Activation	59
8. Concluding Remarks	62
Acknowledgments	62
References	62
3. Chemokines: Critical Regulators of Memory T Cell Development, Maintenance, and Function	71
Rod A. Rahimi and Andrew D. Luster	
1. Introduction	72
2. Chemokines: Master Regulators of Cell Positioning In Vivo	74
3. Chemokines and Memory T Cell Development: Location Determines T Cell Fate	74
4. Chemokines in Memory Maintenance: Storing Memory in the Right Place	84

5. Chemokines During Memory Responses: Rapidly Orchestrating Inflammation	87
6. Future Directions	92
7. Conclusions	93
References	93
4. Molecular Classification of Primary Immunodeficiencies of T Lymphocytes	99
William A. Comrie and Michael J. Lenardo	
1. Introduction	100
2. PIDs	101
3. PIDs of T Cell Function	103
4. Current Challenges/Approaches and Future Considerations	164
References	167
5. Molecular Aspects of Allergens and Allergy	195
Rudolf Valenta, Alexander Karaulov, Verena Niederberger, Pia Gattlinger, Marianne van Hage, Sabine Flicker, Birgit Linhart, Raffaella Campana, Margarete Focke-Tejkl, Mirela Curin, Julia Eckl-Dorna, Christian Lupinek, Yvonne Resch-Marat, Susanne Vrtala, Irene Mittermann, Victoria Garib, Musa Khaitov, Peter Valent, and Winfried F. Pickl	
1. Introduction	196
2. Allergen Molecules to Study Primary Allergic Sensitization	198
3. Allergen Molecules to Study Secondary Allergen-Specific IgE Responses	207
4. Dissection of the Mechanisms of Allergic Inflammation With Allergen Molecules and Epitopes	215
5. From Molecular Allergy Diagnosis to the Prediction of Allergy	220
6. Molecular Forms of AIT	224
7. Toward Allergen-Specific Forms of Prevention of Allergy	229
8. Concluding Remarks	232
Acknowledgments	232
Conflict of Interest	233
References	233
Further Reading	255
