vii

1. Host-Derived Nitric Oxide and Its Antibacterial Effects in the Urinary Tract 1

Lovisa Svensson, Mirjana Poljakovic, Isak Demirel, Charlotte Sahlberg, and Katarina Persson

1. Introduction 2
2. Urinary Tract Infection 3
3. Uropathogenic *E. coli* 4
4. Host Response Mechanisms in UTI 9
5. Host Production of Nitric Oxide in the Urinary Tract 14
6. Antibacterial Effects of Nitric Oxide and RNS on Uropathogenic *E. coli* 27
7. UTI Treatment: The Potential of Nitric Oxide 40
- References 45

2. Nitric Oxide Stress as a Metabolic Flux 63

Mark P. Brynildsen

1. NO[•] Stress and Its Connection to Metabolic Engineering 64
2. Chemical Inhibitors of NO[•] Detoxification Enzymes 66
3. Closing the NO[•] Material Balance 68
4. System Perturbations Through Flux Control 70
5. Blind Spots From a Flux Vantage 71
6. Concluding Remarks and Future Prospects 72
- Acknowledgments 73
- References 73

3. Antibiotic Lethality and Membrane Bioenergetics 77

Martin I. Voskuil, Christopher R. Covey, and Nicholas D. Walter

1. Introduction 78
2. Universal Hypotheses of Antibiotic Lethality 78
3. Conditions That Affect pH Homeostasis and Modulate Antibiotic Lethality 98
4. Antibiotics and Conditions That Promote Membrane Depolarization 109
5. Conclusions and Future Perspectives 112
- Acknowledgments 113
- References 113

4. Novel Antibacterials: Alternatives to Traditional Antibiotics	123
Jonathan W. Betts, Michael Hornsey, and Roberto M. La Ragione	
1. Introduction	124
2. Phytochemicals	125
3. Metals	141
4. Conclusions	155
References	156
Further Reading	169
5. Biotechnological Applications of Bioactive Peptides From Marine Sources	171
Daniela Giordano, Maria Costantini, Daniela Coppola, Chiara Lauritano, Laura Núñez Pons, Nadia Ruocco, Guido di Prisco, Adrianna Ianora, and Cinzia Verde	
1. Marine Biotechnology in the Genomic and Postgenomic Era	172
2. Marine Bioactive Peptides	175
3. Marine Peptides With Antimicrobial Activity	180
4. Marine Peptides With Anticancer Activity	197
5. Other Activities	201
6. Conclusions and Future Perspectives	204
Acknowledgments	205
References	205
