ix

1. Karyosphere (Karyosome): A Peculiar Structure of the Oocyte Nucleus

1

Dmitry S. Bogolyubov

1. Introduction 2
2. Karyosphere vs Karyosome: A Brief History of Discovery and Terminological Background 4
3. Karyosphere With Capsule 7
4. Karyosphere Without Capsule (the Karyosome) 11
5. Closing Remarks 36
- Acknowledgments 38
- References 38

2. Organoids for Modeling Genetic Diseases

49

Maria Perez-Lanzon, Guido Kroemer, and Maria Chiara Maiuri

1. Introduction 51
2. Genetic Disorders Modeled With Organoids 54
3. Conclusions and Perspectives 69
- Acknowledgments 71
- References 72

3. Lipid Droplets as Organelles

83

Sarah Cohen

1. Introduction 84
2. LD Biogenesis 84
3. LD Maturation and Heterogeneity 88
4. LD Fusion and Fission 92
5. Interactions Between LDs and Other Organelles 95
6. LD Turnover 98
7. Conclusions and Future Perspectives 102
- Acknowledgments 103
- References 103

4. The Lymphatic Fluid	111
Laura Santambrogio	
1. Introduction	112
2. Lymph Formation	112
3. Lymph Circulation	116
4. Lymph Proteomics	117
5. The Lymph Peptidome	124
6. Immunological Role of the Lymph-Carried Proteome and Peptidome	125
References	127
5. Apoptosis and Cancer: Force Awakens, Phantom Menace, or Both?	135
Kai Cao and Stephen W.G. Tait	
1. Apoptosis vs Cancer—A New Hope	135
2. Unleashing the Force—Apoptotic Signaling Pathways	136
3. Cancer Strikes Back: Apoptosis as an Oncogenic Driver	139
4. Flying Casual: Nonlethal, Oncogenic Roles for Apoptotic Proteins	144
5. Help Me Apoptosis. You Are My Only Hope: Targeting Oncogenic Effects of Apoptosis in Cancer Therapy	145
6. Outlook	147
Acknowledgments	148
References	148
6. Crosstalk of Autophagy and the Secretory Pathway and Its Role in Diseases	153
Muhammad Zahoor and Hesso Farhan	
1. The Secretory Pathway	154
2. Autophagy	157
3. The Link Between Autophagy and the Secretory Pathway	159
4. Secretory Autophagy	169
5. The Role of the Crosstalk Between Autophagy and Secretion in Diseases	172
6. Concluding Remarks	175
Acknowledgments	176
References	176
7. Intracellular Pressure: A Driver of Cell Morphology and Movement	185
Pragati Chengappa, Kimheak Sao, Tia M. Jones, and Ryan J. Petrie	
1. Introduction	186
2. A Brief History of Intracellular Pressure	187

3. Generation of Intracellular Pressure	189
4. Cell Morphology and Pressure	196
5. Dynamic Pressure and Migratory Plasticity	198
6. Intranuclear Pressure	202
7. Conclusions	205
Acknowledgments	205
References	206
Further Reading	211
