Preface to Volume 100: History and Looking Forward xv

Thomas C. Mettenleiter, Margaret Kielian and Marilyn J. Roossinck

1. The Species Problem in Virology 1

Marc H.V. Van Regenmortel

1. Introduction 1
2. The Logic of Hierarchical Virus Classification 3
3. Definitions of Virus Species 4
4. Diagnostic Markers Useful for Virus Identification Are Not Species-Defining Properties 8
5. Only Viruses But Not Their Genome Sequences Can Be Classified Into Species and Genus Classes 10
6. The Current Debate on Non-Latinized Binomial Names of Virus Species 13
- Acknowledgments 15
- References 15
- Further Reading 18

2. The Role of Immune Responses in HIV Mother-to-Child Transmission 19

Caitlin Milligan, Jennifer A. Slyker, and Julie Overbaugh

1. Introduction 20
2. Epidemiology of HIV MTCT 20
3. Modes and Mechanisms of Transmission 21
4. Current Approaches to Prevention of MTCT 23
5. Harnessing the Immune Response for Prevention of MTCT: Humoral Immune Correlates of HIV MTCT 24
6. The Role of Cellular and Innate Immunity in HIV MTCT 28
7. The Way Forward: The Future of Prevention of HIV MTCT 30
8. Conclusions 33
- Acknowledgments 33
- References 33

3. African Swine Fever Virus Biology and Vaccine Approaches	41
Yolanda Revilla, Daniel Pérez-Núñez, and Juergen A. Richt	
1. Emergence and Host Range of African Swine Fever Virus	42
2. Virus Transmission and Spread	43
3. Molecular Biology of the Virus	43
4. Virus Entry, Intracellular Traffic, and Viral Machinery of Translation	46
5. African Swine Fever Virus Genes Modulating Host Responses	53
6. African Swine Fever Virus Vaccines	55
Acknowledgments	63
References	63
4. Morbillivirus Pathogenesis and Virus-Host Interactions	75
Kristin Pfeffermann, Mareike Dörr, Florian Zirkel, and Veronika von Messling	
1. Introduction	76
2. History	76
3. Genome Organization	79
4. Infection Cycle	81
5. Similarities and Differences in Morbillivirus Disease Manifestation	82
6. Morbillivirus-Associated Neurological Complications	84
7. Morbillivirus-Host Interactions	85
8. Conclusions	88
References	89
Further Reading	98
5. Viruses of Plant-Interacting Fungi	99
Bradley I. Hillman, Aulia Annisa, and Nobuhiro Suzuki	
1. Introduction	100
2. Types of Virus/Host Interactions	101
3. Types of Virus/Virus Interactions	104
4. Conclusions and Prospects	111
Acknowledgments	112
References	112
6. Protein Localization and Interaction Studies in Plants: Toward Defining Complete Proteomes by Visualization	117
Michael M. Goodin	
1. Introduction	118
2. The Perfect Image	119

3. Getting Started: What Is the Question That Needs to Be Addressed?	122
4. A Startling Array of Imaging Technologies and Instrumentation	124
5. Validating Expression	125
6. Points of Reference	126
7. Avoiding Cross Talk	127
8. Colocalization: What It Is, and What It Is Not	128
9. Does the Localization Pattern Make Biological Sense?	130
10. What Supporting Data Are Needed?	130
11. The Published Micrograph Is the Localization Pattern	134
12. The Case for a Protein Atlas for Plant Proteins	135
13. The Nucleus in Virus-Host Interactions	136
14. Brief Protocol for Expression of Proteins in Plant Cells Using Agroinfiltration	137
Acknowledgments	139
References	139

7. So What Have Plant Viruses Ever Done for Virology and Molecular Biology? **145**

George P. Lomonosoff

1. Introduction	146
2. Biochemical Characterization	148
3. Structural Studies	149
4. Life Created in a Test-Tube	152
5. Molecular Genetics	153
6. Genomic Sequences	154
7. Reverse Genetics of RNA Viruses	155
8. Gene Silencing	156
9. Bio- and Nanotechnology	156
10. Conclusion	157
Acknowledgments	157
References	158

8. Hosts and Sources of Endemic Human Coronaviruses **163**

Victor M. Corman, Doreen Muth, Daniela Niemeyer, and Christian Drosten

1. Introduction	164
2. HCoV-NL63	170
3. HCoV-229E	173
4. HCoV-OC43	175
5. HCoV-HKU1	177
Acknowledgment	179
References	179

9. Filoviruses: Ecology, Molecular Biology, and Evolution	189
Jackson Emanuel, Andrea Marzi, and Heinz Feldmann	
1. Introduction	190
2. Taxonomy	191
3. Virus Ecology	192
4. Filoviral Particles	198
5. Viral Life Cycle	206
6. Evolution	210
7. Future Perspectives	212
Acknowledgments	212
References	212
 10. An Orchestra of Reovirus Receptors: Still Searching for the Conductor	 223
Danica M. Sutherland, Pavithra Aravamudhan, and Terence S. Dermody	
1. Introduction	224
2. Reovirus Background	226
3. Sialic Acid Is a Serotype-Specific Reovirus Attachment Factor	228
4. Junctional Adhesion Molecule A Is Required for Hematogenous Dissemination of Reovirus	232
5. Nogo-66 Receptor 1 Is a Neural Receptor for Reovirus	235
6. Concluding Thoughts	237
Acknowledgments	239
References	240
 11. Antiviral Immune Response and the Route of Infection in <i>Drosophila melanogaster</i>	 247
Juan A. Mondotte and Maria-Carla Saleh	
1. Introduction	248
2. Routes of Infection	249
3. <i>Drosophila</i> : Most Common Modes of Infection	252
4. Infection Outcomes and Immune Responses	254
5. <i>Drosophila</i> Antiviral Immune Responses Upon Different Routes and Modes of Infection	255
6. Virus-Bacteria Interactions	266
7. The Most Studied <i>Drosophila</i> Virus: DCV	267
8. DCV Tropism and the Infection Mode	269
9. Conclusions and Future Perspectives	271
Acknowledgments	272
References	272

12. Changing Role of Wild Birds in the Epidemiology of Avian Influenza A Viruses	279
Rogier Bodewes and Thijs Kuiken	
1. Introduction	280
2. Circulation of LPAIV Among Wild Birds	281
3. Transmission of LPAIV From Wild Birds to Poultry	284
4. The Emergence of HPAIV H5N1 in 1997, and Its Spillover to Wild Birds From 2002 to 2005	285
5. Continued Detection of HPAIV H5N1 in Wild Birds, 2006–11	287
6. Global Spread of HPAIV Clade 2.3.4.4 H5N8, 2014–16	289
7. Routes of Spread of HPAIV From Poultry to Wild Birds	291
8. Wild Waterbirds as a Long-Distance Vector of HPAIV	292
9. Wild Birds as a Maintenance Reservoir of HPAIV?	294
10. Discussion	294
References	296
13. Intracellular Antiviral Immunity	309
Maria Bottermann and Leo C. James	
1. Pattern Recognition Receptors in Antiviral Defense	312
2. TRIM Proteins in Innate Immunity	320
Acknowledgments	341
References	341
14. How Does Vaccinia Virus Interfere With Interferon?	355
Geoffrey L. Smith, Callum Talbot-Cooper, and Yongxu Lu	
1. Introduction to Vaccinia Virus	356
2. Interferons	359
3. Preventing Production of IFN	364
4. Blocking Binding of IFNs to IFN Receptors	368
5. Blocking IFN-Induced Signaling Pathways	369
6. Blocking the Antiviral Action of ISGs	370
7. Summary	371
Acknowledgments	371
References	371
