

Contents

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
1. Genomics of forest trees	1
Nathaniel Robert Street	
1. Overview	2
2. Genome assembly and annotation	3
3. Transcriptome assembly and profiling	13
4. Epigenetics	21
5. Population scale genomics	24
6. Genomic resources	27
References	28
2. Resources for conifer functional genomics at the omics era	39
Rafael A. Cañas, M ^a Belén Pascual, Fernando N. de la Torre, Concepción Ávila, and Francisco M. Cánovas	
1. Introduction	40
2. Resources	42
3. Conclusions and perspectives	63
Acknowledgements	63
References	63
3. The ectomycorrhizal contribution to tree nutrition	77
Adeline Becquer, Carmen Guerrero-Galán, Janice L. Eibensteiner, Gabiella Houdinet, Heike Bücking, Sabine D. Zimmermann, and Kevin Garcia	
1. Introduction	78
2. Evolution and diversity of ectomycorrhizas	79
3. Structure of ectomycorrhizas	81
4. Importance of ectomycorrhizal fungi for forest ecosystems	84
5. The hydro-mineral nutrition of ectomycorrhizal trees	86
6. Future challenges and concluding remarks	110
Acknowledgements	111
References	111

4. Nitrogen storage and cycling in trees	127
Gen Li and Gary D. Coleman	
1. Introduction	127
2. Physiology of N storage and cycling	129
3. Biochemical and molecular aspects of N storage and cycling	133
4. Nitrogen remobilization	142
5. Future directions	145
Acknowledgements	146
References	146
5. Embryology in conifers	157
Sara von Arnold, David Clapham, and Malin Abrahamsson	
1. Introduction	158
2. Zygotic embryo development	159
3. Somatic embryo development	166
4. Molecular regulation of zygotic and somatic embryo development	169
5. Conclusion	177
Appendix. Breeding of conifers	178
References	179
6. Activity of the shoot apical and cambial meristems: Coordination and responses to environmental signals	185
Rita Teresa Teixeira, Xiaoyan Sheng, and Amy M. Brunner	
1. Introduction	185
2. Coordination during growth	186
3. The seasonal cycle: Responses to photoperiod and temperature signalling	191
4. Conclusions	194
Acknowledgement	196
References	196
7. Digging in wood: New insights in the regulation of wood formation in tree species	201
Eduardo L.O. Camargo, Raphaël Ployet, Hua Cassan-Wang, Fabien Mounet, and Jacqueline Grima-Pettenati	
1. Introduction	202
2. Hormonal control of wood formation	204
3. Main actors of the SW regulatory network: NACs and MYBs	212
4. Post-transcriptional and post-translational regulations of the SW regulators	223
