<i>Nucleic Acid Sensing at the Interface Between Innate and Adaptive Immunity</i>	xi
1. Discrimination Between Self and Non-Self-Nucleic Acids by the Innate Immune System	1
Takumi Kawasaki and Taro Kawai	
1. Introduction	2
2. Intracellular Nucleic Acid Sensors	3
3. Extracellular Nucleic Acid Recognition	8
4. Modifications Enabling DNA Discrimination	10
5. Modifications Allowing RNA Discrimination	13
6. Endogenous Nucleic Acids as DAMPs	15
7. Endogenous Nucleotides Facilitate Inflammation	17
8. Conclusion	19
Acknowledgment	20
References	20
2. Intracellular RNA Sensing in Mammalian Cells: Role in Stress Response and Cancer Therapies	31
Nikolai N. Khodarev	
1. Introduction	34
2. Overview of RNA Sensing Systems in Mammalian Cells	35
3. Discrimination of Self From Non-Self RNA. RNA Stress as an Aberrant Recognition of Self-RNAs	47
4. Endogenous Ligands of RNA Sensors as Stress-Induced DAMPs	51
5. Epigenetic Silencing and Chromatin Conformation in Regulation of RNA DAMPs	61
6. Intercellular and Intracellular Redistribution of RNA DAMPs	63
7. Stress Granules, P-Bodies, and PML Nuclear Bodies as Cellular Compartments of RNA Stress Response and IFN Signaling	64
8. Relationships Between RNA-Dependent and DNA-Dependent Pathways in Tumor and Host Immune Cells	66
9. Role of RNA Sensors in Conventional Therapy and Immunotherapy of Cancer	69
10. Concluding Remarks and Future Directions	76
Acknowledgments	77
References	77
	v

3. Negative Regulation of Cytosolic Sensing of DNA	91
Takayuki Abe and Sagi D. Shapira	
1. Introduction	91
2. Candidate Sensors of Intracellular DNA	93
3. DNA Sensing via the cGAS/STING Pathway	95
4. Regulation of cGAS/STING Dependent Signaling	97
5. Auto-Inflammatory Responses Mediated by cGAS/STING	101
6. Viral Strategies to Modulate cGAS/STING Function	103
7. Modulation of Innate Immune Response by NLRs	105
8. NLRP14: A New Rheostat of Cytosolic Nucleic Acid Sensing	107
9. Concluding Remarks	109
Acknowledgments	110
References	110
4. Nucleic Acid Sensing Perturbation: How Aberrant Recognition of Self-Nucleic Acids May Contribute to Autoimmune and Autoinflammatory Diseases	117
Valentina Bordignon, Ilaria Cavallo, Giovanna D'Agosto, Elisabetta Trento, Martina Pontone, Elva Abril, Enea Gino Di Domenico, and Fabrizio Ensoli	
1. Introduction	118
2. Principles of Nucleic Acid Sensing	119
3. The Nucleic Acid Receptors	120
4. Innate Immune Detection of Microbial Nucleic Acids	121
5. Nucleic Acid Sensing by TLRs of the PRR Family in Distinct Cellular Compartments	121
6. Can Sequence Patterns Influence Recognition?	124
7. Regulation of DNA Sensing	125
8. TLRs and Autoimmunity	126
9. Commensals: A Potent Player in Immunity	128
10. Do Microbes Have a Role in Autoimmunity?	130
11. Gut Microbiota and Autoimmunity: The Future	131
12. Methods	132
References	132
5. Common Differences: The Ability of Inflammasomes to Distinguish Between Self and Pathogen Nucleic Acids During Infection	139
Christopher R. Lupfer, Meagan D. Rippee-Brooks, and Paras K. Anand	
1. Introduction	140
2. Overview of the AIM2 Inflammasome	141

3. NLRP3: The Omniscient Inflammasome	151
4. The IFI16 Inflammasome	153
5. NLRP9b: The Newest Nucleic Acid Sensing Inflammasome	160
6. Nucleic Acid Sensing Inflammasomes in Autoinflammation and Autoimmunity	160
7. Conclusions	162
Acknowledgments	164
References	164
6. Activating the Nucleic Acid-Sensing Machinery for Anticancer Immunity	173
Terry Medler, Jaina M. Patel, Alejandro Alice, Jason R. Baird, Hong-Ming Hu, and Michael J. Gough	
1. Introduction	174
2. Overview of Nucleic Acid Sensors	177
3. DNA Sensing in Tumorigenesis Versus Treatment	184
4. Exogenous Activation by Administration of Ligands	186
5. Endogenous Nucleic Acid Sensor Activation by Host Ligands	190
6. Does Cancer Have a Particular Tendency to Activate Nucleic Acid Sensors?	193
7. Role of DNA Damaging Agents in Cancer Treatment	199
8. Conclusions	202
Funding	203
References	203
7. Cytosolic Nucleic Acid Sensors in Inflammatory and Autoimmune Disorders	215
Shahanshah Khan, Victoria Godfrey, and Md. Hasan Zaki	
1. Introduction	216
2. The cGAS-STING Pathway	218
3. The RNA Sensor RIG-I-Like Receptors (RLRs)	224
4. The DNA Sensor AIM2	229
5. DNA Sensor IFI16	234
6. Additional Cytoplasmic Nucleic Acid Sensors	236
7. Conclusion	238
Acknowledgement	238
References	238
