Preface

xix

1. Characterizing the Role of Exoribonucleases in the Control of Microbial Gene Expression: Differential RNA-Seq 1

Vânia Pobre and Cecília M. Arralano

1. Overview of Exoribonucleases	2
2. Overview of Differential RNA-Seq	6
3. RNA Extraction	10
4. Bioinformatics Analysis	11
5. Experimental Validation	17
6. Conclusion	19
Acknowledgments	19
References	19

2. Conformational Studies of Bacterial Chromosomes by High-Throughput Sequencing Methods 25

Virginia S. Lloy and Frédéric Boccard

1. Introduction	26
2. 3C-Seq: The Protocol	30
3. ChIP-Seq: The Protocol	37
4. Data Processing and Analysis	41
5. Conclusion	43
Acknowledgments	43
References	43

3. Large-Scale Measurement of mRNA Degradation in *Escherichia coli*: To Delay or Not to Delay 47

Sandrine Laguerre, Ignacio González, Sébastien Nouaille, Annick Moisan,
Nathalie Villa-Vialaneix, Christine Gaspin, Marie Bouvier,
Agamemnon J. Carpousis, Muriel Cocaïgn-Bousquet, and Laurence Girbal

1. Introduction	48
2. Measuring mRNA Degradation Rates	50
3. Genome-Wide mRNA Quantification	52
4. mRNA Half-Life Estimation	53

5. Effect of the Delay Before the Onset of Exponential Decay on mRNA Half-Life Estimation	55
6. Concluding Remarks	63
Acknowledgments	64
References	64
4. FASTBAC-Seq: Functional Analysis of Toxin–Antitoxin Systems in BACteria by Deep Sequencing	67
Sara Masachis, Nicolas J. Tourasse, Sandrine Chabas, Olivier Bouchez, and Fabien Darfeuille	
1. Introduction	68
2. Materials	69
3. Methods: A High-Throughput Genetic Selection of Intrinsic Toxicity Suppressors in Six Steps	72
4. A Case Study: Decoding AapA3 Peptide Toxicity Determinants With Nucleotide Resolution	92
5. Conclusions	95
Acknowledgments	98
References	98
5. The Challenges of Genome-Wide Studies in a Unicellular Eukaryote With Two Nuclear Genomes	101
Sandra Duhaucourt and Linda Sperling	
1. Introduction	102
2. Protocol: Separating the Micronucleus From the Macronucleus	106
3. Analysis of Sequence Data	112
4. Perspectives and Limits	122
Acknowledgments	123
References	123
6. CLIP-Seq in Bacteria: Global Recognition Patterns of Bacterial RNA-Binding Proteins	127
Liis Andresen and Erik Holmqvist	
1. Introduction	128
2. Method Overview	129
3. Experimental Method	133
Acknowledgments	143
References	143

7. High-Resolution Profiling of NMD Targets in Yeast	147
Feng He, Alper Celik, Richard Baker, and Allan Jacobson	
1. Introduction	148
2. Construction of Strand-Specific RNA-Seq Libraries From Wild-Type and NMD-Deficient Yeast Cells	150
3. Sequencing of Total RNA cDNA Libraries From Wild-Type and NMD-Deficient Yeast Cells	169
4. Identification of Transcripts Targeted by NMD	169
5. Summary and Conclusions	178
Acknowledgments	178
References	179
8. Generation of a Metagenomics Proximity Ligation 3C Library of a Mammalian Gut Microbiota	183
Théo Foutel-Rodier, Agnès Thierry, Romain Koszul, and Martial Marbouty	
1. Introduction	184
2. Meta3C Library Preparation	187
References	194
9. Genome-Wide Mapping of Yeast Retrotransposon Integration Target Sites	197
Anastasia Barkova, Amna Asif-Laidin, and Pascale Lesage	
1. Introduction	198
2. Materials	200
3. Recovery of Independent Insertion Events	207
4. Total Genomic DNA Preparation	209
5. De Novo Ty1 Insertion DNA Library Preparation	213
6. Data Annotation and Analysis	218
7. Concluding Remarks	220
Acknowledgments	221
References	221
10. Genome-Wide Quantitation of Protein Synthesis Rates in Bacteria	225
Grace E. Johnson and Gene-Wei Li	
1. Introduction	226
2. Cell Collection, Ribosome Footprinting, and Monosome Isolation	228
3. Library Preparation	234
4. Analysis	246
5. Conclusion	248
References	249

11. On the Prowl: An In Vivo Method to Identify RNA Partners of a sRNA	251
Marie-Claude Carrier, Claire Morin, and Eric Massé	
1. Introduction	252
2. MS2-sRNA: Experimental Design Considerations	253
3. Samples Preparation	255
4. Processing the RNAseq Data Files	261
5. Following the RNAseq: Biomolecular Characterization of Interacting Partners	264
6. Summary and Conclusion	265
Acknowledgments	266
References	266
12. Analysis of Bacterial Transcription by "Massively Systematic Transcript End Readout," MASTER	269
Irina O. Vvedenskaya, Seth R. Goldman, and Bryce E. Nickels	
1. Introduction	270
2. Construction of MASTER Template Library	272
3. Transcription Assays	282
4. High-Throughput Sequencing of RNA 5' Ends (5' RNA-Seq)	288
5. Conclusions	299
References	300
13. Transcriptomic Approaches for Studying Quorum Sensing in <i>Vibrio cholerae</i>	303
Roman Herzog and Kai Papenfort	
1. Introduction	304
2. Discovery of Small Regulatory RNAs Using Differential RNA-Seq	307
3. Identification of sRNA Target Genes	317
4. Validation of sRNA-Target Interactions	325
5. Summary and Outlook	336
Acknowledgments	337
References	338
14. In Vitro Study of the Major <i>Bacillus subtilis</i> Ribonucleases Y and J	343
Liliana Mora, Saravuth Ngo, Soumaya Laalami, and Harald Putzer	
1. Introduction	344
2. RNase Y	345
3. RNase J	351

4. Conclusion	354
Acknowledgments	354
Appendices	354
References	358
15. Mapping 5'-Ends and Their Phosphorylation State With EMOTE, TSS-EMOTE, and nEMOTE	361
Peter Redder	
1. Introduction	362
2. EMOTE	365
3. TSS-EMOTE	372
4. nEMOTE	376
5. Tips and Advice on the Analyses of EMOTE Data	379
6. Adapting the EMOTE Oligos to Specific Needs	384
References	390
16. MS2-Affinity Purification Coupled With RNA Sequencing Approach in the Human Pathogen <i>Staphylococcus aureus</i>	393
David Lalaouna, Emma Desgranges, Isabelle Caldelari, and Stefano Marzi	
1. Introduction	394
2. MAPS Protocol Applied to <i>S. aureus</i>	396
Acknowledgments	407
Funding	407
References	407
17. Noncoding RNAs in Archaea: Genome-Wide Identification and Functional Classification	413
Anne Buddeweg, Michael Daume, Lennart Randau, and Ruth A. Schmitz	
1. Introduction	414
2. Systems Biology View of Archaeal Noncoding RNA Families	415
3. Approaches for Identification of Archaeal Noncoding RNAs	425
4. Detailed Method for Identification of L7Ae Interactome	430
5. Perspectives and Discussion	436
References	438
18. Methodology for Ribosome Profiling of Key Stages of the <i>Caulobacter crescentus</i> Cell Cycle	443
James R. Aretakis, Nadra Al-Husini, and Jared M. Schrader	
1. Introduction	444
2. <i>Caulobacter</i> Cell Cycle Ribosome Profiling	444

3. Summary and Conclusion	464
Acknowledgments	464
Competing Interests	464
References	464
19. Transcriptome-Wide Analysis of Protein-RNA and RNA-RNA Interactions in Pathogenic Bacteria	467
Jai J. Tree, Kenn Gerdes, and David Tollervey	
1. Introduction	468
2. Primary Purification and Trimming of RNA-Protein Complexes	472
3. Preparation of RNA 5' and 3' Ends for Linker Ligation and Intermolecular Ligation of RNA-RNA Interactions	475
4. Size Separation of RNA-Protein Complexes	479
5. Preparation of Sequencing Libraries From Purified, Linker-Ligated RNA Fragments	482
6. In Silico Analysis of RNA-Protein Interaction Sites and RNA-RNA Interactions	484
References	486
20. Profiling RNA Polymerase II Phosphorylation Genome-Wide in Fission Yeast	489
Tea Kecman, Dong-Hyuk Heo, and Lidia Vasiljeva	
1. Introduction	489
2. Methods	491
3. Conclusions	502
References	503
21. Toward Cell Type-Specific In Vivo Dual RNA-Seq	505
Lutz Frönicke, Denise N. Bronner, Mariana X. Byndloss, Bridget McLaughlin, Andreas J. Bäuml, and Alexander J. Westermann	
1. Introduction	506
2. Infection of C57BL/6J Mice With <i>S. Typhimurium</i> and Colonocyte Isolation	507
3. Antibody Staining, Fixation, and Cell Sorting	511
4. RNA Extraction, DNase I Treatment, Ribo-Depletion, cDNA Synthesis, and Sequencing	514
5. Summary and Conclusion	520
Acknowledgments	520
References	520

22. Genomic Analysis of DNA Double-Strand Break Repair in <i>Escherichia coli</i>	523
A.M. Mahedi Hasan, Benura Azeroglu, and David R.F. Leach	
1. Introduction	524
2. Experimental Methods	527
3. Conclusions	551
Acknowledgments	551
References	551
