## 1

### MEDICAL MICROBIOLOGY AND BIOCHEMISTRY

#### 1. Recent Findings of *Lactobacillus* Diversity and Their Functional Role in Vaginal Ecosystems

SUBRAMANYAM DASARI

1.1 Introduction 3  
1.2 Vaginal (Birth Canal) Microbial  
Community 4  
1.3 *Lactobacillus*-Dominated Vaginal Microbiota 5  
1.4 Geographical Diversity of Vaginal  
*Lactobacillus* 6  
1.5 Functional Diversity in Vaginal *Lactobacillus* 7  
1.6 Conclusion 10  
References 10

#### 2. Role of Maternal Microorganisms in the Development of the Immune System

AVILALA JANARDHAN

2.1 Introduction 13  
2.2 Human Microbiota 14  
2.3 Early Microbiota in Infants 15  
2.4 Maternal Immune System During Pregnancy 15  
2.5 Microbial Changes During Pregnancy and  
Birth 16  
2.6 Maternal Microbiome Influence on Development  
of Neonatal Immune System 17  
2.7 Conclusion and Future Prospective 18  
References 19

#### 3. Microbial Proteomics and Their Importance in Medical Microbiology

CHANDRASEKHAR KATHERA

3.1 Introduction 21  
3.2 Understanding Host-Pathogen Interactions and  
Infectious Diseases 22  
3.3 Clinical Microbiology and Current  
Problems 24  
3.4 Role of MALDI-TOF- in Diagnosis 25  
3.5 Role of Proteomics in Medical Microbiological  
Research and Diagnosis 25  
3.6 Importance of MALDI-TOF MS in Identification  
of Pathogenic Microorganisms 26  
3.7 Role of Proteomics in Development of Therapy  
and Vaccine 28  
3.8 Future Perspectives 28  
Acknowledgments 29  
Conflicts of Interests 29  
References 29

#### 4. Importance of Probiotics in Cancer Prevention and Treatment

ANSHUL SHARMA

4.1 Introduction 33  
4.2 Probiotics and Possible Mechanisms in Cancer  
Prevention and Management 34  
4.3 Nutrition, Diet, and Risk Assessment 42  
4.4 Conclusion and Future Perspectives 43  
References 43

#### 5. Recent Developments in the Prevention of Obesity by Using Microorganisms

MUNI SWAMY GANJAYI, MERIGA BALAJI,  
DASARI SREENIVASULU, HARI BALAJI,  
REDDY SANKARAN KARUNAKARAN

5.1 Introduction 47  
5.2 Digestion of Fat Foods 51  
5.3 Gut Microbes: Role in Human Health 51

- 5.4 Therapies for Prevention and Treatment of Obesity 54  
 5.5 Conclusion 58  
 References 58  
 Further Reading 60

## 6. Emerging Trends in the Development of Plant Virus-Based Nanoparticles and Their Biomedical Applications

M. HEMA, G.P. VISHNU VARDHAN, H.S. SAVITHRI,  
 M.R.N. MURTHY

- 6.1 Introduction 61  
 6.2 Icosahedral PVNs 63  
 6.3 Helical PVNs 69  
 6.4 Conclusions 75  
 Acknowledgments 75  
 References 75  
 Further Reading 82

## 7. Functional and Protective Role of Neutralizing Antibodies (NAbs) Against Viral Infections

NARAYANAIAH CHEEDARLA, LUKE ELIZABETH HANNA

- 7.1 Introduction 84  
 7.2 Virus Neutralization: Definition 84  
 7.3 Mechanisms of Neutralization 85  
 7.4 Host Immune Responses to HIV 85  
 7.5 Classification of Broadly Neutralizing Antibodies 87  
 7.6 Major Target Sites of Broadly Neutralizing Antibodies on the Envelope of HIV-1 88  
 7.7 Concluding Remarks 91  
 Acknowledgments 91  
 Conflicts of interests 92  
 References 92

## 2

# MICROBIAL BIOTECHNOLOGY

## 8. Recent Advances in the Industrial Production of L-Lysine by Bacteria

HAMSA D. TADEPALLY

- 8.1 Introduction 97  
 8.2 Production Statistics of L-Lysine 98

- 8.3 L-Lysine and the Aspartate Family 98  
 8.4 Feedback Regulation in Different Bacteria 100  
 8.5 Historical Background and Methods of Lysine Production 100  
 8.6 Industrial Production of L-Lysine—Types of Fermentation Processes Used 101  
 8.7 Advances and Developments in the Raw Material and Production Strain Choices That Determine Effective L-Lysine Production 103  
 8.8 Application of Genetic Tools and Metabolic Engineering Strategies to Increase Industrial Production of L-Lysine 104  
 8.9 Conclusions and Perspectives 105  
 Acknowledgments 105  
 Conflicts of interests 105  
 References 106

## 9. Emerging Trends in the Industrial Production of Chemical Products by Microorganisms

PANDEETI EMMANUEL VIJAY PAUL, VEERAJAH SANGEETHA, ROUTHU GYANA DEEPIKA

- 9.1 Introduction 108  
 9.2 Breakthrough in Enabling Technologies 109  
 9.3 Products of Microbial Conversions 110  
 9.4 Advantages 113  
 9.5 Examples for Biocatalysis Reactions 114  
 9.6 Microbial Production of Organic Acids 117  
 9.7 Microbial Production of Amino Acids 118  
 9.8 Conclusion 121  
 Acknowledgments 121  
 Conflicts of interests 121  
 References 121  
 Further Reading 124

## 10. Current Advances in the Protection of Viral Diseases in Aquaculture With Special Reference to Vaccination

BESTHA LAKSHMI, SHAMEER SYED, VISWANATH BUDDOLLA

- 10.1 Introduction 128  
 10.2 Recent Viral Disease Outbreaks in Farmed Fish 128  
 10.3 Ontogeny of the Fish Immune System 135  
 10.4 Vaccination of Fish 138  
 10.5 Importance of Probiotics to Treat Viral Diseases 141  
 10.6 Conclusions 143

Acknowledgments 143  
 Conflicts of interests 143  
 References 143  
 Further Reading 146

### 11. Comparative Biochemistry and Kinetics of Microbial Lignocellulolytic Enzymes

MUNI RAMANNA GARI SUBHOSH CHANDRA,  
 MEKAPOGU MADAKKA

11.1 Introduction 148  
 11.2 Lignocellulose Degradation by Fungi 148  
 11.3 Lignocellulolytic Enzyme-Producing Fungi 148  
 11.4 Purification and Characterization of Lignocellulolytic Enzymes 151  
 11.5 Kinetics of Lignocellulolytic Enzymes 154  
 11.6 Conclusion 155  
 References 156  
 Further Reading 159

### 12. Future Prospects of Biodiesel Production by Microalgae: A Short Review

MYLA SUNIL KUMAR, VISWANATH BUDDOLLA

12.1 Introduction 161  
 12.2 Summary of Pathways for Microalgal Biodiesel/Fuel Production 162  
 12.3 Recent Insights Into the Development of Biodiesel Production From Microalgae and Future Prospects 163  
 12.4 Conclusions 165  
 Acknowledgments 165  
 Conflict of Interest 165  
 References 165

### 13. Genetic and Metabolic Engineering of Microorganisms for the Production of Various Food Products

NIMGAMPALLE MALLIKARJUNA, KUNA YELLAMMA

13.1 Introduction 168  
 13.2 Role of Microorganisms in Food Industry 168  
 13.3 Importance of Genetic and Metabolically Engineered Microbes in Food Industry 169  
 13.4 Strategies involved in Genetic and Metabolic Engineering of Microorganisms 171

13.5 Recent Developments in the Production of Engineered Microbes in Food Industry 174  
 13.6 Health Benefits of Various Microbial Food Products 179  
 13.7 Future Prospective 180  
 13.8 Conclusion 180  
 Acknowledgment 181  
 References 181

## 3

## SOIL AND AGRICULTURE MICROBIOLOGY

### 14. Effective Role of Microorganisms in Livestock Development

DILIP REDDY GUNTURU, MURALIDHAR YEGIREDDY,  
 SRAVANTHI MANNEM, ALPHA RAJ MEKAPOGU, N.VK.V.  
 PRASAD TOLLAMADUGU

14.1 Introduction 185  
 14.2 Importance of Probiotics in Livestock Development 186  
 14.3 Role of Microorganisms in Ruminant Animals 186  
 14.4 Applications of Microbes/Probiotics in Other Animals 187  
 14.5 Other Applications of Microorganisms in Animal Production 189  
 14.6 Possible Mechanism of Actions of Probiotics in Animals 190  
 14.7 Conclusion 191  
 Acknowledgments 191  
 Conflicts of Interests 191  
 References 191

### 15. The Status of Research and Application of Biofertilizers and Biopesticides: Global Scenario

MARELLA SARITHA, N.VK.V. PRASAD TOLLAMADUGU

15.1 Introduction 196  
 15.2 Why to Use Bioproducts? 196  
 15.3 N Fixing Inoculants as Biofertilizers 196  
 15.4 Interaction Mechanism of Plant and Microbes 200  
 15.5 Global Market Reports of Bioalternatives 201

- 15.6 Insights Into the Product and Application in Various Regions 203  
 15.7 Limitations in Promotion of Biofertilizer and Biopesticide Consumption 204  
 15.8 Policies & Programs 204  
 15.9 Future Prospects 205  
 15.10 Conclusion 206  
 References 206

### 16. Role of Plant Growth-Promoting Microorganisms as a Tool for Environmental Sustainability

SHAMEER SYED, N.V.K.V. PRASAD TOLLAMADUGU

- 16.1 Introduction 209  
 16.2 PGPMs in Agriculture 211  
 16.3 PGPMs in Bioremediation 219  
 16.4 PGPMs in Bioenergy Crop/Biomass for Energy Production 219  
 16.5 Future Prospects 220  
 Acknowledgments 220  
 Conflict of Interest 220  
 References 221

### 17. Phosphate-Solubilizing Microorganisms and Their Emerging Role in Sustainable Agriculture

MOKULA MOHAMMED RAFI, M.S. KRISHNAVENI,  
 P.B.B.N. CHARYULU

- 17.1 Introduction 224  
 17.2 Phosphate-Solubilizing Microorganisms (PSMs) 224  
 17.3 Mechanism of Phosphate Solubilization 225  
 17.4 PSB as Plant Growth Promoting Rhizobacteria 227  
 17.5 Plant Responses to PSB Inoculation 227  
 17.6 Plant Responses to Co-inoculation of PSB With Diazotrophic Bacteria 229  
 17.7 Vesicular Arbuscular Mycorrhizae (VAM) in Phosphate Solubilization 230  
 17.8 Conclusions 231  
 References 231  
 Further Reading 233

### 18. Microbes in the Generation of Genetically Engineered Plants for Disease Resistance

SHAMEER SYED, N.V.K.V. PRASAD TOLLAMADUGU

- 18.1 Introduction 235  
 18.2 Microbial Sources of Transgenes for Plant Genetic Engineering 238  
 18.3 Attributes Flaunted by the Genetically Engineered Crop Plants 242  
 18.4 Induced Systemic Resistance 245  
 18.5 Conclusion and Future Prospects 246  
 Acknowledgments 246  
 Conflict of Interest 246  
 References 246  
 Further Reading 248

## 4

## ENVIRONMENTAL MICROBIOLOGY

### 19. Recent Approaches in the Production of Novel Enzymes From Environmental Samples by Enrichment Culture and Metagenomic Approach

RAVURI JAYA MADHURI, MADDU SARASWATHI,  
 KRISHNAMOORTHY GOWTHAMI, MARAM BHARGAVI,  
 YARAMOLU DIVYA, VELLURI DEEPIKA

- 19.1 Introduction 252  
 19.2 Production of Novel Enzymes From Environmental Samples by Enrichment Culture 253  
 19.3 Metagenomic Approaches for Detection of Novel Enzymes 256  
 19.4 Metagenomic Strategies for Novel Marine Enzyme Discovery 257  
 19.5 Limitation of Metagenomic Approaches of Novel Biomolecule Prospecting 259  
 19.6 Conclusions 260  
 Acknowledgments 261  
 Conflicts of Interests 261  
 References 261  
 Further Reading 262

## 20. Development in the Treatment of Municipal and Industrial Wastewater by Microorganism

MEKAPOGU MADAKKA, NADIMIKERI JAYARAJU, NAMBI RAJESH, MUNI RAMANNA GARI SUBHOSH CHANDRA

- 20.1 Introduction 263  
 20.2 Types of Bacterial Communities in the Treatment of Municipal and Industrial Wastewater 265  
 20.3 Biological Treatments of Different Wastewaters Using Microorganisms 268  
 20.4 Conclusion 270  
 Acknowledgments 271  
 Conflict of Interest 271  
 References 271

## 21. Emerging Trends of Microorganism in the Production of Alternative Energy

GOLLA RAMANJANEYULU, BONTHA RAJASEKHAR REDDY

- 21.1 Introduction 275  
 21.2 Biofuels 276  
 21.3 Sustainable Energy From Microbes 276  
 21.4 Conclusions 295  
 Acknowledgments 300  
 Conflicts of interests 300  
 References 300  
 Further Reading 305

## 22. Present Status and Future Perspectives of Marine Actinobacterial Metabolites

GURUSHANKARA HUNASANAHALLY  
 PUTTASWAMYGOWDA, SHILPA OLAKKARAN, ANET ANTONY, ANUPAMA KIZHAKKE PURAYIL

- 22.1 Introduction 307  
 22.2 Marine Microbes—Treasure House of Bioactive Molecules 308  
 22.3 Actinobacteria in Marine Environment 309  
 22.4 Secondary Metabolites from Marine Actinobacteria 310  
 22.5 Marine Actinobacteria as a Novel Source of Bioactive Compounds 310  
 22.6 Future Perspectives in Actinobacteria Research 314

- Acknowledgments 315  
 Conflict of Interest 315  
 References 315

# 5

## METHODS IN MICROBIOLOGY

### 23. Status and Recent Developments in Analytical Methods for the Detection of Foodborne Microorganisms

SESHADRI REDDY ANKIREDDY, JONGSUNG KIM

- 23.1 Introduction 323  
 23.2 The Need to Develop New Analytical Methodologies 324  
 23.3 Recently Developed Nanoparticle-Based Biosensing Methods to Detect Foodborne Pathogens 325  
 23.4 Limitations and Prospects for Nanoparticle-Based Biosensors to Detect Foodborne Pathogens 331  
 23.5 Conclusion 332  
 Acknowledgments 332  
 Conflict of Interest 332  
 References 332

### 24. The Impact of Bioinformatics Tools in the Development of Antimicrobial Drugs and Other Agents

SWETHA KUMARI KODURU

- 24.1 Introduction 336  
 24.2 Metagenomic Shotgun Sequencing (MSS) and Taxonomic Diversity 336  
 24.3 Siderophores 338  
 24.4 Drug Resistance 338  
 24.5 Bacterial Functional Genomics 339  
 24.6 Bioinformatics in Gene and Drug Discovery 340  
 24.7 Marine Natural Products 342  
 24.8 Prophylactic Agents 342  
 24.9 Proteomics and Beyond 342  
 24.10 Big Data Analytics 343  
 24.11 Conclusion 344

Acknowledgments	345	25.3	Development of Paper-Based Sensors	351
Conflicts of Interests	345	25.4	Microfluidic Paper-Based Nucleic Acid Test for Virus Sensors	353
References	345	25.5	Sensing Technologies Used in Virus Sensors	354
Further Reading	347	25.6	Limitations of Paper-Based Diagnostics	357
		25.7	Challenges and Future Outlook of Paper-Based Chips	358
			Acknowledgments	358
			References	359
			Index	363
25. Recent Trends in the Development of Paper-Based Diagnostic Chips for the Detection of Human Viruses				
SARAVANAN GOVINDARAJU, MIN HO LEE, KYUSIK YUN				
25.1	Introduction	349		
25.2	Importance of Paper-Based Sensors	351
