Preface to the second edition	xiii
-------------------------------------	------

Part 1 Basic tools and general techniques 1

CHAPTER 1 Equipment and collection methods 5

1.1 Equipment.....	5
1.1.1 Forceps	5
1.1.2 Sample vials	6
1.1.3 Killing bottles.....	6
1.1.4 Small containers.....	6
1.1.5 Small envelopes	7
1.1.6 Aspirators	7
1.1.7 Absorbent tissue.....	7
1.1.8 Notebook	7
1.1.9 Tools for cutting or digging.....	7
1.1.10 Brush	8
1.1.11 Bags.....	8
1.1.12 Hand lens.....	8
1.1.13 Summary	9
1.2 Collecting nets.....	9
1.3 Killing containers and agents.....	13
1.3.1 Freezing insects.....	13
1.3.2 Injecting insects with alcohol	13
1.3.3 Killing jars for field collecting	14
1.3.4 Liquid killing agents	15
1.3.5 Solid killing agents	16
1.4 Aspirators and suction devices	18
1.5 Other collection devices.....	20
1.5.1 Beating sheets	20
1.5.2 Drag cloth.....	20
1.5.3 Sifters	20
1.5.4 Separators and extractors	21
1.6 Traps.....	24
1.6.1 Windowpane trap	25
1.6.2 Interception nets and barriers	26
1.6.3 Malaise traps	26
1.6.4 Pitfall and dish traps	27

1.6.5	Emergence traps and rearing cages	29
1.6.6	Traps using the lobster or eel trap principle	30
1.6.7	Light traps	30
1.6.8	Light sheets	33
1.6.9	Color traps	34
1.6.10	Sticky traps	35
1.6.11	Snap traps	35
1.6.12	Artificial refuge traps	36
1.6.13	Electrical grid traps	36
1.6.14	Combination traps for student studies	36
1.7	Baits, lures, and other attractants	36
1.7.1	Sugaring for insects	37
1.7.2	Feces	38
1.7.3	Oatmeal	39
1.8	Pheromones and other attractants	39
1.8.1	Carbon dioxide	40
1.8.2	Sounds	40
1.9	Collecting aquatic insects	40
1.10	Collecting soil insects	42
1.11	Collecting ectoparasites	42
1.12	Collecting regulated insects	42
1.13	Collecting insects for pest management audits	43
1.14	Collecting insects for forensic or medico-criminal investigations	44
1.15	Rearing	45
1.15.1	Containers for rearing	45
1.15.2	Rearing conditions and problems	48
1.16	Collecting insects for molecular research	51
1.17	Preparation of insects for molecular research	52
1.17.1	Killing agents	52
1.17.2	Preservation of specimens	62
1.17.3	Preservatives in traps	65
1.17.4	Pinned specimens (Natural History Museum Collections)	66
1.17.5	Nondestructive methods	68
1.18	Vouchering specimens	69
CHAPTER 2	Agents for killing and preserving	71
CHAPTER 3	Storage of specimens	73
3.1	Temporary storage	73
3.1.1	Refrigeration	73

3.1.2	Dry preservation.....	73
3.1.3	Papering.....	74
3.2	Mounting specimens	75
3.2.1	Preparing dry specimens for mounting	76
3.2.2	Degreasing.....	78
3.2.3	Preparing liquid-preserved specimens.....	79
3.2.4	Direct pinning	80
3.2.5	Double mounts	83
3.2.6	Pinning blocks.....	87
3.2.7	Mounting and spreading boards and blocks.....	88
3.2.8	Mounting specimens for microscopic examination	96
3.3	Labeling	109
3.3.1	Paper.....	110
3.3.2	Pens	110
3.3.3	Ink.....	110
3.3.4	Lettered and printed labels	110
3.3.5	Size of labels.....	111
3.3.6	Label data.....	111
3.3.7	Placing the labels	113
3.3.8	Labeling vials.....	114
3.3.9	Labeling microscope slides.....	114
3.3.10	Identification labels.....	115
3.4	Care of the collection.....	115
3.4.1	Housing the collection	115
3.4.2	Protecting specimens from pests and mold.....	118
3.5	Packaging and shipping specimens.....	119
3.5.1	Packing materials.....	119
3.5.2	Pinned specimens.....	119
3.5.3	Specimens in vials	120
3.5.4	Loading cartons.....	121
3.5.5	Shipping microscope slides	121
3.5.6	Shipping live specimens	122

Part 2 Classification of insects and mites 125

CHAPTER 4 Classification of insects and mites..... 129

4.1	Key to classes of Arthropoda.....	132
4.2	Class Arachnida.....	135
4.2.1	Key to orders of Arachnida	135

4.3	Subclass Acari	139
4.3.1	Key to some primary groups of the subclass Acari	140
4.4	Classes Diplopoda, Chilopoda, Pauropoda, and Symphyla	142
4.5	Class Crustacea	142
4.6	Class Hexapoda (Insecta).....	143
CHAPTER 5	Synopsis of insect orders	147
5.1	Subclass Entognatha: primitive wingless hexapods	147
5.2	Subclass Ectognatha: primitive wingless hexapods	147
5.3	Subclass Pterygota (Insecta): winged and secondarily wingless insects	148
5.3.1	Exopterygota	148
5.3.2	Endopterygota	150
5.4	Key to orders of hexapoda (Insecta).....	151
CHAPTER 6	Descriptions of hexapod orders	187
6.1	Protura	187
6.2	Diplura	187
6.3	Collembola	188
6.4	Microcoryphia	189
6.5	Thysanura	190
6.6	Ephemeroptera.....	190
6.7	Odonata.....	192
6.8	Orthoptera.....	193
6.9	Blattodea (Blattaria).....	195
6.10	Mantodea	196
6.11	Phasmatodea (Phasmida).....	197
6.12	Grylloblattodea (Grylloblattaria)	198
6.13	Dermaptera	199
6.14	Isoptera	200
6.15	Embiidina (Embioptera).....	202
6.16	Plecoptera	203
6.17	Psocoptera.....	205
6.18	Zoraptera.....	206
6.19	Phthiraptera.....	207
6.20	Thysanoptera	208
6.21	Hemiptera	209
6.22	Coleoptera.....	212
6.23	Strepsiptera	215

6.24 Mecoptera	216
6.25 Neuroptera	217
6.26 Trichoptera	219
6.27 Lepidoptera	220
6.28 Diptera	224
6.29 Siphonaptera	228
6.30 Hymenoptera	229
Summary	235
Appendix I: Liquid preservation formulas	237
Appendix II: Guidelines for mounting small and soft-bodied specimens (Systematic Entomology Laboratory)	239
Appendix III: Directory state extension service directors and administrators, March 2019	243
Appendix IV: Submitting specimens for identification to Systematic Entomology Laboratory Communications & Taxonomic Services Unit	263
Glossary	271
Bibliography	303
Index	331
