

Contents

SECTION I

MECHANOBIOLOGICAL BASIS OF DISEASES

1.1 Osteocyte Mechanobiology in Aging and Disease, 1

*Henry J. Donahue, PhD,
Michael J. Friedman, PhD and
Damian Genetos, PhD*

1.2 Cardiovascular Mechanics and Disease, 23

*Phillippe Sucaskey, PhD, Jason A. Shar, BS
and Johana Barrientos*

1.3 Mechanobiology of the Optic Nerve Head in Primary Open-Angle Glaucoma, 47

*Jr-Jiun Liou, PhD, Jason E. Shoemaker, PhD
and Jonathan P. Vande Geest, PhD*

1.4 The Role of Mechanobiology in Cancer Metastasis, 65

*Maureen E. Lynch, PhD, Corey P. Neu, PhD,
Benjamin Seelbinder, MS and
Kaitlin P. McCreery, BS*

SECTION II

CELLULAR BASIS OF MECHANOBIOLOGY

2.1 Cells as Functional Load Sensors and Drivers of Adaptation, 79

*Matthew Goelzer, MS,
William R. Thompson, DPT, PhD and
Gunes Uzer, PhD*

2.2 Primary Cilia Mechanobiology, 99

*Daniel P. Ahern, MCh, MRCSI, PhD,
Megan R. Mc Fie, MSc, PhD, Clare L.
Thompson, PhD, Michael P. Duffy, MSc, PhD,
Joseph S. Butler, PhD, FRCS and
David A. Hoey, PhD*

2.3 In Vivo Models of Muscle Stimulation and Mechanical Loading in Bone Mechanobiology, 117

Yi-Xian Qin, PhD and Minyi Hu, PhD

SECTION III

EXPERIMENTAL METHODS

3.1 Mechanobiology in Soft Tissue Engineering, 137

*Michael T.K. Bramson, Sarah K. Van Houten
and David T. Corr*

3.2 Intracellular Force Measurements in Live Cells With Förster Resonance Energy Transfer-Based Molecular Tension Sensors, 161

Jing Liu, PhD

SECTION IV

COMPUTATIONAL SIMULATIONS IN MECHANOBIOLOGY

4.1 Multiscale Models Coupling Chemical Signaling and Mechanical Properties for Studying Tissue Growth, 173

*Vijay Velagala, Weitao Chen, Mark Alber and
Jeremiah J. Zartman*

4.2 Computational Morphogenesis of Embryonic Bone Development: Past, Present, and Future, 197

Matthew E. Dolack, Chanyoung Lee, Ying Ru, Arsalan Marghoub, Joan T. Richtsmeier, Ethylin Wang Jabs, Mehran Moazen, Diego A. Garzón-Alvarado and Reuben H. Kraft

5 Future Prospects and Challenges, 229

Glen L. Niebur, PhD

GLOSSARY, 229
