

Contents

<i>Contributors</i>	vii
<i>Preface</i>	ix
1. Dendritic cell subsets and locations	1
Sreekumar Balan, Mansi Saxena, and Nina Bhardwaj	
1. Introduction	2
2. DC biology: A short history and progress	4
3. DC ontogeny	8
4. Dendritic cell subsets	10
5. Conventional dendritic cell subsets 1	12
6. Conventional dendritic cell subsets 2	19
7. Plasmacytoid dendritic cell subsets	23
8. Langerhans cells	31
9. Inflammatory DCs	34
10. Dendritic cell locations	37
11. Conclusion	45
References	46
2. Antigen processing and presentation	69
Fiorella Kotsias, Ignacio Cebrian, and Andrés Alloatti	
1. Introduction	70
2. Classical MHC class I presentation	75
3. Classical MHC class II presentation	78
4. Cross-presentation	88
5. Cross-presentation in immunity and cancer. Immunotherapy and beyond	107
Acknowledgments	108
References	108
3. The role of dendritic cells in cancer	123
Yoke Seng Lee and Kristen J. Radford	
1. Introduction	124
2. Immunotherapy for cancer	124
3. The tumor microenvironment	125
4. Dendritic cells as cancer vaccines	127
5. Human dendritic cell subsets: An overview	127

6. The role of MoDCs in tumor immune responses	131
7. The role of cDC1 in tumor immune responses	131
8. Human cDC2 in cancer immunology and immunotherapy	157
9. Plasmacytoid dendritic cells in cancer immunology and immunotherapy	160
10. Conclusions	162
References	163
4. Interplay between dendritic cells and cancer cells	179
Jan Martinek, Te-Chia Wu, Diana Cadena, Jacques Banchereau, and Karolina Palucka	
1. Introduction	180
2. Dendritic cells in the immune response to cancer	182
3. Dendritic cells dictate the outcome of immune response to cancer	193
4. Conclusions and future studies	200
Acknowledgments	203
References	203
5. Type I interferons and dendritic cells in cancer immunotherapy	217
Jenny Sprooten, Patrizia Agostinis, and Abhishek D. Garg	
1. Introduction	218
2. Type I interferons: Induction and sensing mechanisms	221
3. Type I interferons associated with a tumor: A bird's eye-view	228
4. Tumor-associated type I interferons versus dendritic cells	235
5. Type I interferons and dendritic cells-based cancer immunotherapy	241
6. Concluding remarks	244
Acknowledgments	245
References	245
6. Liver DCs in health and disease	263
Theresa Hildegard Wirtz, Elisa Fabiana Brandt, and Marie-Luise Berres	
1. Introduction	263
2. Murine and human DC subsets in the liver and functional aspects	269
3. Dendritic cells in the context of murine and human liver diseases	272
4. Therapeutic approaches targeting cDC	286
5. Conclusions	290
References	291
