1. Key checkpoints in the movement of plant viruses through the host

1

Jose A. Navarro, Jesus A. Sanchez-Navarro, and Vicente Pallas

- | | |
|--|----|
| 1. Introduction | 2 |
| 2. The different ways viruses enter a plant cell | 5 |
| 3. The plasmodesmata as a regulatory checkpoint in cell-to-cell movement | 13 |
| 4. The bottleneck at the phloem cells to systemically invade the plant | 35 |
| 5. Cellular organelles as key checkpoints for viral long-distance movement | 41 |
| 6. Conclusions and future trends | 45 |
| Acknowledgments | 45 |
| References | 45 |
| Further reading | 63 |

2. Entry of bunyaviruses into plants and vectors

65

Yuting Chen, Moshe Dessau, Dorith Rotenberg, David A. Rasmussen, and Anna E. Whitfield

- | | |
|--|----|
| 1. Overview of the plant virus transmission cycle and mechanisms | 66 |
| 2. The order <i>Bunyavirales</i> | 70 |
| 3. Plant-infecting members of the <i>Bunyavirales</i> | 75 |
| 4. Concluding remarks | 87 |
| Acknowledgments | 88 |
| References | 88 |
| Further reading | 96 |

3. How non-enveloped viruses hijack host machineries to cause infection

97

Chelsey C. Spriggs, Mara C. Harwood, and Billy Tsai

- | | |
|---|-----|
| 1. Introduction | 98 |
| 2. Co-opting the endosome membrane system during cell entry of AdV | 101 |
| 3. Hijacking the dual endosome-Golgi membrane systems during HPV cell entry | 105 |
| 4. Exploiting the ER during cell entry of PyV | 109 |

5. Conclusion and future directions	113
Acknowledgments	115
References	115
4. Developments in single-molecule and single-particle fluorescence-based approaches for studying viral envelope glycoprotein dynamics and membrane fusion	123
Angela R. Howard and James B. Munro	
1. Introduction	124
2. Förster resonance energy transfer (FRET)	127
3. Super-resolution fluorescence microscopy (SRFM) in virus entry	133
4. Viral membrane fusion	137
5. Live-cell single-virus tracking	139
6. Conclusions: Future advances in single-particle techniques in viral fusion	140
References	141
Further reading	146
5. Structural and cellular biology of rhabdovirus entry	147
Laura Belot, Aurélie Albertini, and Yves Gaudin	
1. Introduction	148
2. Rhabdovirus receptors	154
3. Pathway of rhabdoviruses entry into the host cell	161
4. Rhabdovirus-induced membrane fusion	166
5. Conclusions and perspectives	174
References	176
6. Hantavirus entry: Perspectives and recent advances	185
Eva Mittler, Maria Eugenia Dieterle, Lara M. Kleinfelter, Megan M. Slough, Kartik Chandran, and Rohit K. Jangra	
1. Introduction	187
2. Hantavirus ecology and diseases	188
3. Hantavirus particle and genes	190
4. Hantavirus entry pathway	192
5. Structure and function of hantavirus glycoproteins	194
6. Candidate hantavirus receptors	197
7. Role of candidate receptors in pathogenesis	201
8. Candidate receptors as determinants of host range	202
9. Model systems to study hantavirus entry	203

10. Vaccines and neutralizing antibodies	205
11. Conclusions and future directions	208
Acknowledgments	210
References	210
7. Common characteristics and unique features: A comparison of the fusion machinery of the alphaherpesviruses Pseudorabies virus and Herpes simplex virus	225
Melina Vallbracht, Marija Backovic, Barbara G. Klupp, Felix A. Rey, and Thomas C. Mettenleiter	
1. Introduction	226
2. Attachment to cells	228
3. gD: The fusion trigger	230
4. The gH/gL complex and its role in fusion	239
5. gB: The fusion executor	250
6. Concluding remarks and open questions	264
Acknowledgments	266
References	266
8. Entry of betaherpesviruses	283
Mitsuhiro Nishimura and Yasuko Mori	
1. Entry of human cytomegalovirus	284
2. Entry of human herpesvirus 6A and human herpesvirus 6B	295
References	304
Further reading	312
9. Gammaherpesvirus entry and fusion: A tale how two human pathogenic viruses enter their host cells	313
Britta S. Möhl, Jia Chen, and Richard Longnecker	
1. Introduction	314
2. History of EBV and KSHV	316
3. Route of infection and host cell tropism	317
4. The herpesvirus fusion machinery	320
5. EBV-driven entry and fusion	326
6. KSHV-driven entry and fusion	330
7. Conclusion	333
Acknowledgments	335
References	335
