Author biography	xix
Preface	xxi
Acknowledgments	xxiii

1 Introduction

1.1 Cell junction

1.1.1 Junction category	1
1.1.2 Tight junction	1
1.1.3 Adherens junction	3
1.1.4 Desmosome	3
1.1.5 Gap junction	4
References	5

1.2 Cell adhesion

1.2.1 Cadherin interaction	6
1.2.2 Claudin interaction	6
1.2.3 Connexin interaction	8
1.2.4 Cadherin compatibility and tissue morphogenesis	8
1.2.5 Claudin compatibility and tissue barrier	10
1.2.6 Connexin compatibility and electric synapse	10
References	10

1.3 Paracellular channel

1.3.1 Ion channel in tight junction	12
1.3.2 Electric conductance of paracellular channel	12
1.3.3 Ion selectivity of paracellular channel	14
1.3.4 Size selectivity of paracellular channel	16
1.3.5 Paracellular water channel	16
References	17

1.4 Perijunctional cytoskeleton

1.4.1 Actin polymerization	20
1.4.2 Actin reorganization	20
1.4.3 Contractile apparatus	23

1.4.4	Mechanosensitive signal transduction	24
1.4.5	Contractility and paracellular permeability	24
	References	25
1.5	Junction signaling	
1.5.1	Catenin signaling	26
1.5.2	Small GTPases	26
1.5.3	Receptor tyrosine kinases	26
1.5.4	Canonical Wnt signaling	28
1.5.5	Hippo signaling	28
	References	31
2	Biochemical approaches for tight junction	
2.1	Biochemistry of tight junction	
2.1.1	Biochemical organization of tight junction	33
2.1.2	Tight junction enriched protein fraction	33
2.1.3	Tight junction integral protein fraction	34
2.1.4	Molecular structure of claudin protein	35
2.1.5	Models of claudin interaction	36
2.1.6	Claudin interaction with tight junction plaque proteins	37
2.1.7	Tight junction anchorage onto cytoskeleton	38
	References	39
2.2	Tight junction isolation by subcellular fractionation	
2.2.1	Background knowledge	41
2.2.2	Materials and reagents	42
2.2.3	Experimental procedure	44
2.2.4	Data analysis	45
2.2.5	Troubleshooting	45
2.2.6	Concluding remarks	47
	References	47
2.3	Immunoprecipitation of <i>cis</i> and <i>trans</i> claudin interactions	
2.3.1	Background knowledge	49
2.3.2	Materials and reagents	50
2.3.3	Experimental procedure	51
2.3.4	Data analysis	56
2.3.5	Troubleshooting	57
2.3.6	Concluding remarks	58
	References	58

2.4 Isolation of claudin oligomer by chemical cross-linking	
2.4.1 Background knowledge	59
2.4.2 Materials and reagents	59
2.4.3 Experimental procedure	63
2.4.4 Data analysis	65
2.4.5 Troubleshooting	66
2.4.6 Concluding remarks	68
References	69
2.5 Yeast two-hybrid assay of claudin interaction	
2.5.1 Background knowledge	70
2.5.2 Materials and reagents	72
2.5.3 Experimental procedure	72
2.5.4 Data analysis	74
2.5.5 Troubleshooting	76
2.5.6 Closing remarks	77
References	77
2.6 Recombinant claudin protein production in <i>Pichia pastoris</i>	
2.6.1 Background knowledge	78
2.6.2 Materials and reagents	79
2.6.3 Experimental procedure	81
2.6.4 Data analysis	86
2.6.5 Troubleshooting	86
2.6.6 Closing remarks	88
References	88
3 Biophysical approaches for tight junction	
3.1 Electrophysiology of epithelial transport	
3.1.1 Electric potential, resistance, and capacitance of cell membrane	89
3.1.2 Basic principles of cell membrane electrophysiology	91
3.1.3 Electrophysiology of an epithelium	94
3.1.4 Noise prevention and signal conditioning	96
3.1.5 Data acquisition and digitization	97
References	99
3.2 Epithelial cell cultures in Ussing chamber	
3.2.1 Background knowledge	100
3.2.2 Materials and instrumentation	105
3.2.3 Experimental procedure	107

3.2.4	Data analysis	112
3.2.5	Troubleshooting	114
3.2.6	Closing remarks	115
	References	116
3.3	Epithelial tissues in Ussing chamber	
3.3.1	Background knowledge	117
3.3.2	Materials and instrumentation	118
3.3.3	Experimental procedure	121
3.3.4	Data analysis	123
3.3.5	Troubleshooting	125
3.3.6	Closing remarks	126
	References	126
3.4	Epithelial ohmmeter	
3.4.1	Background knowledge	128
3.4.2	Materials and instrumentation	128
3.4.3	Experimental procedure	129
3.4.4	Data analysis	129
3.4.5	Troubleshooting	130
3.4.6	Closing remarks	131
	References	132
3.5	Impedance measurement in Ussing chamber	
3.5.1	Background knowledge	133
3.5.2	Materials and instrumentation	136
3.5.3	Experimental procedure	136
3.5.4	Data analysis	137
3.5.5	Troubleshooting	137
3.5.6	Closing remarks	139
	References	139
3.6	Flux assay in Ussing chamber	
3.6.1	Background knowledge	140
3.6.2	Materials and instrumentation	141
3.6.3	Experimental procedure	142
3.6.4	Data analysis	142
3.6.5	Troubleshooting	143
3.6.6	Closing remarks	143
	References	144

3.7	Measurement of water permeability in Ussing chamber	
3.7.1	Background knowledge	145
3.7.2	Materials and instrumentation	146
3.7.3	Experimental procedure	148
3.7.4	Data analysis	148
3.7.5	Troubleshooting	149
3.7.6	Closing remarks	150
	References	150
4	Histological approaches for tight junction	
4.1	Fixation and fixatives	
4.1.1	Classification of fixatives	153
4.1.2	Mechanism of fixation	153
4.1.3	Concentration of fixatives	155
4.1.4	Osmolality of fixative solution	155
4.1.5	Penetration of fixatives	156
4.1.6	Temperature of fixation	156
4.1.7	Duration of fixation	157
4.1.8	Fixation artifacts	157
	References	157
4.2	Fixation	
4.2.1	Introduction	158
4.2.2	Materials and reagents	158
4.2.3	Experimental procedure	158
4.2.4	Data analysis	160
4.2.5	Troubleshooting	160
4.2.6	Concluding remarks	160
	References	161
4.3	Tight junction atlas	
4.3.1	Introduction	161
4.3.2	Survey of tight junction in organ systems	162
4.3.3	Concluding remarks	172
	References	174
5	Light microscopy for tight junction	
5.1	Theory of light microscopy	
5.1.1	Lateral resolution in light microscopy	175
5.1.2	Axial resolution in light microscopy	176
5.1.3	Depth of field in light microscopy	177

5.1.4	Fluorescence microscopy	177
5.1.5	Fluorescent labels	178
5.1.6	Autofluorescence	179
5.1.7	Photobleaching	180
	References	180
5.2	Wide-field fluorescence microscopy for cells on cover glass	
5.2.1	Background knowledge	181
5.2.2	Materials and reagents	182
5.2.3	Experimental procedure	183
5.2.4	Data analysis	184
5.2.5	Troubleshooting	184
5.2.6	Concluding remarks	187
	References	187
5.3	Wide-field fluorescence microscopy for thin tissue section	
5.3.1	Background knowledge	189
5.3.2	Materials and reagents	192
5.3.3	Experimental procedure	193
5.3.4	Data analysis	194
5.3.5	Troubleshooting	196
5.3.6	Concluding remarks	197
	References	197
5.4	Confocal microscopy for cells on Transwell	
5.4.1	Background knowledge	199
5.4.2	Materials and reagents	201
5.4.3	Experimental procedure	202
5.4.4	Data analysis	203
5.4.5	Troubleshooting	203
5.4.6	Concluding remarks	206
	References	206
5.5	Confocal microscopy for thick tissue sections	
5.5.1	Background knowledge	207
5.5.2	Materials and reagents	207
5.5.3	Experimental procedure	208
5.5.4	Data analysis	208
5.5.5	Troubleshooting	210
5.5.6	Concluding remarks	210
	References	211

6	Electron microscopy for tight junction	
6.1	Theory of electron microscopy	
6.1.1	Wave-particle duality of electron	213
6.1.2	Electromagnetic lens	213
6.1.3	Specimen preparation	214
6.1.4	Ultramicrotomy	215
6.1.5	Positive staining	216
6.1.6	Negative staining	216
6.1.7	Low temperature methods	217
6.1.8	Immunolabeling techniques	217
	References	218
6.2	Transmission electron microscopy for cell culture	
6.2.1	Background knowledge	220
6.2.2	Materials and reagents	221
6.2.3	Experimental procedure	222
6.2.4	Data analysis	224
6.2.5	Troubleshooting	225
6.2.6	Concluding remarks	226
	References	226
6.3	Transmission electron microscopy for tissue section	
6.3.1	Background knowledge	228
6.3.2	Materials and reagents	229
6.3.3	Experimental procedure	230
6.3.4	Data analysis	232
6.3.5	Troubleshooting	232
6.3.6	Concluding remarks	234
	References	234
6.4	Transmission electron microscopy for tracer assay	
6.4.1	Background knowledge	235
6.4.2	Materials and reagents	235
6.4.3	Experimental procedure	237
6.4.4	Data analysis	237
6.4.5	Troubleshooting	238
6.4.6	Concluding remarks	239
	References	239
6.5	Transmission electron microscopy for immunolabeling application	
6.5.1	Background knowledge	240
6.5.2	Materials and reagents	240

6.5.3	Experimental procedure	242
6.5.4	Data analysis	243
6.5.5	Troubleshooting	244
6.5.6	Concluding remarks	245
	References	245
6.6	Freeze-fracture electron microscopy	
6.6.1	Background knowledge	246
6.6.2	Materials and reagents	249
6.6.3	Experimental procedure	251
6.6.4	Data analysis	253
6.6.5	Troubleshooting	254
6.6.6	Concluding remarks	255
	References	255
6.7	Freeze-fracture replica immunolabeling technique	
6.7.1	Background knowledge	256
6.7.2	Materials and reagents	256
6.7.3	Experimental procedure	258
6.7.4	Data analysis	258
6.7.5	Troubleshooting	260
6.7.6	Concluding remarks	260
	References	261
7	Cell models of tight junction biology	
7.1	Cell culture	
7.1.1	Primary culture and cell transformation	263
7.1.2	Subculture and propagation	263
7.1.3	Anchorage independence	264
7.1.4	Cloning and selection	265
7.1.5	Gene transfer	265
7.1.6	Cryopreservation	265
7.1.7	Contamination	266
	References	267
7.2	Culture of epithelial cells	
7.2.1	Background knowledge	269
7.2.2	Materials and reagents	270
7.2.3	Experimental procedure	271
7.2.4	Data analysis	272
7.2.5	Troubleshooting	272
7.2.6	Concluding remarks	273
	References	273

7.3 Calcium switch assay

7.3.1 Background knowledge	275
7.3.2 Materials and reagents	275
7.3.3 Experimental procedure	276
7.3.4 Data analysis	277
7.3.5 Troubleshooting	278
7.3.6 Concluding remarks	278
References	278

7.4 Retrovirus-mediated transgene expression

7.4.1 Background knowledge	279
7.4.2 Materials and reagents	282
7.4.3 Experimental procedure	283
7.4.4 Data analysis	285
7.4.5 Troubleshooting	285
7.4.6 Concluding remarks	287
References	287

7.5 Retrovirus-mediated RNA interference

7.5.1 Background knowledge	288
7.5.2 Materials and reagents	289
7.5.3 Experimental procedure	290
7.5.4 Data analysis	291
7.5.5 Troubleshooting	292
7.5.6 Concluding remarks	293
References	300

8 Mouse models of tight junction physiology

8.1 Mouse genetics and transgenics

8.1.1 Laboratory mouse	303
8.1.2 Mouse strain	303
8.1.3 Mouse genome	305
8.1.4 Random mutagenesis in laboratory mouse	305
8.1.5 Transgenesis in laboratory mouse	305
8.1.6 Gene targeting in laboratory mouse	307
References	309

8.2 Transgenic overexpression by DNA injection

8.2.1 Background knowledge	310
8.2.2 Materials and reagents	313
8.2.3 Experimental procedure	313
8.2.4 Data analysis	314
8.2.5 Troubleshooting	315

8.2.6 Concluding remarks	316
References	316
8.3 Lentivirus-mediated gene knockdown	
8.3.1 Background knowledge	318
8.3.2 Materials and reagents	318
8.3.3 Experimental procedure	320
8.3.4 Data analysis	322
8.3.5 Troubleshooting	323
8.3.6 Concluding remarks	326
References	328
8.4 Conditional gene knockout by homologous recombination	
8.4.1 Background knowledge	329
8.4.2 Materials and reagents	331
8.4.3 Experimental procedure	332
8.4.4 Data analysis	335
8.4.5 Troubleshooting	338
8.4.6 Concluding remarks	340
References	340
9 Perspective	
9.1 Scanning ion conductance microscopy	
9.1.1 Concept of conductance scanning	341
9.1.2 Practical application	342
9.1.3 Instrumentation	343
9.1.4 Tight junction conductance measurement	343
9.1.5 Limitation and future direction	345
References	346
9.2 Cryo-electron microscopy	
9.2.1 Single-particle cryo-electron microscopy	347
9.2.2 Cryo-electron microscopy of vitreous section	349
9.2.3 Limitation and future direction	349
References	351
9.3 Super-resolution microscopy for tight junction	
9.3.1 Super-resolution microscopy	352
9.3.2 Spatial separation of tight junction components	352
9.3.3 Architectural alteration in tricellular tight junction	354
9.3.4 Limitation and future direction	355
References	356

9.4 Novel binders to tight junction

9.4.1 <i>Clostridium perfringens</i> enterotoxin	357
9.4.2 TJ modulating peptidomimetics	357
9.4.3 Anti-claudin antibodies	360
9.4.4 Limitation and future direction	361
References	363

9.5 De novo assembly of tight junction

9.5.1 Concept of de novo assembly of subcellular organelle	366
9.5.2 Giant unilamellar vesicle	367
9.5.3 Protein incorporation and topological orientation in giant unilamellar vesicle	367
9.5.4 Probing claudin interactions in giant unilamellar vesicle	369
9.5.5 Limitation and future direction	370
References	371

9.6 Organoid model of tight junction biology

9.6.1 Organoid culture	372
9.6.2 Organ on a chip	372
9.6.3 Bioprinting of organ	374
9.6.4 Limitation and future direction	374
References	376
