Preface: More than two decades of modern tumor immunology

xxi

1. Detection of circulating tumor DNA (ctDNA) by digital droplet polymerase chain reaction (dd-PCR) in liquid biopsies	1
Sara Valpione and Luca Campana	
1. Introduction	2
2. dd-PCR for ctDNA analysis	4
3. Protocol	5
4. Troubleshooting	11
5. Summary	14
Acknowledgment	14
References	14
2. Detection and quantification of cytosolic DNA	17
Sheila Spada, Takahiro Yamazaki, and Claire Vanpouille-Box	
1. Introduction	17
2. Detection of cytosolic DNA at the cellular level by immunostaining	18
3. Detection and quantification DNA at the subcellular level	21
4. Concluding remarks	31
Conflict of interest statement	32
Acknowledgments	32
References	32
3. Methods to detect endogenous dsRNA induction and recognition	35
Ilias Ettayebi, Helen Loo Yau, and Daniel D. De Carvalho	
1. Introduction	36
2. Assessment of dsRNA induction by immunofluorescence: Principles	37
3. Assessment of dsRNA induction by IF: Protocol	39
4. Assessment of MAVS activation: Principles	42
5. Assessment of MAVS activation: Protocol	44
6. Concluding remarks	48
Acknowledgments	49
References	50

4. Quantification of eIF2alpha phosphorylation during immunogenic cell death	53
Lucillia Bezu, Alejandra Wu Chuang, Juliette Humeau, Guido Kroemer, and Oliver Kepp	
1. Introduction	54
2. Fluorescence microscopy for measuring eIF2alpha phosphorylation in vitro	56
3. Western blotting strategy for measuring eIF2alpha phosphorylation	59
4. Fluorescence microscopy for measuring eIF2alpha phosphorylation in vivo	62
5. Conclusions	66
Acknowledgments	67
References	68
5. Assessment of annexin A1 release during immunogenic cell death	71
Elisa Elena Baracco, Adriana Petrazzuolo, and Guido Kroemer	
1. Introduction	72
2. Protocol	74
Acknowledgments	76
References	77
6. Luciferase-assisted detection of extracellular ATP and ATP metabolites during immunogenic death of cancer cells	81
George R. Dubyak	
1. Introduction	82
2. Analysis of ATP release and extracellular accumulation during different modes of regulated cancer cell death: Mechanistic and technical considerations	86
3. Luciferase-based methods for measuring ATP and ATP metabolites in extracellular compartments during regulated death of cancer cells or immune effector cells	91
4. Protocol	92
5. Representative experimental findings using luciferase-assisted methods to detect accumulation of extracellular ATP and ATP metabolites during regulated death of Jurkat leukemic cancer cells	97
References	100

7. Quinacrine-mediated detection of intracellular ATP	103
Sabrina Forveille, Juliette Humeau, Allan Sauvat, Lucillia Bezu, Guido Kroemer, and Oliver Kepp	
1. Introduction	104
2. Materials	105
3. Methods	107
4. Concluding remarks	109
Acknowledgments	112
References	113
8. Structure, function and techniques of investigation of the P2X7 receptor (P2X7R) in mammalian cells	115
Francesco Di Virgilio, Lin-Hua Jiang, Sébastien Roger, Simonetta Falzoni, Alba Clara Sarti, Valentina Vultaggio-Poma, Paola Chiozzi, and Elena Adinolfi	
1. Introduction	117
2. Cell culture	123
3. Generation of stable HEK293 cell clones expressing the human P2X7R (hP2X7R)	126
4. Generation of stable hP2X7R-silenced cells using small-hairpin RNA(shRNA)	127
5. Generation of stable hP2X7R-deleted cells using CRISPER-Cas9 technique	128
6. Techniques of investigation	129
7. Fluorescent dye uptake and dye loss	135
8. Measurement of P2X7R-mediated cell death	138
9. Modulation of P2X7R responses by positive allosteric modulators	140
10. Oxidized-ATP as a tool to investigate P2X7R function	141
11. Analysis of P2X7R cell surface expression by cytofluorimetry in human cells	142
Acknowledgments	146
References	147
9. LEGENDplex™: Bead-assisted multiplex cytokine profiling by flow cytometry	151
Jason S. Lehmann, Priyanka Rughwani, Melissa Kolenovic, Shaoquan Ji, and Binggang Sun	
1. Introduction	152
2. Required equipment and materials	156

3. Sample collection	157
4. Reagent preparation	159
5. Assay protocol	160
6. Flow cytometer setup	163
7. Data acquisition	164
8. Data analysis	164
9. Tips for novice users	166
10. Example LEGENDplex™ data set	167
11. Summary	173
Acknowledgments	175
Disclosures	175
References	175
10. Methods for measuring HMGB1 release during immunogenic cell death	177
Liwei Zhao, Peng Liu, Oliver Kepp, and Guido Kroemer	
1. Introduction	178
2. Cell culture	179
3. Generation of streptavidin-NLS3 stable expressing cells	180
4. Generation of streptavidin-NLS3 and HMGB1-SBP-GFP co-expressing cells	181
5. Treatments	182
6. Image acquisition and analysis	183
7. Concluding remarks	185
8. Notes	185
Acknowledgments	191
References	191
11. Different measures of HMGB1 location in cancer immunology	195
Carolina Mendonça Gorgulho, Pranav Murthy, Lance Liotta, Virginia Espina, and Michael T. Lotze	
1. Introduction	196
2. HMG proteins	197
3. HMGB1 and its compartmental roles	199
4. Measures of HMGB1	203
5. Summary	210
References	211

12. Reliable detection of indoleamine 2,3 dioxygenase-1 in murine cells and tissues	219
Sunil Thomas, Lisa Laury-Kleintop, and George C. Prendergast	
1. Introduction	220
2. Development of monoclonal antibodies for IDO-1	225
3. Monoclonal antibody characterization	226
4. Specific detection of IDO1 in mouse tissues using 4B7 mAb	229
References	232
Further reading	233
13. Quantification of IDO1 enzyme activity in normal and malignant tissues	235
Lijie Zhai, Erik Ladomersky, April Bell, Corey Dussold, Krislyn Cardoza, Jun Qian, Kristen L. Lauing, and Derek A. Wainwright	
1. Introduction	236
2. Differential expression of IDO1 and TDO in normal and malignant tissues	239
3. Kyn pathway and IDO1 enzyme activity	240
4. Methods for quantification of IDO1 enzyme activity	241
5. Concluding remarks	251

5. CellTiter-Glo protocol using CD73 ⁺ cells	275
6. Malachite green protocol using recombinant CD73	276
7. Malachite green protocol using CD73 ⁺ cells	277
8. Expected results—Analysis	278
9. Discussion	284
10. Notes	285
Acknowledgments	287
References	287
16. Distinguishing perforin-mediated lysis and granzyme-dependent apoptosis	291
Jesse A. Rudd-Schmidt, Joseph A. Trapani, and Ilia Voskoboinik	
1. Introduction	292
2. Methods to assess perforin activity using purified protein	294
3. Conclusion: Choice of assay	303
References	304
17. Elucidating the role of an immunomodulatory protein in cancer: From protein expression to functional characterization	307
Leepakshi Khurana, Mei ElGindi, Pathricia V. Tilstam, and Georgios Pantouris	
1. Introduction	308
2. Cloning, overexpression and purification of recombinant immunomodulatory proteins	310
3. Recombinant protein characterization	323
4. Cell-based protein expression analysis	328
5. Cell-cycle arrest analysis	335
6. Proliferation analysis	342
7. Apoptosis assay	347
8. Fluorophore selection for FACS involving multicolor panels	350
9. Compensation controls for FACS involving multicolor panels	350
10. Conclusion	352
References	352
18. In vitro assay for the development of small molecule inhibitors targeting PD-1/PD-L1	361
Wenjie Zhai, Xiuman Zhou, Jiangfeng Du, and Yanfeng Gao	
1. Introduction	362
2. Binding assays	364

3. Cell-based PD-1/PD-L1 blocking assay	367
4. T cell function assays	375
5. Reporter assays	377
6. Summary	377
Acknowledgments	378
References	378
19. Crystallographic approaches to study the interaction modes of PD-1- and CTLA-4-blocking antibodies	383
Norimichi Nomura, Yayoi Nomura, Yumi Sato, and So Iwata	
1. Introduction	384
2. Production of the immune checkpoint receptors and their blocking antibodies	385
3. Co-crystallization and X-ray diffraction analysis	390
4. Examples	393
5. Notes	396
Acknowledgments	397
References	397
20. High-throughput discovery of cancer-targeting TCRs	401
Lukas Bunse, Edward W. Green, and Michael Platten	
1. Introduction	401
2. Experimental strategies for TCR discovery	402
3. Computational strategies for TCR discovery	411
4. Conclusion	414
References	415
21. TCR validation toward gene therapy for cancer	419
Edward W. Green, Lukas Bunse, Matthias Bozza, Khwab Sanghvi, and Michael Platten	
1. Introduction	420
2. Cloning TCRs	420
3. Considerations when testing TCRs	429
4. Assay protocols	432
5. Future perspectives	438
6. Conclusion	438
References	439

22. Analysis of TCR β CDR3 sequencing data for tracking anti-tumor immunity	443
Jiajia Zhang, Zhicheng Ji, and Kellie N. Smith	
1. Introduction	444
2. Considerations for sample handling, freezing, and storage	445
3. TCR definitions and quantitative measurements	448
4. Data QC, cleaning, and bioinformatic analysis	453
5. Correlating TCR CDR3 β dynamics and intratumoral accumulation with treatment response	457
6. Ongoing challenges and concluding remarks	459
Acknowledgments	461
References	461
23. Quantitative analysis of the T cell receptor repertoire	465
Imran Uddin, Annemarie Woolston, Thomas Peacock, Kroopa Joshi, Mazlina Ismail, Tahel Ronel, Connor Husovsky, and Benny Chain	
1. Introduction	466
2. Protocol: Experimental	468
3. Protocol: Computational	480
Acknowledgments	490
References	490
24. CRATES: A one-step assembly method for Class 2 CRISPR arrays	493
Chunyu Liao, Rebecca A. Slotkowski, and Chase L. Beisel	
1. Introduction	494
2. Backbone plasmid design	497
3. Design and prepare oligonucleotides	502
4. Array assembly	506
5. Example of assembling and testing a three-spacer CRISPR array for FnCas12a	507
6. Conclusions	509
Acknowledgments	509
References	509
