Preface: Life through death—Key role of cellular suicide for colonial and organismal homeostasis

ix

1. Poly (ADP-ribose) (PAR)-dependent cell death in neurodegenerative diseases

1

Hyejin Park, Tae-In Kam, Ted M. Dawson, and Valina L. Dawson

1. Introduction 2
2. Overview of parthanatos 3
3. Regulation of parthanatos 5
4. Parthanatos in neurodegenerative diseases 15
5. Parthanatos and therapeutic targets in neurodegenerative diseases 19
6. Conclusion 21
- Acknowledgments 21
- References 22
- Further reading 29

2. Molecular mechanisms of necroptosis and relevance for neurodegenerative diseases

31

Pedro A. Dionísio, Joana D. Amaral, and Cecilia M.P. Rodrigues

1. Introduction 32
2. Upstream regulators of necroptosis 32
3. Effectors of necroptosis 40
4. Post-translational and epigenetic regulation of necroptosis 47
5. Non-necroptotic roles for necroptosis-related proteins 50
6. Evolutionary and physiological roles of necroptosis 52
7. Dysregulation of necroptosis in CNS diseases 54
8. Therapeutic perspectives 65
9. Concluding remarks 67
- References 67

3. Necroptosis, ADAM proteases and intestinal (dys)function

83

Michelle Heib, Stefan Rose-John, and Dieter Adam

1. Necroptosis 84
2. ADAM proteases 92
