CHAPTER 1 Generation of esophageal organoids and organotypic raft cultures from human pluripotent stem cells..... 1

Vered Shacham-Silverberg and James M. Wells

1. Introduction	2
2. Significance and applications	3
3. Morphological and transcriptional analysis of developing esophageal cultures	4
4. Overview of differentiation protocol	5
5. Step-by-step protocol	7
6. Future directions	19
7. Summary	20
Acknowledgments	20
References	20

CHAPTER 2 Generation and use of gastric organoids for the study of *Helicobacter pylori* pathogenesis..... 23

Jayati Chakrabarti and Yana Zavros

1. Introduction	24
2. Significance and applications of gastric organoids	26
3. Overview of the protocol	27
4. Step-by-step protocol	27
5. Precursor techniques	38
6. Safety considerations and standards	39
7. Analysis of cultures	40
8. Alternative methods/procedures	41
9. Summary	44
Acknowledgments	44
References	44

CHAPTER 3 Generation of multi-cellular human liver organoids from pluripotent stem cells..... 47

Wendy L. Thompson and Takanori Takebe

1. Introduction	48
2. Applications of liver organoids	50

3. Overview of differentiation protocol	51
4. Step-by-step methods	52
5. Technical and design considerations	65
6. Conclusions	66
Acknowledgments	66
References	66
CHAPTER 4 Pluripotent stem cell-derived cholangiocytes and cholangiocyte organoids	69
Eléonor Luce and Anne Dubart-Kupperschmitt	
1. Introduction	70
2. Physiology of cholangiocytes	71
3. Biliary differentiation during development	74
4. Human cholangiocyte sources for organoids	75
5. Applications of pluripotent stem cell-derived cholangiocytes and cholangiocyte organoids	76
6. Overview of the protocol	78
7. Step-by-step methods	80
8. Conclusion	89
Acknowledgments	89
References	90
CHAPTER 5 Differentiation of human airway-organoids from induced pluripotent stem cells (iPSCs)	95
Ruobing Wang, Katie B. McCauley, Darrell N. Kotton, and Finn Hawkins	
1. Introduction	96
2. iPSC-derived airway organoid cell types	98
3. Applications of airway organoids	99
4. Overview of differentiation protocol	102
5. Step-by-step methods	102
6. Conclusion	110
References	110
CHAPTER 6 A method of generating alveolar organoids using human pluripotent stem cells	115
Yuki Yamamoto, Yohei Korogi, Toyohiro Hirai, and Shimpei Gotoh	
1. Introduction	116
2. Discovery of alveolar organoids	117

3. Need of AOs using human ESCs and iPSCs.....	118
4. Overview of lung cell differentiation from hPSCs.....	118
5. Alveolar organoid cell types.....	119
6. Overview of the differentiation protocol.....	119
7. Step-by-step methods.....	120
8. Passage of AOs for long-term culture (fibroblast-dependent)...	129
9. Differentiation of lung progenitor cells into fibroblast-free (FF) AOs.....	131
10. Immunofluorescent analysis of organoids.....	132
11. The transmission electron microscopic analysis of AT2 cells...	134
12. Technical and design considerations.....	136
13. Conclusion.....	137
Acknowledgments.....	138
References.....	138
CHAPTER 7 Generation of small intestinal organoids for experimental intestinal physiology.....	143
Meghan Capeling, Sha Huang, Adriana Mulero-Russe, Roberto Cieza, Yu-Hwai Tsai, Andres Garcia, and David R. Hill	
1. Introduction.....	145
2. Applications of intestinal organoids.....	145
3. Overview of differentiation protocol.....	146
4. Materials, equipment and reagents.....	147
5. Organoid differentiation protocol.....	149
6. Application of HIOs, and variations on HIO culture.....	159
7. Pros and cons of pluripotent stem cell derived intestinal organoids.....	169
8. Troubleshooting and optimization.....	169
9. Related techniques.....	170
10. Ethical considerations and standards.....	170
11. Conclusions.....	171
References.....	171
CHAPTER 8 Pluripotent stem cell derived intestinal organoids with an enteric nervous system.....	175
Elise Loffet, Lisa Brossard, and Maxime M. Mahe	
1. Introduction.....	176
2. Applications of intestinal organoids with an enteric nervous system.....	178

3. Protocol overview	178
4. Step by step methods	180
5. Troubleshooting and optimization	195
6. Precursor and alternative techniques	196
7. Summary	197
Acknowledgments	197
References	197

CHAPTER 9 Generation of human colonic organoids from human pluripotent stem cells 201

Abdelkader Daoud and Jorge O. Múnera

1. Introduction	202
2. Applications of human colonic organoids	203
3. Overview of HCO differentiation protocol	205
4. Step-by-step protocol	209
5. Statistical analysis	224
6. Pros and cons	224
7. Troubleshooting and optimization	225
8. Conclusion	225
References	226

CHAPTER 10 Single-cell genomic analysis of human cerebral organoids 229

Sabina Kanton, Barbara Treutlein, and J. Gray Camp

1. Introduction	230
2. Overview of the protocol	232
3. Generating single-cell sequencing data from cerebral organoids	233
4. Basic analysis of organoid scRNA-seq data	240
5. Conclusions and outlook	248
Acknowledgments	249

CHAPTER 11 Generating ventral spinal organoids from human induced pluripotent stem cells.....257**Jin-Hui Hor and Shi-Yan Ng**

1. Introduction.....	258
2. Spinal cord development.....	259
3. Applications of spinal cord organoids.....	263
4. Overview of the differentiation protocol.....	265
5. Step-by-step methods.....	265
6. Technical and design considerations.....	273
7. Conclusion.....	274
Acknowledgments.....	274
References.....	274

CHAPTER 12 Differentiation of retinal organoids from human pluripotent stem cells.....279**Clarisse M. Fligor, Kang-Chieh Huang, Sailee S. Lavekar,
Kirstin B. VanderWall, and Jason S. Meyer**

1. Introduction.....	280
2. Application of retinal organoids.....	281
3. Cell types found within retinal organoids.....	284
4. Overview of differentiation protocol.....	286
5. Step-by-step methods.....	287
6. Technical and design considerations.....	295
7. Conclusions.....	298
Acknowledgments.....	298
