

Brief Contents

1. <i>Evolutionary Perspectives on Human Biology and Behavior</i>	1
2. <i>Genetics and Evolution by Natural Selection</i>	26
3. <i>Populations, Species, and Evolution</i>	60
4. <i>Stages of Vertebrate Evolution</i>	82
5. <i>Introduction to Primates: Origins and Evolution</i>	109
6. <i>Primates: Patterns in Social Behavior</i>	131
7. <i>Introduction to the Hominoids</i>	158
8. <i>Australopithecines</i>	183
9. <i>The Genus Homo</i>	210
10. <i>Evolution of Hominoid and Human Behavior</i>	238
11. <i>Human Biology and Variation</i>	276
12. <i>The Human Life Cycle: Human Biology, Growth, and Adaptability</i>	301
13. <i>The Modern Human Condition in Evolutionary Perspective: Applied Biological Anthropology</i>	326
