

Detailed Contents

1 Introduction: Biology Today

● BIOLOGY AND SOCIETY

An Innate Passion for Life

The Scientific Study of Life

The Process of Science

Discovery Science

Hypothesis-Driven Science

Theories in Science

The Nature of Life

The Properties of Life

Life in Its Diverse Forms

Major Themes in Biology

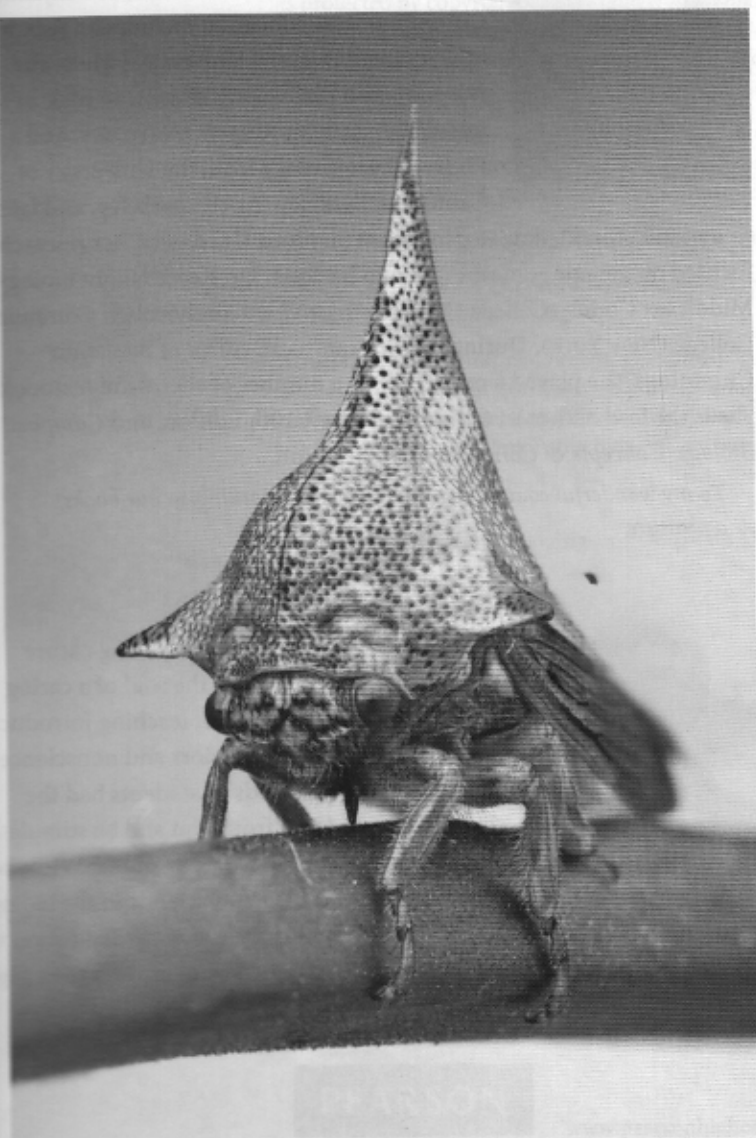

Evolution: Evolution

Structure/Function: The Relationship of Structure
to Function

Information Flow: Information Flow

Energy Transformations: Pathways that Transform
Energy and Matter

Interconnections within Systems: Interconnections
within Biological Systems

UNIT 1 Cells

2 Essential Chemistry for Biology 22

► CHAPTER THREAD: RADIOACTIVITY

● BIOLOGY AND SOCIETY

Radiation and Health 23

Some Basic Chemistry 24

Matter: Elements and Compounds 24

Atoms 25

● THE PROCESS OF SCIENCE

Can Radioactive Tracers Identify Brain Diseases? 26

Chemical Bonding and Molecules 27

Chemical Reactions 28

Water and Life 29

Structure/Function: Water 29

Acids, Bases, and pH 31

● EVOLUTION CONNECTION

Radioactivity as an Evolutionary Clock 33

3 The Molecules of Life 36

► CHAPTER THREAD: LACTOSE INTOLERANCE

● BIOLOGY AND SOCIETY

Got Lactose? 37

Organic Compounds 38

Carbon Chemistry 38

Giant Molecules from Smaller Building Blocks 39

Large Biological Molecules 40

Carbohydrates 40

Lipids 43

Proteins 46

Structure/Function: Protein Shape 47

Nucleic Acids 49

● THE PROCESS OF SCIENCE

Does Lactose Intolerance Have a Genetic Basis? 51

● EVOLUTION CONNECTION

The Evolution of Lactose Intolerance in Humans 51

4 A Tour of the Cell

► CHAPTER THREAD: HUMANS VERSUS BACTERIA

● BIOLOGY AND SOCIETY

Antibiotics: Drugs That Target Bacterial Cells 5

The Microscopic World of Cells 5

The Two Major Categories of Cells 5

An Overview of Eukaryotic Cells 5

Membrane Structure 6

Structure/Function: The Plasma Membrane 6

● THE PROCESS OF SCIENCE

What Makes a Superbug? 6

Cell Surfaces 6

The Nucleus and Ribosomes: 6

Genetic Control of the Cell 6

The Nucleus 6

Ribosomes 6

How DNA Directs Protein Production 6

The Endomembrane System: Manufacturing and Distributing Cellular Products 6

The Endoplasmic Reticulum 6

The Golgi Apparatus 6

Lysosomes 6

Vacuoles 6

Energy Transformations: Chloroplasts and Mitochondria 6

Chloroplasts 6

Mitochondria 6

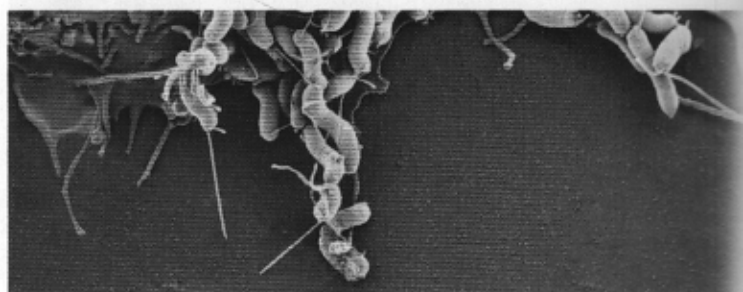

The Cytoskeleton: Cell Shape and Movement 6

Maintaining Cell Shape 6

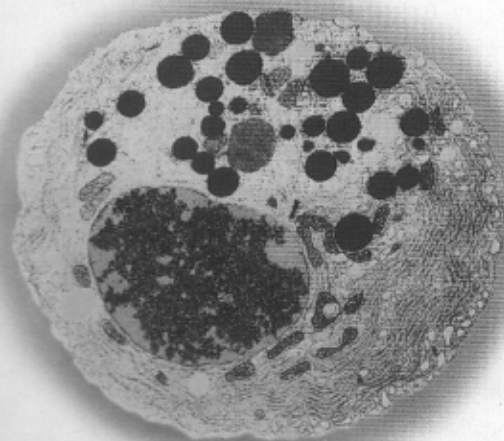

Cilia and Flagella 7

● EVOLUTION CONNECTION

The Evolution of Bacterial Resistance in Humans 7

5 The Working Cell	74
► CHAPTER THREAD: NANOTECHNOLOGY	
BIOLOGY AND SOCIETY	
Harnessing Cellular Structures	75
Some Basic Energy Concepts	76
Conservation of Energy	76
Heat	77
Chemical Energy	77
Food Calories	78
Energy Transformations: ATP and Cellular Work	79
The Structure of ATP	79
Phosphate Transfer	79
The ATP Cycle	80
Enzymes	80
Activation Energy	80
THE PROCESS OF SCIENCE	
Can Enzymes Be Engineered?	81
Structure/Function: Enzyme Activity	82
Enzyme Inhibitors	82
Membrane Function	83
Passive Transport: Diffusion across Membranes	83
Osmosis and Water Balance	84
Active Transport: The Pumping of Molecules across Membranes	86
Exocytosis and Endocytosis: Traffic of Large Molecules	86
EVOLUTION CONNECTION	
The Origin of Membranes	87

6 Cellular Respiration: Obtaining Energy from Food	90
► CHAPTER THREAD: EXERCISE SCIENCE	
BIOLOGY AND SOCIETY	
Getting the Most Out of Your Muscles	91
Energy Flow and Chemical Cycling in the Biosphere	92
Producers and Consumers	92
Chemical Cycling between Photosynthesis and Cellular Respiration	92
Cellular Respiration: Aerobic Harvest of Food Energy	94
Energy Transformations: An Overview of Cellular Respiration	94
The Three Stages of Cellular Respiration	96
The Results of Cellular Respiration	100
Fermentation: Anaerobic Harvest of Food Energy	101
Fermentation in Human Muscle Cells	101
THE PROCESS OF SCIENCE	
What Causes Muscle Burn?	102
Fermentation in Microorganisms	102
EVOLUTION CONNECTION	
The Importance of Oxygen	103

7 Photosynthesis: Using Light to Make Food

► CHAPTER THREAD: BIOFUELS

106

● BIOLOGY AND SOCIETY

A Greasy Crime Wave

107

The Basics of Photosynthesis

108

Chloroplasts: Sites of Photosynthesis

108

Energy Transformations: An Overview of Photosynthesis

109

The Light Reactions: Converting Solar Energy to Chemical Energy

110

The Nature of Sunlight

110

● THE PROCESS OF SCIENCE

What Colors of Light Drive Photosynthesis?

111

Chloroplast Pigments

111

How Photosystems Harvest Light Energy

112

How the Light Reactions Generate ATP and NADPH

113

The Calvin Cycle: Making Sugar from Carbon Dioxide

115

● EVOLUTION CONNECTION

Creating a Better Biofuel Factory

115

UNIT 2 Genetics

8 Cellular Reproduction: Cells from Cells

► CHAPTER THREAD: LIFE WITH AND WITHOUT SEX

● BIOLOGY AND SOCIETY

Virgin Birth of a Dragon

What Cell Reproduction Accomplishes

The Cell Cycle and Mitosis

Eukaryotic Chromosomes

Information Flow: Duplicating Chromosomes

The Cell Cycle

Mitosis and Cytokinesis

Cancer Cells: Dividing Out of Control

Meiosis, the Basis of Sexual Reproduction

Homologous Chromosomes

Gametes and the Life Cycle of a Sexual Organism

The Process of Meiosis

Review: Comparing Mitosis and Meiosis

The Origins of Genetic Variation

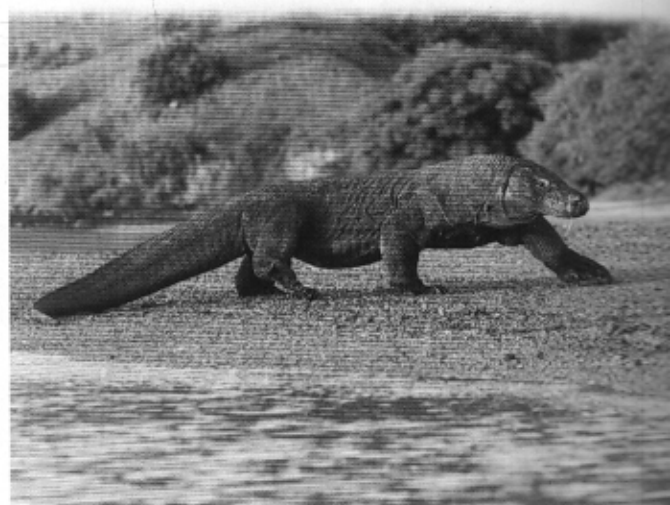

● THE PROCESS OF SCIENCE

Do All Animals Have Sex?

When Meiosis Goes Awry

● EVOLUTION CONNECTION

The Advantages of Sex

9 Patterns of Inheritance 144

► CHAPTER THREAD: DOG BREEDING

● BIOLOGY AND SOCIETY

Our Longest-Running Genetic Experiment

Genetics and Heredity

In an Abbey Garden

Mendel's Law of Segregation

Mendel's Law of Independent Assortment

Using a Testcross to Determine an Unknown Genotype

The Rules of Probability

Family Pedigrees

Human Disorders Controlled by a Single Gene

● THE PROCESS OF SCIENCE

What Is the Genetic Basis of Coat Variation in Dogs?

Variations on Mendel's Laws

Incomplete Dominance in Plants and People

ABO Blood Groups: An Example of Multiple Alleles and Codominance

Structure/Function: Pleiotropy and Sickle-Cell Disease

Polygenic Inheritance

Epigenetics and the Role of Environment

The Chromosomal Basis of Inheritance

Linked Genes

Sex Determination in Humans

Sex-Linked Genes

● EVOLUTION CONNECTION

Barking Up the Evolutionary Tree

145

146

146

147

150

152

152

153

154

156

158

158

159

160

160

161

162

162

163

163

163

163

163

163

163

165

10 The Structure and Function of DNA 171

► CHAPTER THREAD: THE DEADLIEST VIRUS

● BIOLOGY AND SOCIETY

The First 21st-Century Pandemic

DNA: Structure and Replication

DNA and RNA Structure

Watson and Crick's Discovery of the Double Helix

Structure/Function: DNA Replication

Information Flow: From DNA to RNA to Protein

How an Organism's Genotype Determines Its Phenotype

From Nucleotides to Amino Acids: An Overview

The Genetic Code

Transcription: From DNA to RNA

The Processing of Eukaryotic RNA

Translation: The Players

Translation: The Process

Review: DNA → RNA → Protein

Mutations

Viruses and Other Noncellular Infectious Agents

Bacteriophages

Plant Viruses

Animal Viruses

● THE PROCESS OF SCIENCE

Do Flu Vaccines Protect the Elderly?

HIV, the AIDS Virus

Viroids and Prions

● EVOLUTION CONNECTION

Emerging Viruses

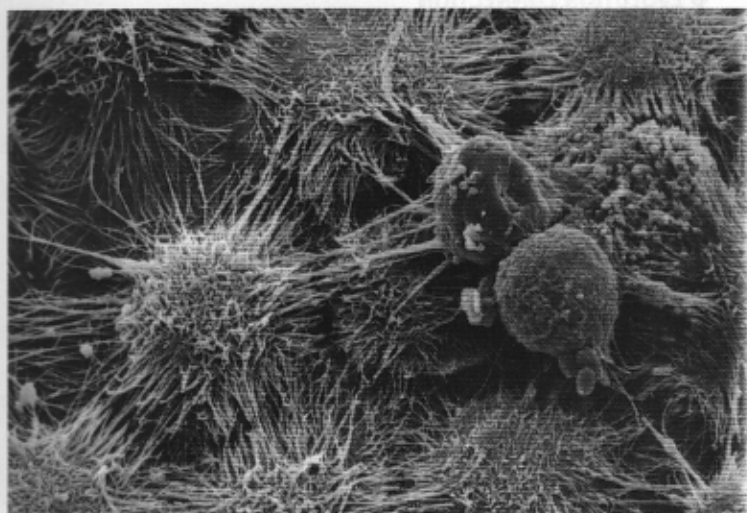

11

How Genes Are Controlled

► CHAPTER THREAD: CANCER

● BIOLOGY AND SOCIETY	
Tobacco's Smoking Gun	196
How and Why Genes Are Regulated	198
Gene Regulation in Bacteria	198
Gene Regulation in Eukaryotic Cells	200
Information Flow: Cell Signaling	203
Homeotic Genes	203
DNA Microarrays: Visualizing Gene Expression	204
Cloning Plants and Animals	205
The Genetic Potential of Cells	205
Reproductive Cloning of Animals	206
Therapeutic Cloning and Stem Cells	208
The Genetic Basis of Cancer	209
Genes That Cause Cancer	209
● THE PROCESS OF SCIENCE	
Are Childhood Tumors Different?	210
Cancer Risk and Prevention	212
● EVOLUTION CONNECTION	
The Evolution of Cancer in the Body	213

12

DNA Technology

► CHAPTER THREAD: DNA PROFILING

● BIOLOGY AND SOCIETY	
Using DNA to Establish Guilt and Innocence	
Genetic Engineering	
Recombinant DNA Techniques	
Pharmaceutical Applications	
Genetically Modified Organisms in Agriculture	
Human Gene Therapy	
DNA Profiling and Forensic Science	
DNA Profiling Techniques	
Investigating Murder, Paternity, and Ancient DNA	
Bioinformatics	
DNA Sequencing	
Genomics	
Genome-Mapping Techniques	
The Human Genome	
● THE PROCESS OF SCIENCE	
Can Genomics Cure Cancer?	
Applied Genomics	
Interconnections within Systems: Systems Biology	
Safety and Ethical Issues	
The Controversy over Genetically Modified Foods	
Ethical Questions Raised by Human DNA Technologies	
● EVOLUTION CONNECTION	
The Y Chromosome as a Window on History	

UNIT 3 Evolution and Diversity

13 How Populations Evolve 242

► CHAPTER THREAD: EVOLUTION PAST, PRESENT, AND FUTURE

● BIOLOGY AND SOCIETY

Evolution Today 243

The Diversity of Life 244

Naming and Classifying the Diversity of Life 244

Explaining the Diversity of Life 245

Charles Darwin and *The Origin of Species* 246

Darwin's Journey 246

Evolution: Darwin's Theory 248

Evidence of Evolution 248

Evidence from Fossils 248

● THE PROCESS OF SCIENCE

Did Whales Evolve from Land-Dwelling Mammals? 250

Evidence from Homologies 250

Evolutionary Trees 252

Natural Selection as the Mechanism for Evolution 253

Natural Selection in Action 254

Key Points about Natural Selection 255

The Evolution of Populations 255

Sources of Genetic Variation 255

Populations as the Units of Evolution 257

Analyzing Gene Pools 258

Population Genetics and Health Science 259

Microevolution as Change in a Gene Pool 259

Mechanisms That Alter Allele Frequencies in a Population 259

Genetic Drift

Gene Flow

Natural Selection: A Closer Look

● EVOLUTION CONNECTION

The Rising Threat of Antibiotic Resistance

14 How Biological Diversity Evolves

► CHAPTER THREAD: MASS EXTINCTIONS

● BIOLOGY AND SOCIETY

The Sixth Mass Extinction

The Origin of Species

What Is a Species?

Reproductive Barriers between Species

Evolution: Mechanisms of Speciation

Earth History and Macroevolution

The Fossil Record

Plate Tectonics and Biogeography

Mass Extinctions and Explosive Diversifications of Life

● THE PROCESS OF SCIENCE

Did a Meteor Kill the Dinosaurs?

Mechanisms of Macroevolution

Large Effects from Small Genetic Changes

The Evolution of Biological Novelty

Classifying the Diversity of Life

Classification and Phylogeny

Classification: A Work in Progress

● EVOLUTION CONNECTION

Rise of the Mammals

15 The Evolution of Microbial Life

► CHAPTER THREAD: HUMAN MICROBIOTA

● BIOLOGY AND SOCIETY

Our Invisible Inhabitants

Major Episodes in the History of Life

The Origin of Life

A Four-Stage Hypothesis for the Origin of Life

From Chemical Evolution to Darwinian Evolution

Prokaryotes	299
They're Everywhere!	299
Structure/Function: Prokaryotes	300
The Ecological Impact of Prokaryotes	303
The Two Main Branches of Prokaryotic Evolution: Bacteria and Archaea	304

● THE PROCESS OF SCIENCE	
Are Intestinal Microbiota to Blame for Obesity?	306

Protists	307
Protozoans	308
Slime Molds	309
Unicellular and Colonial Algae	310
Seaweeds	310

● EVOLUTION CONNECTION	
The Sweet Life of <i>Streptococcus mutans</i>	311

16 The Evolution of Plants and Fungi	314
▶ CHAPTER THREAD: PLANT-FUNGUS INTERACTIONS	

● BIOLOGY AND SOCIETY	
The Diamond of the Kitchen	315

Colonizing Land	316
Terrestrial Adaptations of Plants	316
The Origin of Plants from Green Algae	318

Plant Diversity	318
Highlights of Plant Evolution	318
Bryophytes	319
Ferns	321
Gymnosperms	322
Angiosperms	324
Plant Diversity as a Nonrenewable Resource	327

Fungi	328
Structure/Function: Characteristics of Fungi	329
The Ecological Impact of Fungi	330

● THE PROCESS OF SCIENCE	
Did a Fungus Lead to the Salem Witch Hunt?	331
Commercial Uses of Fungi	331

● EVOLUTION CONNECTION	
A Mutually Beneficial Symbiosis	332

17 The Evolution of Animals

▶ **CHAPTER THREAD: HUMAN EVOLUTION**

● BIOLOGY AND SOCIETY	
The Discovery of the Hobbit People	

The Origins of Animal Diversity	
What Is an Animal?	
Early Animals and the Cambrian Explosion	
Evolution: Animal Phylogeny	

Major Invertebrate Phyla	
Sponges	
Cnidarians	
Molluscs	
Flatworms	
Annelids	
Roundworms	
Arthropods	
Echinoderms	

Vertebrate Evolution and Diversity	
Characteristics of Chordates	
Fishes	
Amphibians	
Reptiles	
Mammals	

The Human Ancestry	
The Evolution of Primates	
The Emergence of Humankind	

● THE PROCESS OF SCIENCE	
Who Were the Hobbit People?	

● EVOLUTION CONNECTION	
Are We Still Evolving?	

UNIT 4 Ecology

18 An Introduction to Ecology and the Biosphere 372

► CHAPTER THREAD: GLOBAL CLIMATE CHANGE

● BIOLOGY AND SOCIETY

Penguins, Polar Bears, and People in Peril 373

An Overview of Ecology 374

Ecology and Environmentalism 374

Interconnections of Systems: A Hierarchy of Interactions 375

Living in Earth's Diverse Environments 376

Abiotic Factors of the Biosphere 376

Energy Source 376

The Evolutionary Adaptations of Organisms 378

Adjusting to Environmental Variability 378

Biomes 380

Freshwater Biomes 380

Marine Biomes 382

How Climate Affects Terrestrial Biome Distribution 384

Terrestrial Biomes 385

Interconnections within Systems: The Water Cycle 391

Human Impact on Biomes 392

Forests 392

Global Climate Change 394

The Greenhouse Effect and Global Warming 394

The Accumulation of Greenhouse Gases 395

● THE PROCESS OF SCIENCE

How Does Climate Change Affect Species Distribution? 396

Effects of Climate Change on Ecosystems 397

Looking to Our Future 398

● EVOLUTION CONNECTION

Climate Change as an Agent of Natural Selection 399

19 Population Ecology

► CHAPTER THREAD: BIOLOGICAL INVASIONS

● BIOLOGY AND SOCIETY

Invasion of the Lionfish

An Overview of Population Ecology

Population Density

Population Age Structure

Life Tables and Survivorship Curves

Evolution: Life History Traits as Adaptations

Population Growth Models

The Exponential Population Growth Model:

The Ideal of an Unlimited Environment

The Logistic Population Growth Model:

The Reality of a Limited Environment

Regulation of Population Growth

Applications of Population Ecology

Conservation of Endangered Species

Sustainable Resource Management

Invasive Species

Biological Control of Pests

● THE PROCESS OF SCIENCE

Can Biological Control Defeat Kudzu?

Integrated Pest Management

Human Population Growth

The History of Human Population Growth

Age Structures

Our Ecological Footprint

● EVOLUTION CONNECTION

Humans as an Invasive Species

20

Communities
and Ecosystems▶ CHAPTER THREAD: BIODIVERSITY
IN DECLINE

● BIOLOGY AND SOCIETY

Why Biodiversity Matters

The Loss of Biodiversity

Genetic Diversity

Species Diversity

Ecosystem Diversity

Causes of Declining Biodiversity

Community Ecology

Interspecific Interactions

Trophic Structure

Species Diversity in Communities

Disturbances in Communities

Ecological Succession

Ecosystem Ecology

Energy Transformations: Energy Flow in Ecosystems

Interconnections within Systems:

Chemical Cycling in Ecosystems

Conservation and Restoration Biology

Biodiversity "Hot Spots"

Conservation at the Ecosystem Level

● THE PROCESS OF SCIENCE

How Does Tropical Forest Fragmentation Affect Biodiversity?

Restoring Ecosystems

The Goal of Sustainable Development

● EVOLUTION CONNECTION

Can Biophilia Save Biodiversity?
