

Table of Contents

1

A Brief History of Microbiology 1

The Early Years of Microbiology 2

What Does Life Really Look Like? 2

How Can Microbes Be Classified? 3

The Golden Age of Microbiology 7

Does Microbial Life Spontaneously Generate? 7

What Causes Fermentation? 10

What Causes Disease? 11

How Can We Prevent Infection and Disease? 15

The Modern Age of Microbiology 18

What Are the Basic Chemical Reactions of Life? 18

How Do Genes Work? 18

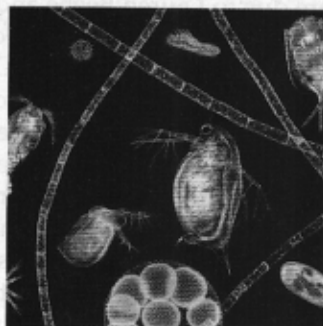

What Roles Do Microorganisms Play in the Environment? 20

How Do We Defend Against Disease? 20

What Will the Future Hold? 21

CHAPTER SUMMARY 22 • QUESTIONS FOR REVIEW 22

CRITICAL THINKING 24 • CONCEPT MAPPING 25

2

The Chemistry of Microbiology 26

Atoms 27

Atomic Structure 27

Isotopes 27

Electron Configurations 28

Chemical Bonds 30

Nonpolar Covalent Bonds 30

Polar Covalent Bonds 31

Ionic Bonds 32

Hydrogen Bonds 33

Chemical Reactions 34

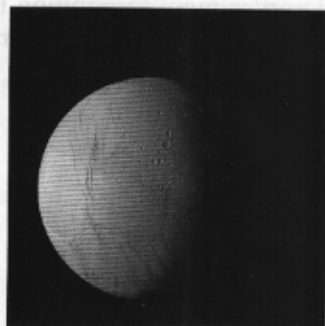

Synthesis Reactions 34

Decomposition Reactions 34

Exchange Reactions 35

Water, Acids, Bases, and Salts 35

Water 35

Acids and Bases 36

Salts 38

Organic Macromolecules 38

Functional Groups 39

Lipids 40

Carbohydrates 42

Proteins 44

Nucleotides and Nucleic Acids 48

CHAPTER SUMMARY 51 • QUESTIONS FOR REVIEW 52

CRITICAL THINKING 53 • CONCEPT MAPPING 54

3

Cell Structure and Function 55

Processes of Life 56

Prokaryotic and Eukaryotic Cells: An Overview 57

External Structures of Bacterial Cells 59

Glycocalyxes 59

Flagella 59

Fimbriae and Pili 62

Bacterial Cell Walls 63

Gram-Positive Bacterial Cell Walls 64

Gram-Negative Bacterial Cell Walls 66

Bacteria Without Cell Walls 66

Bacterial Cytoplasmic Membranes 66

Structure 66

Function 67

Cytoplasm of Bacteria 72

Cytosol 72

Inclusions 72

Endospores 73

Nonmembranous Organelles 74

External Structures of Archaea 74

Glycocalyxes 75

Flagella 75

Fimbriae and Hami 75

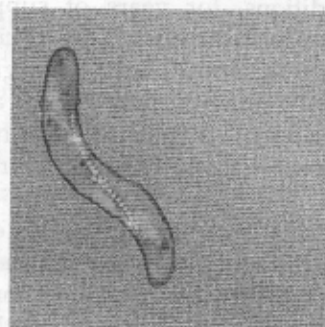

Archaeal Cell Walls and Cytoplasmic Membranes 76

Cytoplasm of Archaea 76

External Structure of Eukaryotic Cells 77

Glycocalyxes 77

Eukaryotic Cell Walls and Cytoplasmic Membranes 77

- Cytoplasm of Eukaryotes 79**
 Flagella 79
 Cilia 79
 Other Nonmembranous Organelles 80
 Membranous Organelles 81
 Endosymbiotic Theory 85

CHAPTER SUMMARY 87 • QUESTIONS FOR REVIEW 89
 CRITICAL THINKING 92 • CONCEPT MAPPING 93

4

Microscopy, Staining, and Classification 94

Units of Measurement 95

Microscopy 96

- General Principles of Microscopy 96
- Light Microscopy 97
- Electron Microscopy 102
- Probe Microscopy 103

Staining 104

- Preparing Specimens for Staining 104
- Principles of Staining 106
- Simple Stains 106
- Differential Stains 107
- Special Stains 108
- Staining for Electron Microscopy 109

Classification and Identification of Microorganisms 110

- Linnaeus and Taxonomic Categories 111
- Domains 113
- Taxonomic and Identifying Characteristics 114
- Taxonomic Keys 117

CHAPTER SUMMARY 118 • QUESTIONS FOR REVIEW 119
 CRITICAL THINKING 121 • CONCEPT MAPPING 121

5

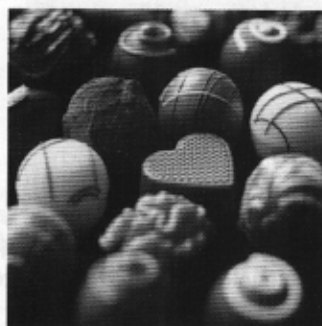

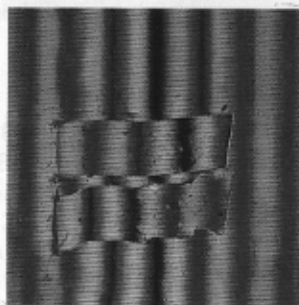

Microbial Metabolism 122

Basic Chemical Reactions

Underlying Metabolism 123

- Catabolism and Anabolism 123
- Oxidation and Reduction Reactions 124
- ATP Production and Energy Storage 124

The Roles of Enzymes in Metabolism 125

Carbohydrate Catabolism 131

- Glycolysis 131
- Cellular Respiration 133
- Pentose Phosphate Pathway 139
- Fermentation 139

Other Catabolic Pathways 141

- Lipid Catabolism 141
- Protein Catabolism 142

Photosynthesis 143

- Chemicals and Structures 143
- Light-Dependent Reactions 144
- Light-Independent Reactions 145

Other Anabolic Pathways 148

- Carbohydrate Biosynthesis 148
- Lipid Biosynthesis 149
- Amino Acid Biosynthesis 149
- Nucleotide Biosynthesis 150

Integration and Regulation of Metabolic Functions 151

CHAPTER SUMMARY 153 • QUESTIONS FOR REVIEW 155
 CRITICAL THINKING 157 • CONCEPT MAPPING 159

6

Microbial Nutrition and Growth 160

Growth

Requirements 161

- Nutrients: Chemical and Energy Requirements 161
- Physical Requirements 164

- Associations and Biofilms 167

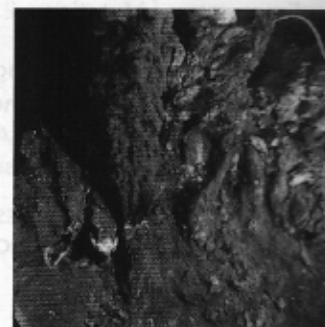

Culturing Microorganisms 169

- Clinical Sampling 170
- Obtaining Pure Cultures 171
- Culture Media 172
- Special Culture Techniques 176
- Preserving Cultures 176

Growth of Microbial Populations 177

- Generation Time 178
- Mathematical Considerations in Population Growth 178
- Phases of Microbial Population Growth 178
- Continuous Culture in a Chemostat 180
- Measuring Microbial Reproduction 180

CHAPTER SUMMARY 185 • QUESTIONS FOR REVIEW 187
 CRITICAL THINKING 188 • CONCEPT MAPPING 189

7

Microbial Genetics 190

The Structure and Replication of Genomes 191

The Structure of Nucleic Acids 191

The Structure of Prokaryotic Genomes 191

The Structure of Eukaryotic Genomes 193

DNA Replication 195

Gene Function 200

The Relationship Between Genotype and Phenotype 200

The Transfer of Genetic Information 200

The Events in Transcription 201

Translation 204

Regulation of Genetic Expression 209

Mutations of Genes 213

Types of Mutations 214

Effects of Point Mutations 215

Mutagens 215

Frequency of Mutation 217

DNA Repair 218

Identifying Mutants, Mutagens, and Carcinogens 218

Genetic Recombination and Transfer 221

Horizontal Gene Transfer Among Prokaryotes 222

Transposons and Transposition 227

CHAPTER SUMMARY 229 • QUESTIONS FOR REVIEW 230

CRITICAL THINKING 233 • CONCEPT MAPPING 234

8

Recombinant DNA Technology 235

The Role of Recombinant DNA Technology in Biotechnology 236

The Tools of Recombinant DNA Technology 236

Mutagens 236

The Use of Reverse Transcriptase to Synthesize cDNA 237

Synthetic Nucleic Acids 237

Restriction Enzymes 238

Vectors 240

Gene Libraries 241

Techniques of Recombinant DNA Technology 241

Multiplying DNA *In Vitro*: The Polymerase Chain Reaction 241

Selecting a Clone of Recombinant Cells 243

Separating DNA Molecules: Gel Electrophoresis and the Southern Blot 243

DNA Microarrays 243

Inserting DNA into Cells 244

Applications of Recombinant DNA Technology 245

Genetic Mapping 245

Microbial Community Studies 248

Pharmaceutical and Therapeutic Applications 249

Agricultural Applications 251

The Ethics and Safety of Recombinant DNA Technology 252

CHAPTER SUMMARY 254 • QUESTIONS FOR REVIEW 255

CRITICAL THINKING 256 • CONCEPT MAPPING 257

9

Controlling Microbial Growth in the Environment 258

Basic Principles of Microbial Control 259

Terminology of Microbial Control 259

Microbial Death Rates 260

Action of Antimicrobial Agents 261

The Selection of Microbial Control Methods 261

Factors Affecting the Efficacy of Antimicrobial Methods 261

Biosafety Levels 263

Physical Methods of Microbial Control 264

Heat-Related Methods 264

Refrigeration and Freezing 267

Desiccation and Lyophilization 267

Filtration 268

Osmotic Pressure 269

Radiation 269

Chemical Methods of Microbial Control 271

Phenol and Phenolics 272

Alcohols 272

Halogens 272

Oxidizing Agents 274

Surfactants 274

Heavy Metals 275

Aldehydes 275

Gaseous Agents 275

Enzymes 276

Antimicrobial Drugs 276

Methods for Evaluating Disinfectants and Antiseptics 276

Development of Resistant Microbes 278

CHAPTER SUMMARY 278 • QUESTIONS FOR REVIEW 279

CRITICAL THINKING 281 • CONCEPT MAPPING 282

10

Controlling Microbial Growth in the Body: Antimicrobial Drugs 283

The History of Antimicrobial Agents 284

Mechanisms of Antimicrobial Action 285

- Inhibition of Cell Wall Synthesis 286
- Inhibition of Protein Synthesis 288
- Disruption of Cytoplasmic Membranes 289
- Inhibition of Metabolic Pathways 290
- Inhibition of Nucleic Acid Synthesis 291
- Prevention of Virus Attachment, Entry, or Uncoating 293

Clinical Considerations in Prescribing Antimicrobial Drugs 293

- Spectrum of Action 293
- Effectiveness 294
- Routes of Administration 296
- Safety and Side Effects 297

Resistance to Antimicrobial Drugs 298

- The Development of Resistance in Populations 298
- Mechanisms of Resistance 298
- Multiple Resistance and Cross Resistance 301
- Retarding Resistance 301

CHAPTER SUMMARY 313 • QUESTIONS FOR REVIEW 314

CRITICAL THINKING 315 • CONCEPT MAPPING 316

11

Characterizing and Classifying Prokaryotes 317

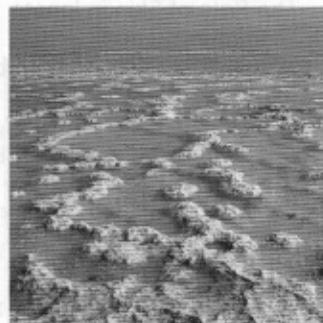

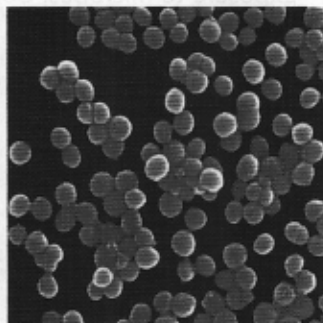

General Characteristics of Prokaryotic Organisms 318

- Morphology of Prokaryotic Cells 318
- Endospores 318
- Reproduction of Prokaryotic Cells 319
- Arrangements of Prokaryotic Cells 320

Modern Prokaryotic Classification 322

Survey of Archaea 322

- Extremophiles 323
- Methanogens 325

Survey of Bacteria 325

- Deeply Branching and Phototrophic Bacteria 325
- Low G + C Gram-Positive Bacteria 327
- High G + C Gram-Positive Bacteria 330
- Gram-Negative Proteobacteria 332
- Other Gram-Negative Bacteria 341

CHAPTER SUMMARY 342 • QUESTIONS FOR REVIEW 343

CRITICAL THINKING 345 • CONCEPT MAPPING 345

12

Characterizing and Classifying Eukaryotes 346

General Characteristics of Eukaryotic Organisms 347

- Reproduction of Eukaryotes 347
- Classification of Eukaryotic Organisms 350

Protozoa 351

- Distribution of Protozoa 351
- Morphology of Protozoa 352
- Nutrition of Protozoa 352
- Reproduction of Protozoa 353
- Classification of Protozoa 353

Fungi 357

- The Significance of Fungi 358
- Morphology of Fungi 358
- Nutrition of Fungi 359
- Reproduction of Fungi 360
- Classification of Fungi 361
- Lichens 364

Algae 366

- Distribution of Algae 366
- Morphology of Algae 366
- Reproduction of Algae 366
- Classification of Algae 367

Water Molds 369

Other Eukaryotes of Microbiological Interest: Parasitic Helminths and Vectors 370

- Arachnids 370
- Insects 370

CHAPTER SUMMARY 372 • QUESTIONS FOR REVIEW 373

CRITICAL THINKING 375 • CONCEPT MAPPING 376

13

Characterizing and Classifying Viruses, Viroids, and Prions 377

Characteristics of Viruses 378

- Genetic Material of Viruses 379
- Hosts of Viruses 379
- Sizes of Viruses 380
- Capsid Morphology 380
- Viral Shapes 380
- The Viral Envelope 382

Classification of Viruses 383

Viral Replication 385

- Lytic Replication of Bacteriophages 385
- Lysogenic Replication of Bacteriophages 388
- Replication of Animal Viruses 388

The Role of Viruses in Cancer 393

Culturing Viruses in the Laboratory 394

- Culturing Viruses in Mature Organisms 395
- Culturing Viruses in Embryonated Chicken Eggs 396
- Culturing Viruses in Cell (Tissue) Culture 396

Are Viruses Alive? 397

Other Parasitic Particles: Viroids and Prions 397

- Characteristics of Viroids 397
- Characteristics of Prions 398

CHAPTER SUMMARY 401 • QUESTIONS FOR REVIEW 402

CRITICAL THINKING 403 • CONCEPT MAPPING 404

14

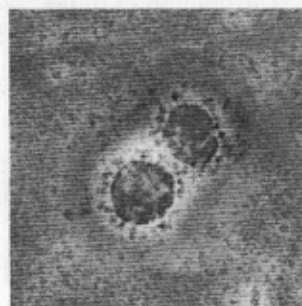

Infection, Infectious Diseases, and Epidemiology 405

Symbiotic Relationships Between Microbes and Their Hosts 406

- Types of Symbiosis 406
- Normal Microbiota in Hosts 407
- How Normal Microbiota Become Opportunistic Pathogens 408

Reservoirs of Infectious Diseases of Humans 410

- Animal Reservoirs 410
- Human Carriers 411
- Nonliving Reservoirs 411

The Invasion and Establishment of Microbes in Hosts: Infection 411

- Exposure to Microbes: Contamination and Infection 411
- Portals of Entry 411
- The Role of Adhesion in Infection 413

The Nature of Infectious Disease 414

- Manifestations of Disease: Symptoms, Signs, and Syndromes 414
- Causation of Disease: Etiology 415
- Virulence Factors of Infectious Agents 417
- The Stages of Infectious Diseases 420

The Movement of Pathogens Out of Hosts: Portals of Exit 422

Modes of Infectious Disease Transmission 422

- Contact Transmission 422
- Vehicle Transmission 422
- Vector Transmission 423

Classification of Infectious Diseases 424

Epidemiology of Infectious Diseases 426

- Frequency of Disease 426
- Epidemiological Studies 427
- Hospital Epidemiology: Healthcare-Associated (Nosocomial) Infections 429
- Epidemiology and Public Health 431

CHAPTER SUMMARY 434 • QUESTIONS FOR REVIEW 435

CRITICAL THINKING 437 • CONCEPT MAPPING 438

15

Innate Immunity 439

An Overview of the Body's Defenses 440

The Body's First Line of Defense 440

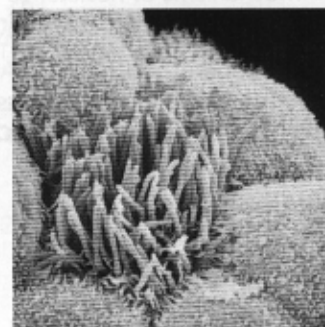

- The Role of Skin in Innate Immunity 440
- The Role of Mucous Membranes in Innate Immunity 441
- The Role of the Lacrimal Apparatus in Innate Immunity 442
- The Role of Normal Microbiota in Innate Immunity 442
- Other First-Line Defenses 443

The Body's Second Line of Defense 444

- Defense Components of Blood 444
- Phagocytosis 447
- Nonphagocytic Killing 448
- Nonspecific Chemical Defenses Against Pathogens 449
- Inflammation 454
- Fever 457

CHAPTER SUMMARY 459 • QUESTIONS FOR REVIEW 460

CRITICAL THINKING 462 • CONCEPT MAPPING 463

16

Adaptive Immunity 464**Overview of Adaptive Immunity 465****Elements of Adaptive Immunity 466**

The Tissues and Organs of the Lymphatic System 466

Antigens 468

Preparation for an Adaptive Immune Response 469

T Lymphocytes (T Cells) 471

B Lymphocytes (B Cells) and Antibodies 474

Immune Response Cytokines 480

Cell-Mediated Immune Responses 481

Activation of Cytotoxic T Cell Clones and Their Functions 481

The Perforin-Granzyme Cytotoxic Pathway 483

The CD95 Cytotoxic Pathway 483

Memory T Cells 483

T Cell Regulation 484

Antibody Immune Responses 484

Inducement of T-Dependent Antibody Immunity with Clonal Selection 484

Memory Cells and the Establishment of Immunological Memory 486

Types of Acquired Immunity 487

Naturally Acquired Active Immunity 487

Naturally Acquired Passive Immunity 487

Artificially Acquired Active Immunity 488

Artificially Acquired Passive Immunotherapy 488

CHAPTER SUMMARY 490 • QUESTIONS FOR REVIEW 491

CRITICAL THINKING 493 • CONCEPT MAPPING 494

17

Immunization and Immune Testing 495**Immunization 496**

Brief History of Immunization 496

Active Immunization 497

Passive Immunotherapy 502

Serological Tests That Use**Antigens and Corresponding Antibodies 503**

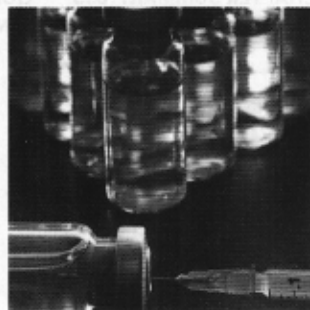

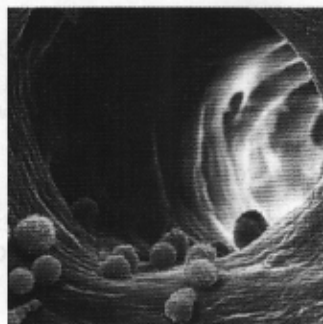

Precipitation Tests 504

Turbidimetric and Nephelometric Tests 505

Agglutination Tests 505

Neutralization Tests 506

The Complement Fixation Test 507

Labeled Antibody Tests 507

Point-of-Care Testing 511

CHAPTER SUMMARY 512 • QUESTIONS FOR REVIEW 513

CRITICAL THINKING 515 • CONCEPT MAPPING 516

18

Immune Disorders 517**Hypersensitivities 518**

Type I (Immediate)

Hypersensitivity 518

Type II (Cytotoxic)

Hypersensitivity 522

Type III (Immune Complex-Mediated)

Hypersensitivity 525

Type IV (Delayed or Cell-Mediated) Hypersensitivity 527

Autoimmune Diseases 531

Causes of Autoimmune Diseases 531

Examples of Autoimmune Diseases 531

Immunodeficiency Diseases 532

Primary Immunodeficiency Diseases 533

Acquired Immunodeficiency Diseases 533

CHAPTER SUMMARY 534 • QUESTIONS FOR REVIEW 535

CRITICAL THINKING 537 • CONCEPT MAPPING 537

19

Pathogenic Gram-Positive Bacteria 538**Staphylococcus 539**

Structure and

Physiology 539

Pathogenicity 539

Epidemiology 540

Staphylococcal

Diseases 541

Diagnosis, Treatment, and Prevention 542

Streptococcus 543Group A *Streptococcus*: *Streptococcus pyogenes* 544Group B *Streptococcus*: *Streptococcus agalactiae* 548

Other Beta-Hemolytic Streptococci 549

Alpha-Hemolytic Streptococci: The Viridans Group 549

Streptococcus pneumoniae 549**Enterococcus 551**

Structure and Physiology 551

- Pathogenesis, Epidemiology, and Diseases 551
 Diagnosis, Treatment, and Prevention 552

Bacillus 553

- Structure, Physiology, and Pathogenicity 553
 Epidemiology 553
 Disease 553
 Diagnosis, Treatment, and Prevention 554

Clostridium 554

- Clostridium perfringens* 555
Clostridium difficile 555
Clostridium botulinum 556
Clostridium tetani 558

Listeria 560**Mycoplasmas 560**

- Mycoplasma pneumoniae* 561
 Other Mycoplasmas 564

Corynebacterium 564

- Pathogenesis, Epidemiology, and Disease 565
 Diagnosis, Treatment, and Prevention 565

Mycobacterium 565

- Tuberculosis 566
 Leprosy 566
 Other Mycobacterial Infections 567

Propionibacterium 570**Nocardia and Actinomyces 572**

- Nocardia asteroides* 572
 Actinomyces 572

CHAPTER SUMMARY 573 • QUESTIONS FOR REVIEW 575

CRITICAL THINKING 576 • CONCEPT MAPPING 577

20

Pathogenic Gram-Negative Cocci and Bacilli 578

Pathogenic Gram-Negative Cocci: *Neisseria* 579

- Structure and Physiology of *Neisseria* 579

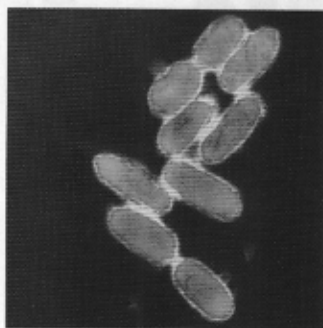

- The Gonococcus: *Neisseria gonorrhoeae* 580
 The Meningococcus: *Neisseria meningitidis* 582

Pathogenic, Gram-Negative, Facultatively Anaerobic Bacilli 583

- The Enterobacteriaceae: An Overview 583
 Coliform Opportunistic Enterobacteriaceae 586
 Noncoliform Opportunistic Enterobacteriaceae 590
 Truly Pathogenic Enterobacteriaceae 591
 The Pasteurellaceae 595

Pathogenic, Gram-Negative, Aerobic Bacilli 596

- Bartonella* 597
Brucella 597

- Bordetella* 598
Burkholderia 600
Pseudomonads 600
Francisella 602
Legionella 603
Coxiella 604

Pathogenic, Gram-Negative, Anaerobic Bacilli 605

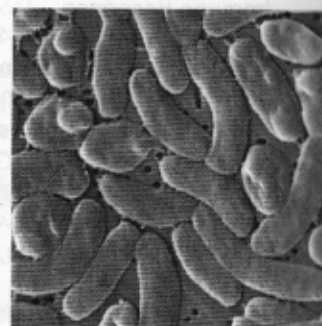

- Bacteroides* 605
Prevotella 605

CHAPTER SUMMARY 606 • QUESTIONS FOR REVIEW 607

CRITICAL THINKING 609 • CONCEPT MAPPING 610

21

Rickettsias, Chlamydias, Spirochetes, and Vibrios 611

**Rickettsias 612**

- Rickettsia* 612
Orientia tsutsugamushi 613
Ehrlichia and *Anaplasma* 616

Chlamydias 617

- Chlamydia trachomatis* 617
Chlamydia pneumoniae 620
Chlamydia psittaci 620

Spirochetes 620

- Treponema* 621
Borrelia 624
Leptospira 627

Pathogenic Gram-Negative Vibrios 628

- Vibrio* 628
Campylobacter jejuni 630
Helicobacter pylori 630

CHAPTER SUMMARY 633 • QUESTIONS FOR REVIEW 634

CRITICAL THINKING 636 • CONCEPT MAPPING 637

22

Pathogenic Fungi 638

An Overview of Medical Mycology 639

- The Epidemiology of Mycoses 639
 Categories of Fungal Agents:
 True Fungal Pathogens and Opportunistic Fungi 639

Clinical Manifestations of Fungal Diseases 640
 The Diagnosis of Fungal Infections 640
 Antifungal Therapies 641
 Antifungal Vaccines 641

Systemic Mycoses Caused by Pathogenic Fungi 642

Histoplasmosis 643
 Blastomycosis 644
 Coccidioidomycosis 645
 Paracoccidioidomycosis 647

Systemic Mycoses Caused by Opportunistic Fungi 647

Pneumocystis Pneumonia 647
 Candidiasis 648
 Aspergillosis 648
 Cryptococcosis 652
 Zygomycosis 654
 The Emergence of Fungal Opportunists in AIDS Patients 654

Superficial, Cutaneous, and Subcutaneous Mycoses 655

Superficial Mycoses 655
 Cutaneous and Subcutaneous Mycoses 656

Fungal Intoxications and Allergies 659

Mycotoxicoses 659
 Mushroom Poisoning (Mycetismus) 659
 Allergies to Fungi 659

CHAPTER SUMMARY 661 • QUESTIONS FOR REVIEW 662

CRITICAL THINKING 664 • CONCEPT MAPPING 665

23

Parasitic Protozoa, Helminths, and Arthropod Vectors 666

Parasitology 667

Arthropod Vectors 668

Protozoan Parasites of Humans 668

Ciliates 668
 Amoebas 669
 Flagellates 670
 Apicomplexans 675

Helminthic Parasites of Humans 683

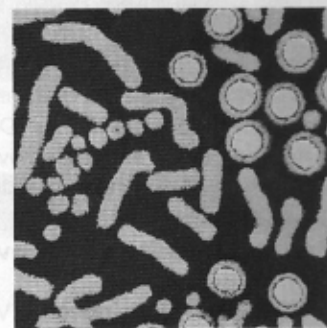

Cestodes 683
 Trematodes 687
 Nematodes 689

CHAPTER SUMMARY 694 • QUESTIONS FOR REVIEW 696

CRITICAL THINKING 698 • CONCEPT MAPPING 699

24

Pathogenic DNA Viruses 700

Poxviridae 701

Smallpox 701
 Molluscum Contagiosum 703
 Other Poxvirus Infections 703

Herpesviridae 704

Infections of Human Herpesvirus 1 and 2 705
 Human Herpesvirus 3 (Varicella-Zoster Virus) Infections 708
 Human Herpesvirus 4 (Epstein-Barr Virus) Infections 710
 Human Herpesvirus 5 (Cytomegalovirus) Infections 711
 Other Herpesvirus Infections 712

Papillomaviridae and Polyomaviridae 713

Papillomavirus Infections 713
 Polyomavirus Infections 713

Adenoviridae 715

Hepadnaviridae 716

Hepatitis B Infections 717
 The Role of Hepatitis B Virus in Hepatic Cancer 719

Parvoviridae 719

CHAPTER SUMMARY 720 • QUESTIONS FOR REVIEW 721

CRITICAL THINKING 723 • CONCEPT MAPPING 724

25

Pathogenic RNA Viruses 725

Naked, Positive ssRNA Viruses: *Picornaviridae*, *Caliciviridae*, *Astroviridae*, and *Hepeviridae* 726

Common Colds Caused by Rhinoviruses 726

Diseases of

Enteroviruses 727
 Hepatitis A 730
 Acute Gastroenteritis 730
 Hepatitis E 731

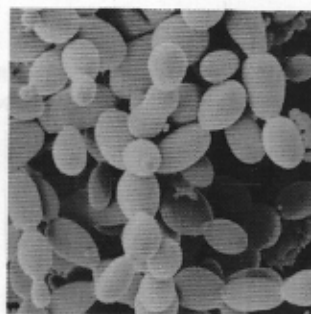

Enveloped, Positive ssRNA Viruses: <i>Togaviridae</i>, <i>Flaviviridae</i>, and <i>Coronaviridae</i>	732
Diseases of +RNA Arboviruses	732
Other Diseases of Enveloped +ssRNA Viruses	736
Enveloped, Positive ssRNA Viruses with Reverse Transcriptase: <i>Retroviridae</i>	739
Oncogenic Retroviruses (<i>Deltaretrovirus</i>)	740
Immunosuppressive Retroviruses (<i>Lentivirus</i>) and Acquired Immunodeficiency Syndrome	740
Enveloped, Unsegmented, Negative ssRNA Viruses: <i>Paramyxoviridae</i>, <i>Rhabdoviridae</i>, and <i>Filoviridae</i>	747
Measles	747
Diseases of Parainfluenza Virus	749
Mumps	750
Disease of Respiratory Syncytial Virus	750
Rabies	751
Hemorrhagic Fevers	753
Enveloped, Segmented, Negative ssRNA Viruses: <i>Orthomyxoviridae</i>, <i>Bunyaviridae</i>, and <i>Arenaviridae</i>	753
Influenza	753
Diseases of Bunyaviruses	757
Diseases of Arenaviruses	757
Naked, Segmented dsRNA Viruses: <i>Reoviridae</i>	760
Rotavirus Infections	760
Coltivirus Infections	761

CHAPTER SUMMARY 762 • QUESTIONS FOR REVIEW 764
CRITICAL THINKING 766 • CONCEPT MAPPING 767

26

Applied and Environmental Microbiology 768

Food Microbiology	769
The Roles of Microorganisms in Food Production	769
The Causes and Prevention of Food Spoilage	772
Foodborne Illnesses	776
Industrial Microbiology	776
The Roles of Microbes in Industrial Fermentations	776

Industrial Products of Microorganisms	777
Water Treatment	779
Environmental Microbiology	786
Microbial Ecology	786
Bioremediation	787
The Problem of Acid Mine Drainage	787
The Roles of Microorganisms in Biogeochemical Cycles	789
Soil Microbiology	791
Aquatic Microbiology	793
Biological Warfare and Bioterrorism	795
Assessing Microorganisms as Potential Agents of Warfare or Terror	795
Known Microbial Threats	796
Defense Against Bioterrorism	797
The Roles of Recombinant Genetic Technology in Bioterrorism	797
CHAPTER SUMMARY	798 • QUESTIONS FOR REVIEW 800
CRITICAL THINKING	803 • CONCEPT MAPPING 804
Answers to Questions for Review	A-1
Glossary	G-1
Credits	C-1
Index	I-1

27 Pathogenic Fungi 838

An Overview of Fungal Pathogens	838
The Epidemiology of Fungal Pathogens	838
Categories of Fungal Agents	838
True Fungal Pathogens and Opportunistic Fungi	839
