

Contents

Preface iii

1 Scientific Investigation 1

Laboratory Objectives 1

Introduction 1

Exercise 1.1 Questions and Hypotheses 2

Exercise 1.2 Designing Experiments to Test Hypotheses 4

Exercise 1.3 Designing an Experiment 10

Exercise 1.4 Presenting and Analyzing Results 14

Exercise 1.5 Interpreting and Communicating Results 20

Reviewing Your Knowledge 21

Applying Your Knowledge 24

Student Media: BioFlix, Activities, Investigations, Videos,
and Data Tables 28

References 28

Websites 29

2 Microscopes and Cells 33

Laboratory Objectives 33

Introduction 33

Exercise 2.1 The Compound Light Microscope 34

Exercise 2.2 Basic Microscope Techniques 37

Exercise 2.3 The Stereoscopic Microscope 41

Exercise 2.4 The Transmission Electron Microscope 44

Exercise 2.5 The Organization of Cells 46

Reviewing Your Knowledge 53

Applying Your Knowledge 54

Investigative Extensions 56

Student Media: BioFlix, Activities, Investigations, and Videos 57

References 57

Websites 57

3 Diffusion and Osmosis 61

Laboratory Objectives 61

Introduction 61

Exercise 3.1 Diffusion of Molecules 63

Exercise 3.2 Osmotic Activity in Cells 67

Exercise 3.3 Investigating Osmolarity of Plant Cells 73

Reviewing Your Knowledge 82

Applying Your Knowledge 83

Investigative Extensions 84

Student Media: BioFlix, Activities, Investigations, Videos,
and Data Tables 84

References 85

Websites 85

4 Enzymes 89

Laboratory Objectives 89

Introduction 89

Exercise 4.1 Experimental Method and the Action of Catechol Oxidase 90

Exercise 4.2 Inhibiting the Action of Catechol Oxidase 93

Exercise 4.3 Influence of Enzyme Concentration, pH, and Temperature on the
Activity of Amylase 96

Reviewing Your Knowledge 107

Applying Your Knowledge 108

Investigative Extensions 110

Student Media: BioFlix, Activities, Investigations, Videos,
and Data Tables 111

References 111

Websites 111

5 Cellular Respiration and Fermentation 115

Laboratory Objectives 115

Introduction 115

Exercise 5.1 Alcoholic Fermentation 118

Exercise 5.2 Cellular Respiration 125

Exercise 5.3 Designing and Performing Your Open-Inquiry Investigation 132

Reviewing Your Knowledge 134

Applying Your Knowledge 135

Student Media: BioFlix, Activities, Investigations, Videos, and Data Tables 136

References 136

Websites 137

6 Photosynthesis 139

Laboratory Objectives 139

Introduction 139

Exercise 6.1 The Wavelengths of Light for Photosynthesis 140

Exercise 6.2 Pigments in Photosynthesis 143

Exercise 6.3 Separation and Identification of Plant Pigments by Paper Chromatography 146

Exercise 6.4 Determining the Absorption Spectrum for Leaf Pigments 149

Reviewing Your Knowledge 154

Applying Your Knowledge 154

Investigative Extensions 156

Student Media: BioFlix, Activities, Investigations, Videos, and Data Tables 157

References 157

Websites 157

7 Mitosis and Meiosis 161

Laboratory Objectives 161

Introduction 161

Exercise 7.1 Modeling the Cell Cycle and Mitosis in an Animal Cell 162

Exercise 7.2 Observing Mitosis and Cytokinesis in Plant Cells 167

- Exercise 7.3 Observing Chromosomes, Mitosis, and Cytokinesis in Animal Cells 170
- Exercise 7.4 Modeling Meiosis 173
- Exercise 7.5 Meiosis in *Sordaria fimicola*: A Study of Crossing Over 179

Reviewing Your Knowledge 182

Applying Your Knowledge 184

Investigative Extensions 185

Student Media: BioFlix, Activities, Investigations, and Videos 186

References 187

Websites 187

8 Mendelian Genetics I: Fast Plants 191

Laboratory Objectives 191

Introduction 191

Exercise 8.1 Inheritance of Anthocyanin Gene 199

Exercise 8.2 Inheritance of Plant Color: Green, Yellow-Green, and Purple (Anthocyanin Present) 203

Exercise 8.3 Inheritance of Variegated and Nonvariegated Leaf Color 208

Reviewing Your Knowledge 212

Applying Your Knowledge 213

Investigative Extensions 214

Student Media: BioFlix, Activities, Investigations, Videos, and Data Tables 216

References 216

Websites 216

9 Mendelian Genetics II: *Drosophila* 219

Laboratory Objectives 219

Introduction 219

Exercise 9.1 Establishing the Enzyme Reaction Controls 220

Exercise 9.2 Determining the Pattern of Inheritance of the Aldox Gene 225

Exercise 9.3 Determining Parental Genotypes Using Evidence from Progeny 228

Exercise 9.4 Mapping Genes 231

Reviewing Your Knowledge 236

Applying Your Knowledge 236

Investigative Extensions 237

Student Media: BioFlix, Activities, Investigations, Videos,
and Data Tables 238

References 238

Websites 238

10 Molecular Biology 245

Laboratory Objectives 245

Introduction 245

Exercise 10.1 Mapping DNA Using Restriction Enzymes and Electrophoresis 248

Exercise 10.2 Practice Problem for Mapping DNA 262

Reviewing Your Knowledge 266

Applying Your Knowledge 268

Investigative Extensions 269

Student Media: BioFlix, Activities, Investigations, and Videos 270

References 270

Websites 271

11 Population Genetics: The Hardy-Weinberg Equilibrium 275

Laboratory Objectives 275

Introduction 275

Exercise 11.1 Testing Hardy-Weinberg Equilibrium Using a Bead Model 279

Exercise 11.2 Simulation of Evolutionary Change Using the Bead Model 282

Exercise 11.3 Open-Inquiry Computer Simulation of Evolution 297

Reviewing Your Knowledge 298

Applying Your Knowledge 299

Investigative Extensions 300

Student Media: BioFlix, Activities, Investigations, Videos,
and Data Tables 301

References 301

Websites 302

17	The Kingdom Fungi	449
	Laboratory Objectives	449
	Introduction	449
	Exercise 17.1 A Survey of Major Fungal Groups	451
	Exercise 17.2 Designing and Performing an Open-Inquiry Investigation	466
	Reviewing Your Knowledge	469
	Applying Your Knowledge	470
	Student Media: BioFlix, Activities, Investigations, and Videos	470
	References	470
	Websites	470

18	Animal Diversity I: Porifera, Cnidaria, Platyhelminthes, Mollusca, and Annelida	473
	Laboratory Objectives	473
	Introduction	473
	Exercise 18.1 Phylum Porifera—Sponges (<i>Scypha</i>)	478
	Exercise 18.2 Phylum Cnidaria—Hydras (<i>Hydra</i>)	481
	Exercise 18.3 Phylum Platyhelminthes—Planarians (<i>Dugesia</i>)	484
	Exercise 18.4 Phylum Mollusca—Clams	487
	Exercise 18.5 Phylum Annelida—Clamworms (<i>Nereis</i>) and Earthworms (<i>Lumbricus terrestris</i>)	490
	Reviewing Your Knowledge	495
	Applying Your Knowledge	495
	Investigative Extensions	495
	Student Media: BioFlix, Activities, Investigations, and Videos	496
	References	497
	Websites	497

19	Animal Diversity II: Nematoda, Arthropoda, Echinodermata, and Chordata	499
	Exercise 19.1 Phylum Nematoda—Roundworms (<i>Ascaris</i>)	499
	Exercise 19.2 Phylum Arthropoda	503
	Exercise 19.3 Phylum Echinodermata—Sea Star	510
	Exercise 19.4 Phylum Chordata	513

Reviewing Your Knowledge—Lab Topics 18 and 19	520
Applying Your Knowledge	520
Investigative Extensions	525
Student Media: BioFlix, Activities, Investigations, and Videos	526
References	526
Websites	527

20 Plant Anatomy 531

Laboratory Objectives	531
Introduction	531
Exercise 20.1 Plant Morphology	535
Exercise 20.2 Plant Primary Growth and Development	537
Exercise 20.3 Cell Structure of Primary Tissues	540
Exercise 20.4 Structure of Tissues Produced by Secondary Growth	552
Exercise 20.5 Grocery Store Botany: Modifications of Plant Organs	555
Reviewing Your Knowledge	556
Applying Your Knowledge	558
Investigative Extensions	560
Student Media: BioFlix, Activities, Investigations, and Videos	560
References	560
Websites	561

21 Plant Growth 563

Laboratory Objectives	563
Introduction	563
Exercise 21.1 Factors Influencing Seed Germination	568
Exercise 21.2 Plant Growth Regulators: Auxin	571
Exercise 21.3 Plant Growth Regulators: Gibberellins	575
Exercise 21.4 Designing and Performing an Open-Inquiry Investigation	579
Reviewing Your Knowledge	581
Applying Your Knowledge	581
Student Media: BioFlix, Activities, Investigations, Videos, and Data Table	583

26	Animal Behavior	699
	Laboratory Objectives	699
	Introduction	699
	Exercise 26.1 Taxis in Brine Shrimp	701
	Exercise 26.2 Kinesis in Pill Bugs	704
	Exercise 26.3 Agonistic Display in Male Siamese Fighting Fish	707
	Exercise 26.4 Reproductive Behavior in Fruit Flies	711
	Exercise 26.5 Designing and Performing Your Open-Inquiry Investigation	715
	Reviewing Your Knowledge	717
	Applying Your Knowledge	717
	Student Media: BioFlix, Activities, Investigations, and Videos	719
	References	719
	Websites	719

27	Ecology I: Terrestrial Ecology	723
	Laboratory Objectives	723
	Introduction	723
	Exercise 27.1 Biotic Components	727
	Exercise 27.2 Abiotic Components	739
	Exercise 27.3 Data Analysis	743
	Reviewing Your Knowledge	752
	Applying Your Knowledge	753
	Optional Exercise: Investigating Weedy Fields	755
	Student Media: BioFlix, Activities, Investigations, Videos, and Data Tables	756
	References	756
	Websites	756

28 Ecology II: Computer Simulations of a Pond Ecosystem 763

Laboratory Objectives 763

Introduction 763

Exercise 28.1 Computer Model of the Pond Ecosystem 765

Exercise 28.2 Investigating the Effects of Disturbance on the Pond Ecosystem 774

Reviewing Your Knowledge 783

Applying Your Knowledge 784

Investigative Extensions 786

Student Media: BioFlix, Activities, Investigations, and Videos 786
