

Contents

The  icons represent lab activities that emphasize critical thinking and problem solving skills.

Preface

vii

Exercise 1 Introduction to the Scientific Method 1

Activity 1: Forming Hypotheses to Solve Problems 2

 Activity 2: Testing Hypotheses 4

 Activity 3: Interpreting Data 6

Activity 4: Performing an Experiment and Collecting Data 8

Activity 5: Graphing Your Results 11

 Activity 6: Interpreting Data Using Simple Statistics 16

Exercise 2 Windows to a Microscopic World 23

Activity 1: Learning to Use the Dissecting Microscope 24

Activity 2: Making Observations with the Dissecting Microscope 26

Activity 3: Getting Familiar with the Compound Microscope 28

Activity 4: Parts of the Compound Microscope 31

Activity 5: Learning to Use the Compound Microscope 32

Activity 6: Preparing Temporary Slides—Wet Mounts 35

 Activity 7: Using the Microscope to Answer a Question: What Do Aquarium Snails Eat? 38

Exercise 3 Functions and Properties of Cells 45

Activity 1: Cellular Organelles 46

 Activity 2: Observing Living Cells 49

 Activity 3: Amyloplasts in Potato Tubers 54

Activity 4: Stem Cells 56

Exercise 4 Movement of Molecules Across Cell Membranes 61

 Activity 1: Water Molecules in Motion 62

Activity 2: Diffusion and Osmosis 64

Activity 3: Controls for the Diffusion and Osmosis Experiment 67

 Activity 4: Completing the Diffusion and Osmosis Experiment 70

 Activity 5: Osmosis in Elodea Cells 72

Exercise 5 Investigating Cellular Respiration 77

Activity 1: Do Microorganisms Perform Cellular Respiration? 78

 Activity 2: Comparison of Classroom Air with Exhaled Air 80

 Activity 3: Effect of Exercise on Carbon Dioxide Production 81

Activity 4: Alternatives to Aerobic Respiration 85

Activity 5: Anaerobic Respiration 86

Exercise 6	Photosynthesis	93
Activity 1: Absorption of Carbon Dioxide During Photosynthesis		94
Activity 2: Testing Leaves for Starch		98
Activity 3: Cells of the Leaf Epidermis		103
Exercise 7	Organic Molecules and Nutrition	107
Activity 1: Positive and Negative Indicator Tests		108
Activity 2: Testing Food Samples		112
Activity 3: An Embryo in a Peanut Seed		114
Activity 4: Dietary Intake and Good Health		116
Exercise 8	Factors That Affect Enzyme Activity	121
Activity 1: Demonstration of Enzyme Activity		122
Activity 2: Enzyme Activity in Food Vacuoles		126
Activity 3: Effect of Environmental Conditions on Protein Structure		130
Exercise 9	Introduction to Molecular Genetics	137
Activity 1: Removing DNA from Cells		138
Activity 2: The Basics of DNA Structure		142
Activity 3: Building a Model of DNA		144
Activity 4: Steps of Protein Synthesis		146
Activity 5: Building a Real Protein		148
Exercise 10	Mitosis and Asexual Reproduction	159
Activity 1: How Mitosis Works		160
Activity 2: Recognizing the Stages of Mitosis		162
Activity 3: Mitosis—The Real Thing!		165
Activity 4: Estimate the Duration of the Cell Cycle		167
Activity 5: Regeneration		170
Activity 6: Asexual Reproduction: Growing a Plant from a Cutting		171
Exercise 11	Connecting Meiosis and Genetics	175
Activity 1: Getting Started: Build a Pair of Chromosomes		177
Activity 2: Homologous Chromosomes Separate in Meiosis to Form Gametes		180
Activity 3: Fertilization: Nature's Equivalent to Rolling the Dice		184
Activity 4: What's Your Baby's Genotype?		185
Activity 5: Genotype Determines Phenotype		186
Activity 6: Passing on Traits		189
Activity 7: Practicing Genetics Problems		190
Exercise 12	Human Genetics	195
Activity 1: PTC Tasting		196
Activity 2: X-Linked Traits		199
Activity 3: Codominance and Sickle-Cell Disease		201
Activity 4: A Family History of Sickle-Cell Disease		203
Activity 5: Codominance and Multiple Alleles		208
Exercise 13	Evolution	213
Activity 1: Determining the Age of Rock Layers and Fossils		214
Activity 2: Reconstructing Fossil Evidence		220
Activity 3: Natural Selection		224

Exercise 14	Functions of Tissues and Organs	229
Activity 1: Skin: The Outer Protective Layer		230
Activity 2: The Epidermis		231
Activity 3: The Dermis		233
Activity 4: Hair Today, Gone Tomorrow		234
Activity 5: Below the Skin (The Hypodermis)		236
Activity 6: Touch Sensitivity		238
Exercise 15	The Cardiovascular System	247
Activity 1: Circulation of Blood Around the Body		248
Activity 2: A Closer Look at the Heart		252
Activity 3: Understanding Blood Pressure and Pulse Rate		255
Activity 4: Cardiovascular Disease		257
Exercise 16	Introduction to Anatomy: Dissecting the Fetal Pig	267
Activity 1: Getting Started		268
Activity 2: Following Anatomical Directions		268
Activity 3: External Anatomy of the Fetal Pig		269
Activity 4: Dissection of the Mouth		272
Activity 5: Dissection of the Neck		275
Activity 6: Dissection of the Thoracic Cavity		279
Activity 7: Measuring Lung Capacity		281
Exercise 17	Organs of the Abdominal Cavity	287
Activity 1: Dissection of the Abdominal Cavity		287
Activity 2: The Urinary System		292
Activity 3: Internal Structure of the Stomach		295
Activity 4: Examining the Small Intestine		298
Activity 5: The Importance of Surface Area		299
Activity 6: Earthworm Locomotion		302
Exercise 18	Introduction to Forensic Biology	309
Activity 1: Getting Started		310
Activity 2: Classifying Fingerprint Patterns		315
Activity 3: Analyzing Fingerprint Evidence		318
Activity 4: Blood Typing		321
Exercise 19	Biotechnology: DNA Analysis	329
Activity 1: Sources of DNA Evidence		330
Activity 2: Solving a Crime Using RFLP Fingerprints		331
Activity 3: The Use of PCR for STR Analysis		336
Activity 4: Solving a Criminal Case Using STR Evidence		340
Activity 5: Deciding a Paternity Suit Involving STR Analysis		347
Activity 6: DNA Barcodes		349
Exercise 20	Using Biotechnology to Assess Ecosystem Damage	355
Activity 1: Exploring Bioluminescence		356
Activity 2: Getting Started		359
Activity 3: Making Accurate Serial Dilutions		360
Activity 4: Preparing Bacterial Samples		363
Activity 5: Testing the Toxicity of Your Chemical		363

Exercise 21	Ecosystems	371
Activity 1: Food Chains		373
Activity 2: Loss of Energy in Food Chains		375
Activity 3: Food Chains Interact to Form Food Webs		377
Activity 4: Bioaccumulation		380
Exercise 22	Biodiversity and Conservation	389
Activity 1: Value of Biodiversity		391
Activity 2: Commercial Fishing as an Example of Tragedy of the Commons		392
Activity 3: Ecosystem Jenga®		399
Exercise 23	Population Ecology	407
Activity 1: Introduction to Sampling—An Ecological Tool		408
Activity 2: Sampling Quadrats to Estimate Population		411
Activity 3: The Mark and Recapture Technique for Estimating Population Size		418
Appendix 1	Game Cards for Exercise 22	427
Appendix 2	Self Test Answers	435
	Photo/Illustration Credits	461
