Preface ix

1. Introduction 1

2. The Plant Cell 7

The Protoplast 8

The Cell Wall 13

Cell Growth 16

3. The Flower 17

Inflorescence Types 19

Flower Morphology 19

Variations in Flower Morphology 22

The Induction of Flowering 27

Flower Development 29

4. Reproduction 31

Vegetative Reproduction 32

Sexual Reproduction 34

Overview of Sexual Reproduction 42

Apomixis 43

5. Embryo, Seed, and Fruit Development 44

Patterns of Embryo Development 44

Somatic Embryogenesis 51

Seed Development 52

Fruit Development 55

6. <i>Shoot Morphology and Development</i>	57
Growth of the Shoot	59
Shoot Apex and the Shoot Apical Meristem	60
Shoot Expansion	63
Shoot Branching	65
Shoot Modifications	66
Reproductive Shoots	67
7. <i>Plant Cells and Tissues</i>	69
Cell Types and Tissues	70
8. <i>Tissues of the Stem</i>	81
The Dicotyledonous Stem	82
Three-Dimensional Organization of the Vascular System	84
Differentiation of Tissues in the Stem	86
The Monocotyledonous Stem	91
The Stele	92
9. <i>The Leaf</i>	95
Leaf Form	96
Tissues of the Leaf	101
Variations Related to the Environment	104
Leaf Development	106
10. <i>The Root</i>	111
Root Systems	112
Root Associations	113
Root Apex and the Root Apical Meristem	115
Tissues of the Root	118
Root Branching	123
Shoot Buds from Roots	125
11. <i>The Secondary Body</i>	127
The Vascular Cambium	128
Secondary Xylem (The Wood)	133
Secondary Phloem	136
Secondary Growth in Monocotyledons	138
Periderm	139
GLOSSARY	143
BIBLIOGRAPHY	155
INDEX	157
