

Contents

1 A Philosophical Position, 3

2 The Gene as a Unit of Selection, 10

- 2.1 A general model of selection in the codical domain, 13
- 2.2 Selection at the level of the gene, 16
- 2.3 Kin selection, 19
- 2.4 Effects of inbreeding and asexual reproduction, 21

3 Clade Selection and Macroevolution, 23

- 3.1 Requirements for selection among gene pools and clades, 24
- 3.2 Selection of genes vs. selection of gene pools, 27
- 3.3 How important is clade selection?, 31
- 3.4 Characters likely to be important in clade selection, 34

4 Levels of Selection Among Interactors, 38

- 4.1 Adaptation as the material effect of response to selection, 38
- 4.2 Natural selection within organisms, 41
- 4.3 Selection of individuals in populations, 43
- 4.4 Trait-group selection, 45
- 4.5 Selection of populations within species, 46
- 4.6 An aside on beehives and haystacks, 48
- 4.7 Selection among more inclusive phylads, 50
- 4.8 Clade selection and punctuated equilibria, 53
- 4.9 Genealogically mixed interactors, 54

5 Optimization and Related Concepts, 56

- 5.1 Frequency-dependent selection, 56
- 5.2 Parameter optimization, 60
- 5.3 Character values and fitness values, 65
- 5.4 Strategies, tactics, and winnings, 69

6 Historicity and Constraint, 72

- 6.1 The organism as historical document, 72
- 6.2 Natural selection and phylogenetic constraint, 76
- 6.3 Developmental constraints, 80
- 6.4 Genetic constraints, 85
- 6.5 Unity of type and *Bauplan*, 87

7 Diversity Within and Among Populations, 89

- 7.1 Natural history as the foundation of comparative biology, 89
- 7.2 Causes of variation among individuals, 91
- 7.3 Examples of variation within a population, 94
- 7.4 Cladogenesis, 98
- 7.5 Comparative biology without functionalism, 100
- 7.6 Functional interpretations of phylogenetic divergence, 101

8 Some Recent Issues, 106

- 8.1 The lek paradox, 106
- 8.2 The female pheromone fallacy, 111
- 8.3 *Schreckstoff*, 113
- 8.4 The helpful-stress effect, 116
- 8.5 Species fallacies, 118

9 Stasis, 127

- 9.1 Taxonomic stasis, 128
- 9.2 A desperation hypothesis, 132
- 9.3 Character stasis, 135
- 9.4 Avian and mammalian body temperature, 136
- 9.5 Electrolyte concentrations of marine vertebrates, 138
- 9.6 Why no viviparous birds or turtles?, 139
- 9.7 Other problems of character stasis, 141

10 Other Challenges and Anomalies, 143

- 10.1 Haldane's dilemma, 143
- 10.2 Paradoxes of sexuality, 148
- 10.3 Other difficulties, 150
